

Annotated Version of the Adopted Regional Official Plan, December 2009 Showing Proposed Provincial Modifications, May 2010

This version of the Regional Official Plan has been annotated to show both the Regional modifications requested endorsed by Council in May 2010 and the Proposed Provincial Modifications to the Adopted York Region Official Plan - December 2009. As well since the May 2010 Regional modifications report, several additional Regional modifications have been identified.

The regional staff position on the Proposed Provincial modifications as well as additional Regional modifications will be considered for endorsement by Regional Council at it's meeting of June 22, 2010.

Revisions to the Plan are shown as follows:

Endorsed Regional modification additions are shown in red text and underlined: Addition

Endorsed Regional modification deletions are shown in blue text with a strikethrough: ~~Deletion~~

Additional Proposed Regional modification additions are shown in red text and underlined: Addition

Additional Proposed Regional modification deletion is shown in blue text with a strikethrough: ~~Deletion~~

Proposed Provincial modification additions are shown in purple text and underlined: Addition

Proposed Provincial modification deletions are shown in green text with a strikethrough: ~~Deletion~~

Additionally, Provincial modifications that the Region does not support (from Matrix in Attachment 2), have been highlighted in yellow:

Addition / ~~Deletion~~

wide range of issues, including transportation, infrastructure and land use planning, urban form, housing, natural heritage and resource protection in the interest of promoting economic prosperity.

In 2009, the Province approved the Lake Simcoe Protection Plan which identifies measures required to restore the ecological health of Lake Simcoe. Provisions of the Plan will impact the way future growth occurs in the watershed.

As well, the Metrolinx Regional Transportation Plan: The Big Move is the 25-year blueprint to achieve a transportation system for the Greater Toronto and Hamilton Area that is effective, integrated and multi-modal. The Province's Parkway Belt West Plan also continues to apply within York Region wherein the Region and its municipalities continue to implement provincial policy regarding the protection of major linear infrastructure (such as transportation, power dissemination, and communications) and natural heritage corridors (such as major river valleys).¹

Under the Planning Act, the Province is the approval authority for this Regional Official Plan. Amendments to this Plan following the approval of the parent document may be exempt from provincial approval. The Province is also a major funding contributor in the Region's infrastructure investments and human services programs. During the planning horizon of this Plan, the Province and the Region will work together to ensure successful implementation of the governing Provincial Plans and legislation.

All planning decisions under the York Region Official Plan shall conform within provincial plans and be consistent with the Provincial Policy Statement. ~~York Region's Official Plan conforms with provincial planning documents and is consistent with the Provincial Policy Statement issued under the Planning Act.²~~

1.4 Purpose and Organization

The policies of this Plan will guide economic, environmental and community building decisions to manage growth. A series of regional strategies, plans and guidelines will support and implement the policies in this Plan.

The policies in this Plan will help co-ordinate and set the stage for more detailed planning by local municipalities. This Plan will also provide a framework for co-ordinated planning with adjacent municipalities, as well as with other jurisdictions. These efforts can provide certainty on how to approach environmental, economic and community issues when creating sustainable communities.

All the policies in this Plan must be considered together to determine conformity. Individual policies should not be read or interpreted in isolation. The Plan is intended to be read in its entirety and the relevant policies are to be

York Region Triple Bottom Line Objectives

Sustainable Natural Environment	Healthy Communities	Economic Vitality
Identify, protect and enhance the Regional Greenlands System	Promote a mix and range of housing types	Balance job creation with population growth
Ensure a healthy system, rich in native biodiversity	Promote the health and well-being of residents in accessible and safe communities	Encourage entrepreneurship
Ensure that significant environmental features and functions are protected and natural hazards avoided	Work with partners to provide adequate and quality human services	Retain and attract highly skilled labour
Integrate with infrastructure delivery and urban development	Recognize, conserve and promote cultural heritage	Promote economic diversity and resilience
	Improve air quality, the health of communities, and address climate change	Deliver context sensitive and efficient infrastructure
		Attract green industry employment

A Sustainable Natural Environment

York Region is rich in natural features, from the shores of Lake Simcoe to the major valleys of the Humber, Don, Rouge, Black, Holland and Maskinonge rivers, to the extensive woodlands, ~~the rich, productive soils of the Holland marsh wetlands~~ and the rolling hills of the Oak Ridges Moraine. These provide habitat for a variety of species and play an important role in the Region's ecology and native biodiversity. Many of the Region's natural areas are dependent upon and contribute to a system of surface and sub-surface water that goes beyond local municipal and Regional boundaries.

The natural environment influences and shapes the Region's history and structure and contributes to Regional identity. It dictated early settlement patterns such as the alignment of major streets and the location of settlements. The distribution of resources such as forests, arable land and aggregate resources influenced the economic development of the Region.

York Region contains some of the most significant and environmentally sensitive geological landforms in Ontario, of which the most predominant is the Oak Ridges Moraine.

The policies in Chapter 2 are fundamental to ensuring the Region retains its distinct identity; remains an attractive place to invest; ensures economic prosperity; enhances liveability in communities; provides opportunities for active and passive recreation; and contributes to health and a high-quality of life for residents and workers.

A Sustainable Natural Environment Goal

To protect and enhance the natural environment for current and future generations so that it will sustain life, maintain health and provide an improved quality of life.

2.1 Regional Greenlands System: A Sustainable Natural Environment Legacy

The policies of this section are designed to identify, protect, and enhance a linked Regional Greenlands System as a permanent legacy for York Region. The Regional Greenlands System on Map 2 contains *key natural heritage features* and *key hydrologic features* and the adjacent lands necessary to maintain these features in a linked system. York Region's Greenlands are connected to a larger

IN THIS CHAPTER:

- 2.1 Regional Greenlands System: A Sustainable Natural Environment Legacy
- 2.2 Natural Features: Components of the Greenlands System
- 2.3 Water Systems

Sustainability Benefits of the Regional Greenlands System

Sustainable Natural Environment	Healthy Communities	Economic Vitality
- Provides habitat for plant and animal species - Maintains native biodiversity - Supports species richness and ecosystem complexity - Improves air quality - Contributes to water management - Mitigates the impacts of climate change	- Contributes to liveable neighbourhoods, feeling of well-being, health and quality of life, community identity and sense of place - Provides educational and research opportunities - Provides active and passive recreation for healthier lifestyles	- Encourages eco- and agri-tourism - Enhances property values, creating desirable communities for investment - Helps to prevent disease, resulting in reduced healthcare costs - Reduces infrastructure costs; reduces peak flows and flooding - Helps make York Region an attractive places for businesses

Why a Greenlands System?

Urbanization introduces new stresses on the native plants and animals, and many species which could breed and move freely through a natural or agricultural landscape cannot easily persist in an urban landscape. The ability for plants and animals to migrate, disperse and forage among multiple habitats is critical. A connected system of features and linkages provided by the Regional Greenlands System is essential to preserve the Region’s biota in perpetuity.

The Regional Greenlands System has been assembled with data from the Province, the Toronto and Region Conservation Authority and Lake Simcoe Region Conservation Authority, and local municipal natural heritage studies.

