Dear Regional Councillor,

I am very concerned about a planning issue to be put forward at the above meeting regarding a proposed bylaw to allow high densities along all regional roads.

I am concerned that a broad brush bylaw such as this might not take into account environmental factors and the public process.

I am on the record for asking for high density right in Oak Ridges where I live, as an alternative to such development on the environmentally sensitive areas close by.

Sincerely,
Gloria Marsh,
