Dear Mr. Fisch,

Hospice Georgina would like to support the proposal by Transit Georgina for subsidies to maintain and extend their important work. It is essential for a number of Hospice clients to have access to timely and affordable transportation to medical and other appointments. We believe it is more appropriate for Hospice clients to rely in Transit Georgina to provide transportation than to try to duplicate their services ourselves.

Transit Georgina has been extremely diligent in developing a transportation service which is badly needed in our community. They have been innovative in devising a system that meets the needs of our spread-out population who have few services available to them locally. Transit Georgina has steadily increased its contribution to our citizens and strengthened its infrastructure.

We believe they are worthy of financial support from York Region for their important projects.

Yours sincerely,

A handwritten signature in cursive script that reads "Edith B. Shore".

Edith B. Shore, President