The Regional Greenlands System is composed of cores, corridors, and linkages. Core areas have the highest concentration of significant natural features on the landscape including *significant woodlands and wetlands, Life Science Areas of Natural and Scientific Interest, and Environmentally Significant Areas*. Corridors include existing *significant valleylands*, and watercourses. Linkages connect core areas, and will be enhanced through restoration.

- Regional Greenlands System ecological services include:
- Climate Regulation
 - Water Management
 - Soil Retention
 - Nutrient Cycling
 - Habitat for Flora and Fauna
 - Genetic Resources
 - Recreation
 - Food Production

landscape system that extends across the Greater Toronto and Hamilton Area, Ontario and North America.

The original Regional Greenlands System was established in 1994, and there have been a number of successes in identifying, protecting and securing elements of the System through the Regional Greening Strategy partnerships and programs. The Province’s Oak Ridges Moraine Plan, [and Greenbelt Plan, and Lake Simcoe Protection Plan](#)³ have expanded the System. These policy areas cover 69% of York Region’s land area, and have provided limits to growth and permanent protection for a number of significant natural areas. The focus of this Plan is on connecting and enhancing the Regional Greenlands System through continued partnerships and investment.

The Region’s Greenlands System takes a natural heritage system approach to preserving natural heritage features. This approach reflects current practice in conservation ecology and is supported by the Provincial Policy Statement. The Regional Greenlands System preserves and enhances natural features within a connected natural heritage system.

The primary function [and vision](#)⁴ of the Regional Greenlands System is the protection of natural heritage features in a system of cores connected by corridors and linkages. The Regional Greenlands System also provides opportunities for passive recreation in a future Regional Trails System such as hiking and nature appreciation. Urban uses and infrastructure projects should contribute ecological gains to the Regional Greenlands System through enhancement and restoration, and the strategic creation of natural habitat.

The Regional Greening Strategy implements the vision for the System. The continued successful implementation of this vision lies in creating new and nurturing existing partnerships and seizing every opportunity to invest in enhancing the Greenlands System.

Objective

To identify, protect and enhance the Regional Greenlands System and its functions to ensure a healthy system rich in native biodiversity.

It is the policy of Council:

1. To protect and enhance the Regional Greenlands System and its functions shown on Map 2 and to direct new *development and site alteration* away from the System.
2. That the Regional Greenlands System consists of cores, corridors, and linkages. These include the Oak Ridges Moraine Conservation Plan Natural Core Area and Natural Linkage Area designations, the Natural Heritage System within the Protected Countryside of the Greenbelt Plan, *key natural heritage features, key hydrologic features* and functions, and the lands necessary to maintain these features within a system.
3. That the Regional Greenlands System includes regional linkages and will be the focus of enhancement and land securement initiatives to achieve the Greenlands System Vision identified on Map 2 of this Plan.
4. To require local municipalities to develop local greenlands systems that identify enhancement areas and linkage opportunities and include policies, initiatives, and mapping that protect and complement the Regional Greenlands System.

³ [Proposed Provincial Modification 3](#)

⁴ [Proposed Provincial Modification 4](#)

5. That the Regional Greenlands System on Map 2 includes local municipal greenlands systems schematically. Once approved at a local level, revisions to local greenlands systems will be included within this Plan without amendment.
6. That the boundaries and the extent of the Regional Greenlands System on Map 2 outside of the Oak Ridges Moraine Conservation Plan Area and the Greenbelt Plan Area are approximate. Refinements to the boundaries may occur through periodic updates by the Region which will not require an amendment to this Plan.
7. That the Regional Greenlands System shall be enhanced through Regional greening initiatives, partnerships, infrastructure projects and urban development to achieve ecological gains for the System.
8. That development applications within 120 metres of the Regional Greenlands System shall be accompanied by an environmental impact statement. This statement shall detail the impact of the development on the Regional Greenlands System and shall provide details of enhancement opportunities and any mitigative measures. Within the Oak Ridges Moraine, the Greenbelt and the *Lake Simcoe watershed*⁵, study requirements for *key natural heritage features* and *key hydrologic features* are identified in policy 2.2.19.
9. That in the Urban Area and Towns and Villages, the Regional Greenlands System shall be identified more specifically in local official plans and secondary plans and integrated into community design. These plans shall contain policies and detail initiatives that encourage System remedial works and enhancement opportunities.
10. That in ~~new community areas~~ *the Urban Area*⁶, local official plans shall include policies, programs and initiatives to link and enhance the Regional Greenlands System through community design and the development process. Enhancement opportunities shall be focused on the Natural Heritage System within the Protected Countryside of the Greenbelt.
11. That local greenlands systems within ~~new community areas~~ *the Urban Area*⁷, identified in accordance with policies 2.1.4 and 2.1.10, and shown schematically on Map 2 of this Plan within the Regional Greenlands System, shall be permanently protected from *development* and *site alteration*.
12. That notwithstanding policy 2.1.11, within the Regional Greenlands System ~~in new community areas~~, non-motorized trails, community gardens, passive recreational uses, and new infrastructure required to service the community including stormwater management systems/facilities, water and wastewater systems, and streets shall be permitted ~~within the Regional Greenlands System~~ subject to the policies of the Greenbelt Plan, *where applicable*, and ~~that if~~ no other practical location exists for ~~this infrastructure~~ *these uses*⁸.

Ecological gain means achieving an ecological benefit or improvement in the Regional Greenlands System. This could include improvement in the ecological services or functional capacities, providing trails and passive recreational amenities, or enhancing a degraded part of the System and providing linkages.

Environmental Impact Statement

An environmental impact statement determines the potential impacts, direct and indirect, of a proposed development on the Regional Greenlands System or on a key natural heritage feature or key hydrologic feature and functions.

Key components of an environmental impact statement can include:

- a biophysical inventory and functional analysis
- identification of development constraints and System enhancement opportunities
- an assessment of impacts from the proposed activities
- the analysis of mitigation measures
- the determination of net effects
- the identification of monitoring for developments within and/or adjacent to natural areas or hazards

⁵ Proposed Provincial Modification 64

⁶ Proposed Provincial Modification 5

⁷ Proposed Provincial Modification 6

⁸ Proposed Provincial Modification 7

St. John's Sideroad context sensitive design

There are 32 recreational trails in York Region. These include:

- The Oak Ridges Trail
- The Nokiidaa Trail
- The Sutton-Zephyr Rail Trail
- The Humber Trail
- The Rouge Park Trails Network
- The Bartley Smith Greenway

In addition, there are 120 km of Regional Forest Trails in 18 publicly owned Regional Forest Tracts across the Region

York Region's Greening Strategy

The Regional Greening Strategy has had a number of successes between 2001 and 2008 including:

- Over 750,000 trees and shrubs planted with annual planting numbers ranging from 50,000 to 100,000 trees and shrubs
- Environmental education provided to over 10,000 participants, with approximately 1,000 participating every year
- Partnerships with over 50 government and non-government organizations, stakeholders and community groups
- Public programs and stewardship initiatives, which include support for private rural reforestation projects, urban private-yard tree planting, community engagement, and more

13. To require a ~~Regional~~ Greenlands System Plan as a component of secondary plans ~~within new community areas~~⁹ that is consistent with policy 5.6.14 of this Plan.
14. That infrastructure design and construction be sensitive to the features and functions of the System, and include context sensitive design and innovative technologies to minimize impacts and enhance the Regional Greenlands System. Infrastructure within the Regional Greenlands System should avoid *key natural heritage features* and *key hydrologic features* and shall be subject to the policies of the Oak Ridges Moraine Conservation Plan and the Greenbelt Plan, where applicable.
15. That the planning, design and construction of infrastructure projects shall enhance and invest in the Regional Greenlands System, including providing passive recreational amenities and environmental restoration where appropriate.
16. To undertake land securement, with partners, focused primarily within the Regional Greenlands System. Land securement can include conservation easements, donations, or land purchases, and education and stewardship promotion.
17. That where lands within the Regional Greenlands System are held in private ownership, nothing in this Plan requires that these lands be free and available for public use. Similarly, York Region Council is not obligated to purchase lands identified as part of the Regional Greenlands System.
18. To update the Regional Greening Strategy, including the land securement criteria, to ensure implementation complementary to the policies of this Plan.
19. That land securement initiatives assist in implementing the Regional Greenlands System trails network.
20. To work with local municipalities, conservation authorities and trail organizations on initiatives that contribute to, or complement, the creation of a Regional Greenlands System trails network.
21. That applications for *development* or *site alteration* within the Oak Ridges Moraine will be considered only if they comply with the provisions of the Oak Ridges Moraine Conservation Plan. On the Oak Ridges Moraine the following land use designations and permitted uses apply:
 - a. The Natural Core Area, as identified on Map 1, has a high concentration of *key natural heritage features*, *key hydrologic features*, and/or landform conservation areas and are critical to maintaining and improving the integrity of the Moraine as a whole. New permitted uses are very limited and may include conservation and resource management, low intensity recreation, or agriculture uses, as detailed in the Oak Ridges Moraine Conservation Plan; and,
 - b. The Natural Linkage Area forms part of a corridor system that support or have the potential to support the movement of plants and animals between the Natural Core Area, Natural Linkage Area, river valleys and stream corridors. Limited new uses may include those permitted in the Natural Core Area designation as

⁹ Proposed Provincial Modification 8

24. That outside of the Oak Ridges Moraine and Greenbelt, in the *Lake Simcoe watershed*¹⁰, no new mineral aggregate operations, wayside pits, quarries, ancillary or accessory uses are permitted in *key natural heritage features* or *key hydrologic features* or related *vegetation protection zones*, except as provided in the Lake Simcoe Protection Plan.
25. That local municipalities may *on a one time only basis*¹¹ through an official plan amendment, at the time of a local municipal conformity exercise, refine the boundaries of the Natural Heritage System of the Protected Countryside, consistent with the provisions of the Greenbelt Plan, if the refinement is supported by a comprehensive natural heritage system study. Such refinements may be reflected in this Plan through on-going consolidations without an amendment
26. To examine the feasibility of undertaking studies complementary to the Regional Greenlands System, such as wildlife and terrestrial linkage plans.
27. To work with conservation authorities, local municipalities and the Province in establishing, maintaining and improving a database on the Regional Greenlands System.
28. To work with municipal partners and stakeholders in implementing and monitoring the Rouge North Management Plan.

2.2 Natural Features: Components of the Greenlands System

Key natural heritage features and *key hydrologic features* are the building blocks of York Region's natural systems. Many of these features are cores and corridors and can function as potential linkages.

Key natural heritage features and *key hydrologic features* within York Region are subject to four policy regimes: the Oak Ridges Moraine Conservation Plan, the Greenbelt Plan, the Lake Simcoe Protection Plan and the Provincial Policy Statement. The four policy regimes contain minor differences in terminology. For consistency in terminology, natural features within York Region are identified as "*key natural heritage features*" and "*key hydrologic features*."

Key natural heritage features and *key hydrologic features* can exist within the Regional Greenlands System or outside of the System. Key features within the System are subject to the policies in Section 2.1 and 2.2. Key features outside of the System shall be protected subject to the policies of Section 2.2.

The following sections contain specific requirements for *key natural heritage features* and *key hydrologic features* throughout the Region, including *those within the plan areas of*¹² the Oak Ridges Moraine, Greenbelt and *Lake Simcoe watershed*¹³.

Key Natural Heritage Features and Key Hydrologic Features

Policies of this section identify the *key natural heritage features* and *key hydrologic features* within York Region, and provide general policy requirements for all features. More specific feature policies can be found in the sections following.

¹⁰ Proposed Provincial Modification 64

¹¹ Proposed Provincial Modification 9

¹² Proposed Provincial Modification 10

¹³ Proposed Provincial Modification 64

Objective

To ensure that *key natural heritage features* and *key hydrologic features* and functions are protected and enhanced where possible.

It is the policy of Council:

1. That *key natural heritage features* and *key hydrologic features* within York Region include:
 - a. *significant habitat of endangered species, threatened species and special concern species;*
 - b. *fish habitat;*
 - c. *wetlands;*
 - d. *Life Science Areas and Earth Science Areas¹⁴ of Natural and Scientific Interest;*
 - e. *Environmentally Significant Areas;*
 - f. *significant valleylands;*
 - g. *significant woodlands;*
 - h. *significant wildlife habitat;*
 - i. *sand barrens, savannahs and tallgrass prairies;*
 - j. *lakes and their littoral zones;*
 - k. *permanent and intermittent streams;*
 - l. *kettle lakes;*
 - m. *seepage areas and springs; and,*
 - n. *Lake Simcoe Shoreline.*
2. That *key natural heritage features* and *key hydrologic features* in policies 2.2.1.c through 2.2.1.e, and 2.2.1.j through 2.2.1.l above are shown on Maps 3, 4, ~~5~~¹⁵ and Figure 1 of this Plan.
3. That *key natural heritage features* and *key hydrologic features* in policies 2.2.1.a, 2.2.1.b, 2.2.1.f, 2.2.1.h, 2.2.1.i, 2.2.1.m, and 2.2.1.n, above are not mapped in this Plan. These features shall be identified in accordance with criteria provided by the Province on a site-by-site basis or through the appropriate study such as a watershed plan, environmental impact statement, or natural heritage or hydrological evaluations, prior to undertaking any *development* or *site alteration*.
4. To prohibit *development* and *site alteration* within *key natural heritage features*, *key hydrologic features*, and *adjacent lands*, unless it is demonstrated through a natural heritage evaluation, hydrological evaluation, or environmental impact statement that the *development* or *site alteration* will not result in a negative impact on the feature or its functions.
5. That passive recreational uses, such as trails, may be permitted within *key natural heritage features* and *key hydrologic features* and their associated *vegetation protection zones* subject to the requirements of

¹⁴ [Proposed Provincial Modification 11](#)

¹⁵ [Proposed Provincial Modification 12](#)

policy 2.2.4 of this Plan and the Oak Ridges Moraine Conservation Plan, the Greenbelt Plan, and the Lake Simcoe Protection Plan.

6. To prohibit removal of a *key natural heritage feature* or a *key hydrologic feature* by unauthorized *development* or *site alteration*. Such removal will result in the features and functions being restored to their previous state by the landowner or at their cost.
7. That notwithstanding policy 2.2.4 of this Plan *development* and *site alteration* is not permitted within *fish habitat* except in accordance with federal and provincial requirements.
8. To require local municipalities to identify *key natural heritage features* and *key hydrologic features* or equivalents in local official plans and zoning by-laws, to provide appropriate policies for their protection, including: requirements for environmental impact statements and *vegetation protection zones*; the definition of permitted uses; and to prohibit incompatible uses.
9. That where a *key natural heritage feature* or *key hydrologic feature* crosses the boundaries of the Oak Ridges Moraine, the *Lake Simcoe watershed*¹⁶, or the Natural Heritage System of the Protected Countryside in the Greenbelt, the policies which are most protective of the feature will apply.
10. That the policies of this section must be read in conjunction with the policies of Section 2.1.
11. For lands within the Oak Ridges Moraine Conservation Plan area,¹⁷ to prohibit lands identified on Map 3 as *Environmentally Significant Areas* or *Life Science Areas* of Natural and Scientific Interest from being used for the purpose of a pit or quarry, a wayside pit or quarry, batching/asphalt plants or a new waste disposal site.
12. To co-operate with conservation authorities, the Province and local municipalities in order to further define and better understand *key natural heritage features*, *key hydrologic features* and their functions and to promote improved stewardship and protection strategies.
13. To encourage private and public landowners with lands containing *key natural heritage features* and *key hydrologic features* to manage the lands in a manner that conserves and enhances the features in accordance with the policies of this Plan.

¹⁶ [Proposed Provincial Modification 64](#)

¹⁷ [Proposed Provincial Modification 13](#)

Oak Ridges Moraine, Greenbelt, and *Lake Simcoe Watershed*¹⁸ Features

The Province has established specific policies for the protection of *key natural heritage features* and *key hydrologic features* in the Oak Ridges Moraine Conservation Plan, the Greenbelt Plan, and the Lake Simcoe Protection Plan.

A Natural Heritage System has been identified for the Protected Countryside of the Greenbelt Plan. Only *key natural heritage features* within this Natural Heritage System are protected by the policies of the Greenbelt Plan. All *key hydrologic features* are protected by the policies of the Greenbelt Plan regardless of their inclusion within this Natural Heritage System.

This section of this Plan addresses the protection requirements for these three Provincial Plans.

Objective

To ensure that the *key natural heritage features* and *key hydrologic features* on the Oak Ridges Moraine, Greenbelt, and the *Lake Simcoe Watershed*¹⁹ are protected in accordance with Provincial Plans.

It is the policy of Council:

14. That notwithstanding policy 2.2.4 of this Plan, *development* or *site alteration* is not permitted in, *key natural heritage features* and *key hydrologic features* or associated *vegetation protection zone* on the Oak Ridges Moraine, in the Greenbelt, and in the *Lake Simcoe watershed*²⁰, except as provided in the Oak Ridges Moraine Conservation Plan, the Greenbelt Plan and the Lake Simcoe Protection Plan.
15. That on the Oak Ridges Moraine, or in the *Lake Simcoe watershed*²¹ outside of existing settlement areas as defined by the Lake Simcoe Protection Plan, the minimum *vegetation protection zone* for *key natural heritage features* and *key hydrologic features* is 30 metres, or as required by the Oak Ridges Moraine Conservation Plan.
16. That the minimum *vegetation protection zone* for the Lake Simcoe Shoreline outside of existing settlement areas as defined by the Lake Simcoe Protection Plan shall be 100 metres.
17. That significant alteration of the Lake Simcoe Shoreline or the shore of a fresh water estuary of a stream connected to Lake Simcoe is not permitted except as provided in the Lake Simcoe Protection Plan.
18. That within the Natural Heritage System of the Protected Countryside of the Greenbelt Plan, the minimum *vegetation protection zone* shall be a minimum of 30 metres for *wetlands, seepage areas and springs, fish habitat, permanent and intermittent streams, lakes, and significant woodlands*.
19. That applications for *development* or *site alteration* shall be supported by a natural heritage and/or hydrological evaluation as detailed in the Oak Ridges Moraine Conservation Plan, the Greenbelt Plan and the Lake Simcoe Protection Plan, if it occurs:

Oak Ridges Moraine

The Oak Ridges Moraine is one of Ontario's most significant landforms.

Located north of and parallel to Lake Ontario, the Moraine in York Region divides the watersheds draining south into Lake Ontario from those draining north into Lake Simcoe.

The Moraine shapes the present and future form and structure of the Greater Toronto Region. The Moraine's ecological and hydrological features and functions are critical to the Region's continuing health.

Lake Simcoe Shoreline Settlement Areas within Georgina include:

- Sutton
- Keswick
- Pefferlaw
- Hamlet of Virginia
- Serviced Lakeshore Residential
- Moores Beach
- McRae Beach
- Duclos Point

¹⁸ [Proposed Provincial Modification 64](#)

¹⁹ [Proposed Provincial Modification 64](#)

²⁰ [Proposed Provincial Modification 64](#)

²¹ [Proposed Provincial Modification 64](#)

Existing Settlement Area – Lake Simcoe Protection Plan

Existing Settlement Areas subject to the Lake Simcoe Protection Plan are defined by the community plan boundaries that existed on June 2, 2009 for the following communities: Keswick, Sutton, Pefferlaw, Holland Landing, Sharon, Queensville, Aurora and Newmarket.

- a. within 120 metres from a *key natural heritage feature* or *key hydrologic feature* anywhere within the Oak Ridges Moraine;
 - b. within 120 metres of a *key natural heritage feature* within the Natural Heritage System of the Protected Countryside of the Greenbelt Plan;
 - c. within 120 metres of a *key hydrologic feature* anywhere within the Protected Countryside of the Greenbelt Plan;
 - d. within 120 metres of *key natural heritage features* or *key hydrologic features* within the *Lake Simcoe watershed*²² outside of existing settlement areas, as defined by the Lake Simcoe Protection Plan; or,
 - e. within 120 metres of the Lake Simcoe Shoreline and built up areas, as defined by the Lake Simcoe Protection Plan, unless otherwise specified by the Lake Simcoe Protection Plan.
20. That an application for *development* or *site alteration* in the *Lake Simcoe watershed*²³ that is within 120 metres of a *key natural heritage feature*, a *key hydrologic feature* or the Lake Simcoe Shoreline outside of existing settlement areas as defined by the Lake Simcoe Protection Plan, shall provide for the establishment or re-establishment and maintenance of natural self sustaining vegetation.
21. That outside *existing*²⁴ settlement areas as defined by the Lake Simcoe Protection Plan, a proposal for *development* or *site alteration* within 240 metres of the Lake Simcoe Shoreline must demonstrate that it will maintain, enhance or restore functional wildlife movement corridors between *key natural heritage features* or *key hydrologic features*.
22. That within the *Lake Simcoe watershed*²⁵, an application for *development* or *site alteration* within settlement and rural settlement areas, as defined by the Lake Simcoe Protection Plan, where applicable, shall:
- a. increase or improve *fish habitat* in streams, lakes and *wetlands*, and any adjacent riparian areas;
 - b. include landscaping and habitat restoration that increases the ability of native plants and animals to use valleylands or riparian areas as wildlife habitat and movement corridors;
 - c. seek to avoid, minimize and/or mitigate impacts associated with the quality and quantity of urban run-off into receiving streams, lakes and *wetlands*; and,
 - d. establish or increase the extent and width of a self sustaining *vegetation protection zone* adjacent to Lake Simcoe to a minimum of 30 metres where feasible.
23. That minor refinements to the extent or presence of *key natural heritage features* and *key hydrologic features* resulting from site specific studies conducted in accordance with the requirements in the Oak Ridges Moraine Conservation Plan, the Greenbelt Plan, the Lake Simcoe Protection Plan and updated information from the Province or the

²² [Proposed Provincial Modification 64](#)

²³ [Proposed Provincial Modification 64](#)

²⁴ [Proposed Provincial Modification 14 \(Plus 'Existing Settlement Area' Sidebar\)](#)

²⁵ [Proposed Provincial Modification 64](#)

appropriate conservation authority, will not require an amendment to this Plan.

However, where there is a boundary refinement to a *wetland*, *Life Science Area of Natural and Scientific Interest*, *Earth Science Area of Natural or Scientific Interest*²⁶ or significant habitat of endangered, or threatened species, confirmation will be required from the Province prior to any *development* or *site alteration* occurring in these areas. In regard to minor changes to *Environmentally Significant Areas*, approval will be required by the appropriate conservation authority.

24. That *Environmentally Significant Areas* on the Oak Ridges Moraine or within the Natural Heritage System of the Protected Countryside of the Greenbelt Plan, which have been identified by a conservation authority, are also considered to be *key natural heritage features*, subject to the same requirements for protection and study as those identified in the Oak Ridges Moraine Conservation Plan and Greenbelt Plan for Life Science Areas of Natural and Scientific Interest.
25. That within the Oak Ridges Moraine Conservation Plan, and the Greenbelt Plan Areas, no new *agricultural uses*, *agriculture-related uses*, or accessory uses shall be permitted within *key natural heritage features* and *key hydrologic features* and their associated minimum *vegetation protection zone* if the lands were not being used for that use on November 15, 2001, and February 28, 2005 respectively.
26. That in the Urban Area and Towns and Villages, as designated on April 22, 2002, where secondary plans, official plans, zoning by-laws, or Master Environmental Servicing or Functional Servicing Plans are approved based on environmental studies that have identified minimum *vegetation protective zones* that are different from those identified in the Oak Ridges Moraine Conservation Plan, then the standards established within those plans shall prevail.
27. That in the Urban Area, Towns and Villages, and Hamlets designated on February 28, 2005, where secondary plans, official plans, zoning by-laws, or Master Environmental Servicing or Functional Servicing Plans are approved based on environmental studies that have identified minimum *vegetation protective zones* that are different from those identified in the Greenbelt Plan, then the standards established within those plans shall prevail.
28. That every application for *development* or *site alteration* on the Oak Ridges Moraine shall identify planning, design and construction practices that ensure that no buildings or other *site alterations* impede the movement of plants and animals between *key natural heritage features*, *key hydrologic features* and *adjacent lands* within the Natural Core Area and the Natural Linkage Area as identified on Map 1.
29. That the technical papers associated with the Oak Ridges Moraine Conservation Plan, *Lake Simcoe Protection Plan*²⁷ and the Greenbelt Plan be consulted to provide clarification in implementing the policies related to *key natural heritage features* and *key hydrologic features* within the Provincial Plans. In the event of a conflict in the interpretation of the

Monarch Butterfly (special concern)

Red Headed Woodpecker
(special concern)

Species at Risk in Ontario List Categories

- **EXTIRPATED** - a native species that no longer exists in the wild in Ontario, but still exists elsewhere
- **ENDANGERED** - a native species facing extinction or extirpation
- **THREATENED** - a native species at risk of becoming endangered in Ontario
- **SPECIAL CONCERN** - a native species that is sensitive to human activities or natural events which may cause it to become endangered or threatened

Butternut Tree (endangered)

provincial technical papers and the policies of this Plan, the policy which is more protective of the feature will apply.

Endangered, Threatened and Special Concern Species and their Habitats

Habitats of endangered, threatened and special concern species contain species that have been listed by the Province as occurring in significantly low population numbers, restricted geographic areas, or are threatened by human activities that their continued presence in Ontario is a matter of conservation concern. The actual species falling into categories of threatened or endangered vary from region to region throughout the Province, and can change over time.

Endangered, threatened and special concern species are listed in regulations under the Endangered Species Act. Current lists of endangered, threatened, and species of special concern are designated by the Committee on the Status of Species at Risk in Ontario and are placed on the Species at Risk in Ontario List regulation.

Objective

To protect endangered, threatened and special concern species and their habitats to ensure that biological diversity within the Region is not diminished.

It is the policy of Council:

30. That notwithstanding policy 2.2.4 of this Plan, *development* and *site alteration* is not permitted within the habitat of endangered or threatened species, as identified on the Species at Risk in Ontario List.
31. That within the Oak Ridges Moraine and the Natural Heritage System of the Protected Countryside of the Greenbelt, notwithstanding policy 2.2.4, and 2.2.30 of this Plan, *development* and *site alteration* is not permitted within the habitat of endangered, threatened, or special concern species as identified on the Species at Risk in Ontario [List and Provincially rare species on the Oak Ridges Moraine](#).
32. To encourage private land stewardship which protects and enhances the habitat of threatened, endangered and special concern species.
33. To work with the Province, as appropriate, on the preparation of recovery strategies or management plans for endangered, threatened, and special concern species in York Region.

Wetlands

Wetlands are essential natural elements of the Regional ecosystem, providing environmental, economic and social benefits. These lands, which are seasonally or permanently covered by shallow water or where the water table is close to or at the surface, are characterized by hydric soils and hydrophytic or water-tolerant plants. Among other functions, wetlands control and store surface water to assist in flood control and groundwater recharge. Wetlands also act as sediment traps to improve water quality and act as habitat for a wide variety of plant and animal species.

The Province has enacted a policy statement under the Planning Act that prohibits development in provincially significant wetlands. Other wetlands that have not been identified as provincially significant, but which have been formally evaluated by the Ministry of Natural Resources, also exist within the Region. Map 4 shows the general location of all evaluated wetlands, as well as identified wetlands within the Oak Ridges Moraine, Greenbelt, and [Lake Simcoe](#)

watershed²⁸. More detailed information, as well as more recent wetland evaluations are available from the Province.

Objective

To ensure no loss of wetland function or area in the Region.

It is the policy of Council:

34. To prohibit *development* or *site alteration* within wetlands ~~as shown on Map 4²⁹~~, notwithstanding policy 2.2.4 of this Plan, and to require a minimum *vegetation protection zone* of 30 metres from any part of the feature.
35. To permit *development* or *site alteration* in accordance with other policies of this Plan within 120 metres of wetlands, but not within the 30-metre minimum *vegetation protection zone*, only if it does not result in any negative impacts to the feature or its ecological function, such as of the following³⁰:
 - a. loss of *wetland* function, including management of water balance;
 - b. demand for future development that will negatively affect existing *wetland* functions;
 - c. conflict with existing site-specific *wetland* management practices; or,
 - d. loss of contiguous *wetland* area.
36. To encourage local municipalities, public agencies and private landowners to protect *wetlands*, ~~not identified in this Plan, and~~ to create new *wetlands* or enhance and to restore³¹ existing *wetlands* where appropriate.
37. Prior to development or site alteration approval, non-evaluated wetlands that may be impacted shall be assessed for their significance.³²
- ~~37-38.~~ That boundary refinements or reclassification of existing evaluated *wetlands* by the Province will not require an amendment to Map 4 of this Plan. Where new evaluated *wetlands* are identified by the Province, the Region will periodically amend this Plan to include updated information.

Typical Wetland

Formatted: Bullets and Numbering

Formatted: Bullets and Numbering

Woodlands

Woodlands are significant components of York Region's natural systems and provide a variety of important environmental, social and economic benefits. These benefits include clean air and water, erosion prevention, water retention, provision of wildlife habitat, recreation and the sustainable harvest of woodland products.

At the time of settlement by Europeans, woodlands covered 90% of the Region. Woodland cover has dwindled to 22.5% today. Because much of the remaining woodland cover is fragmented and lacking in interior habitat areas, maintaining

²⁸ Proposed Provincial Modification 64

²⁹ Proposed Provincial Modification 17

³⁰ Proposed Provincial Modification 18

³¹ Proposed Provincial Modification 19

³² Proposed Provincial Modification 26

and enhancing *significant woodlands* and integrating them into the Region's communities is extremely important.

York Region has a Forest Conservation By-law that restricts and regulates the removal of trees on private lands through the issuance of permits. There are many tools available to private landowners to assist in the sustainable management of woodlands, including the Managed Forest Tax Incentive Program and the Ontario Stewardship Program.

York Region manages 21 Regional Forest tracts, totalling over 2,200 hectares. These areas undergo silvicultural management (tree planting, tending and harvesting activities) and hazard tree management, and are important for educational initiatives. The York Regional Forest is the first publicly owned forest in Canada to be certified by the Forest Stewardship Council. This third party audit process ensures that the Region is maintaining the forest in a sustainable manner.

The policies of this section of this Plan are supported by the York Region Significant Woodlands Study. This section provides policies for the identification, management and improvement of woodlands to ensure that the Region will maintain or increase the area of woodlands, have woodlands in the future that support greater biodiversity, and that the Region will continue to recognize the importance of the urban forest.

Objective

To protect *significant woodlands* and their biodiversity and encourage reforestation to provide environmental, social and economic benefits for the residents of York Region.

It is the policy of Council:

~~38-39.~~ To increase woodland cover to a minimum of 25% of the Region's total land area.

~~39-40.~~ That *significant woodlands*, include any *woodland* meeting one of the following criteria:

- a. contains *globally or provincially rare plants, animals or communities* as designated by the Natural Heritage Information Centre;
- b. contains species designated by the Committee on the Status of Endangered Wildlife in Canada or by the Committee on the Status of Species at Risk in Ontario as threatened, endangered, or of special concern;
- c. is within 30 metres of a *key hydrologic feature*;
- d. is over 2 hectares and:
 - i. is within 100 metres of another *key natural heritage feature* ~~or key hydrologic feature~~ or,
 - ii. occurs within the Regional Greenlands System.
- e. is south of the Oak Ridges Moraine and is 4 hectares or larger in size;
- f. is north of the Oak Ridges Moraine and is 10 hectares or larger in size; ~~or,~~
- g. on the Oak Ridges Moraine the *woodland* will be evaluated for significance based on the requirements of the Oak Ridges Moraine Conservation Plan and associated technical papers; ~~or,~~

York Region Continues to Work Towards 25% Woodland Cover

Since 2001, York Region has been working to increase forest cover through initiatives including:

- the York Natural Planting Partnership, delivered by the Conservation Authorities, which provides subsidized tree planting on private lands
- support of community naturalization initiatives on public and private land
- large-scale reforestation of public lands (e.g., Rouge Park)
- acquiring strategic lands for reforestation

Reforestation of existing public lands will help achieve a portion of the Region's woodland cover target. Private land reforestation and stewardship are essential to achieving this target.

Format
Bullets
and
Number

h. on lands in the Greenbelt Natural Heritage System, the woodland will be evaluated for significance based on the requirements of the Greenbelt Plan and associated technical papers.³³

Formatted: Bullets and Numbering

~~40-41.~~ That Map 5 identifies woodlands that may be significant based on available information and data. Due to the scale of the mapping in this Plan, the extent of the significant woodland coverage may not be clearly visible on Map 5. This mapping at a larger scale is available from York Region.

Formatted: Bullets and Numbering

~~41-42.~~ That site specific studies can be used to determine or verify the significance of woodlands. An amendment to this Plan shall not be required if a site specific study determines that a woodland does or³⁴ does not meet any of the criteria identified in policy 2.2.39 of this Plan.

~~42-43.~~ That outside of the Oak Ridges Moraine, Greenbelt, and the Lake Simcoe watershed³⁵, a minimum vegetation protection zone of 10 metres shall be provided from the dripline of a significant woodland. Vegetation protection zone requirements within the Oak Ridges Moraine, Greenbelt, and the Lake Simcoe watershed³⁶ are detailed in policies 2.2.15 and 2.2.18 of this Plan.

Good Forestry Management is the proper implementation of woodland harvest, renewal and maintenance activities which are known to be appropriate for the forest and environmental conditions under which they are being applied. These practices minimize injury to significant ecosystems, important fish and wildlife habitat, soil and water quality and quantity, forest productivity and health, and the aesthetic and recreational values.

~~43-44.~~ To prohibit development and site alteration within significant woodlands and their associated vegetation protection zone notwithstanding policy 2.2.4 of this Plan.

~~45.~~ Notwithstanding policy 2.2.39, a woodland would not be considered significant, and development and site alteration may be permitted within all or part of the woodland, if all of the following are met:

Formatted: Bullets and Numbering

- a. The woodland is located within the urban area and/or within the "existing settlement area" in the Lake Simcoe Protection Plan, and is outside of the Oak Ridges Moraine Conservation Plan and Greenbelt Plan areas;
- b. The woodland is considered to be early successional;
- c. The woodland is dominated by invasive non-native tree species where nature tree species cover less than 10% of the ground and are represented by less than 100 stems of any size per hectare;
- d. The woodland does not include criteria in policies 2.2.39.a and 2.2.39.b of this Plan;
- e. The woodland is not located within the Regional Greenlands System and/or similar Greenlands system determined by the local municipality;
- f. Development or site alteration within all or part of the woodland does not affect the ability of the retained portion of the woodland and/or adjacent woodlands to remain significant in accordance with criteria in policy 2.2.39 of this Plan.³⁷

³³ Proposed Provincial Modification 20

³⁴ Proposed Provincial Modification 21

³⁵ Proposed Provincial Modification 64

³⁶ Proposed Provincial Modification 64

³⁷ Proposed Provincial Modification 22

Urban Forest Effects Model, also known as "UFORE", is an evaluation tool that can be used in urban forest management to measure the type, value and extent of the economic and environmental benefits of the urban forest. Urban forests provide more than aesthetic values, they assist in increasing energy efficiency and pollution abatement. The data generated from the Urban Forest Effects Model analysis is key to an urban forest management plan.

~~44. That notwithstanding policy 2.2.43 of this Plan, in order to integrate the Regional Greenlands System enhancement objectives with the intensification and compact community design objectives of this Plan, development and site alteration may be permitted within part or all of a significant woodland if all of the following are met:~~

- ~~a. the woodland is located in the Urban Area;~~
- ~~b. the woodland is located in an area strategic to the achievement of the community objectives of Sections 5.2 and 5.6 of this Plan or is identified within an intensification area detailed in a local municipal intensification strategy, and is evaluated through a secondary plan process, or other appropriate study;~~
- ~~c. the woodland does not meet criteria in policies 2.2.39.a and 2.2.39.b of this Plan;~~
- ~~d. the woodland is outside of the Regional Greenlands System;~~
- ~~e. the woodland is a cultural community; and,~~
- ~~f. development or site alteration within part or all of the woodland does not affect the ability of a retained portion of the woodland and/or adjacent woodlands to remain significant in accordance with the criteria in policy 2.2.39 of this Plan.~~

46. If a woodland is deemed to not be significant in accordance with policy 2.2.44, a woodland compensation plan and where applicable, a Regional Greenlands System Enhancement Plan shall be completed to the satisfaction of York Region. Woodland enhancement will provide ecological gains in areas on or adjacent to the site or in areas within the Regional Greenlands System and/or similar local municipal Greenlands System. Through the implementation of the compensation/enhancement plan, the Regional Greenlands System, intensification and compact community design objectives of this Plan shall be met.³⁸

~~45. That should policy 2.2.44 apply, a woodland compensation plan shall be completed to the satisfaction of York Region. Woodland compensation will provide ecological gains to the Regional Greenlands System in new community areas or adjacent areas.~~

- 47. That local municipalities shall develop an Urban Forest Management Plan, together with York Region that may include additional locally significant woodlands.
- 48. That York Regional Forests shall be sustainably managed in a manner that enhances their ecological, educational and recreational functions to ensure their health in perpetuity.
- 49. To encourage and work with the Province and other stakeholders involved in woodlands management, to maintain and enhance publicly and privately owned forested lands, and to encourage landowners through stewardship initiatives, to use good forestry practices.

Landform Conservation

Significant landscapes exist throughout York Region, providing scenic views and vistas, and a sense of place. Such significant landscapes include many portions of the Oak Ridges Moraine, the former Lake Algonquin shoreline, major river valleys, Earth Science Areas of Natural and Scientific Interest and the Lake Simcoe shoreline.

³⁸ Proposed Provincial Modification 23

Landform features help define the Regional character and play a vital role in surface and groundwater hydrology, biodiversity, and micro climate. The policies of this Plan encourage appropriate treatment of these areas during development and incorporate these features into the Regional Greenlands System.

Objective

To encourage and support the conservation of significant landscapes, views and vistas.

It is the policy of Council:

- ~~49-50.~~ To encourage the protection of significant landscapes in a manner compatible with surrounding lands, and minimize the disruption and destruction of landscape features caused by extensive land alteration activities including mass grading, locating and constructing streets, pipelines and transmission lines.
- ~~50-51.~~ To prohibit *site alteration* prior to the approval of development applications, and to require local municipalities to adopt *site alteration* by-laws in conformity with the Municipal Act and the Lake Simcoe Protection Plan to prevent runoff, sedimentation, and the removal of topsoil or vegetation, and to control erosion.
- ~~51-52.~~ That landform conservation areas within the Oak Ridges Moraine are shown on Figure 1. Figure 1 is to be consulted whenever *development* or *site alteration* is proposed to determine whether the landform conservation policies of this Plan and the Oak Ridges Moraine Conservation Plan apply.
- ~~52-53.~~ That within the Oak Ridges Moraine, applications for *development* or *site alteration* in a landform conservation area shall be accompanied by the appropriate study as required by the Oak Ridges Moraine Conservation Plan. Planning, design and construction practices for any *development* or *site alteration* are required to satisfy the Oak Ridges Moraine Conservation Plan.
- ~~53-54.~~ To require local municipalities to incorporate the Oak Ridges Moraine landform conservation mapping and policies into local official plans. Policies in the local plans shall require that applications for *development* or *site alteration* in a landform conservation area identify planning, design and construction practices that will keep disturbance to landform character to a minimum, subject to the requirements established in the Oak Ridges Moraine Conservation Plan. Local municipalities are also encouraged to consider the need for landform conservation planning outside of the Oak Ridges Moraine.
- ~~54-55.~~ That mineral aggregate operations are exempt from certain landform conservation requirements in accordance with the Oak Ridges Moraine Conservation Plan.
- ~~55-56.~~ That in considering *development* and *site alteration* applications in the Urban Area and Towns and Villages, local municipalities shall consider the importance of adopting planning, design and construction practices that will keep disturbance of landform character to a minimum, so as to satisfy the requirements of the Oak Ridges Moraine Conservation Plan.

Formatted: Bullets and Numbering

York Region's water strategies include the York Region Water and Wastewater Master Plan, watershed plans prepared with our partner conservation authorities, as well as groundwater and stream studies.

The York Region Water and Wastewater Master Plan's action areas address:

- the provision of safe and clean drinking water
- healthy watersheds
- respect for natural and cultural heritage
- the wise use of water
- community well-being
- full and equitable funding and value for money
- timely and integrated service delivery
- climate change and energy efficiency
- communications, consultation and engagement
- monitoring, performance measurement and adaptive management

~~56-57.~~ That applications for *development* and *site alteration* in an *Earth Science Area of Natural and Scientific Interest* on ~~Map 3~~ ~~Figure 1~~³⁹, or within the related minimum area of influence, shall be accompanied by an earth science heritage evaluation that meets the requirements of the Oak Ridges Moraine Conservation Plan.

58. That where a site is subject of a fill permit by the local municipality, the landowner may be required to provide financial guarantees to ensure groundwater or adjacent Regional or private well supplies will not be contaminated. Further, the landowner shall be required to retain an on-site environmental inspector to ensure that all fill materials are appropriate.⁴⁰

and
Number

2.3 Water Systems

York Region's water systems and key hydrologic functions include underground aquifers as well as rivers, streams, ponds, wetlands and lakes, including Lake Simcoe. Although Lake Ontario is not located in York Region, rivers and drinking and wastewater systems connect the Region to the lake. These systems are part of the hydrological cycle and interact through rain, runoff, percolation and evaporation. These systems are not static, but are constantly evolving and changing elements of a broader ecosystem and can continue to be a sustainable, renewable resource for the Region if protected, conserved and enhanced.

Groundwater is important as a supply of drinking water, and provides significant quantities of cool water to the Region's streams and rivers as base flow. Water systems play a crucial role in ecological function and are also important for recreation, agriculture and industrial purposes.

River drainage basins, known as watersheds, provide an ecological basis for the protection of land and water resources. This Plan recognizes the watershed as the basic ecological unit upon which planning should be based. The Oak Ridges Moraine is the origin of headwaters for the watersheds in York Region, and is also a significant source of groundwater recharge and discharge.

Water balance must be managed to maintain the ecological integrity of *key hydrologic features* and hydrologic function. Changes in land use must take into account immediate impacts and cumulative changes to watersheds, and off-site impacts, such as increased stormwater runoff or water contamination.

Because water resources are part of a more complex system and are essential to ecosystem and human function, policies relating to water resources are also contained elsewhere in this Plan, specifically Chapters 5 and 7. These chapters collectively articulate the Region's objectives for water resources.

Objective

To maintain and enhance water system health to ensure water quality and quantity, and to maintain the natural hydrologic function of water systems.

It is the policy of Council:

1. To prepare a Regional water strategy for both piped services and surface and groundwater sources that will include long term protection and conservation strategies, enhancement guidelines and monitoring requirements for streams, lakes, wetlands, groundwater, kettle lakes, Lake Simcoe, and other natural aquatic systems.

³⁹ [Proposed Provincial Modification 24](#)

⁴⁰ [Proposed Provincial Modification 25](#)

2. That the natural quality and hydrological characteristics of watercourses and lakes, including aquatic habitat, base flow, water quality, temperature, storage levels and capacity, will be maintained, and that *development* be designed with the goal of maintaining water balance.
3. To maintain linkages and related functions among surface water features, ground water features, hydrologic function and natural heritage features.
4. To direct *development* away from *sensitive surface water features* and *sensitive groundwater features*.
5. That notwithstanding policy 2.3.4, an application for major development within a **significant groundwater recharge area** shall be accompanied by an environmental impact study that demonstrates that the quality and quantity of groundwater recharge areas will be protected and enhanced.
6. To amend mapping and policies in this Plan when significant recharge areas or vulnerable aquifer areas are identified.
7. To prepare source water protection plans with the Province, local municipalities, and conservation authorities to protect the quality and quantity of Regional water supply from incompatible uses and sources of contamination.
8. To continue to partner with the Regions of Peel and Durham, the City of Toronto and the conservation authorities to study, analyze and monitor groundwater and surface water resources to ensure a unified approach to protecting and enhancing water quality and quantity.
9. To monitor the quantity and quality of surface water and groundwater systems in York Region, in co-operation with local municipalities and conservation authorities, by:
 - a. assessing the sustainability of current activities and land uses; and,
 - b. identifying those areas that are susceptible to, or currently experiencing, water quality and quantity problems.
10. To protect and enhance aquatic habitats, including fish and wildlife habitats, in co-operation with the Province and conservation authorities through the implementation of Fisheries Management Plans, watershed plans and other resource management plans.
11. To require local municipalities to establish policies and programs to protect, enhance and monitor water systems.
12. To work with the Province, local municipalities, conservation authorities and other relevant agencies in establishing procedures for water taking permits that protect and enhance water resources.

THE HYDROLOGICAL CYCLE

Lake Simcoe Protection Plan policies are dispersed throughout this Plan, specifically within the following sections:

- 2.1 Regional Greenlands System: A Sustainable Natural Environment Legacy
- 2.2 Natural Features: Components of the Greenlands System
- 2.3 Water Systems
- 6.4 Rural Area
- 6.5 Mineral Aggregate Resource Areas
- 7.3 Water and Wastewater Servicing
- 8.3 The Planning Process

Approved Floodplain Special Policy Areas in York Region

- Woodbridge Special Policy Area
- Unionville Special Policy Area
- Lake Wilcox Special Policy Area
- Schomberg Special Policy Area

13. To require the preparation of comprehensive master environmental servicing plans as part of secondary plans to protect and enhance the natural hydrologic function of water systems. Such plans will emphasize water conservation and reuse, and will incorporate innovative technologies with a goal that water balance and hydrologic functions will be maintained.
14. To encourage agricultural land management practices that minimize the application of pesticides and nutrients.

Lake Simcoe Protection Plan

The Province has released the Lake Simcoe Protection Act, 2008 and the Lake Simcoe Protection Plan to restore and protect the ecological health of the lake. The Lake Simcoe Plan is a watershed-based plan to improve the quality of the water in the lake, protect the watershed's natural heritage resources, and manage the effects of climate change and invasive species.

This Plan recognizes the importance of restoring and protecting the health of Lake Simcoe and includes relevant policies of the Lake Simcoe Protection Plan.

Objective

To protect and restore the ecological health of Lake Simcoe, consistent with the provisions of the Lake Simcoe Protection Plan.

It is the policy of Council:

15. To work with the Province, local municipalities, conservation authorities and other agencies to implement the Lake Simcoe Protection Plan.
16. To work with the Province, local municipalities, conservation authorities and other agencies to develop and support monitoring programs, identify emerging issues, support the adaptive management approach of the Lake Simcoe Protection Plan and to develop a phosphorus reduction strategy for the *Lake Simcoe watershed*⁴¹.
17. To amend this Plan as necessary to ensure consistency with the recommendations of Lake Simcoe subwatershed evaluations and shoreline management strategy.

Natural Hazards

Natural hazards such as flooding, erosion, unstable soils and slope failures pose a risk to human health and safety, as well as property. It is important to reduce the potential risks and costs associated with natural hazards by ensuring that development is directed away from these areas.

Objective

To minimize risks to human health and safety and property associated with natural hazards.

It is the policy of Council:

18. To direct *development* and *site alteration* away from hazardous lands and hazardous sites, including lands adjacent to rivers, streams or inland lake systems.
19. To support conservation authorities in the management of floodplain areas and *Special Policy Areas*. ~~Special Policy Areas may be used only with provincial approval.~~ The identification of a new Special Policy Area

⁴¹ Proposed Provincial Modification 64

and any change or modification to the site specific policies, designation or boundaries applying to an existing *Special Policy Area* shall be approved by the Province, prior to the approval authority issuing its approval.⁴²

20. That *development* be planned and designed to minimize flooding impacts.
21. That *development* and *site alteration* are generally prohibited within defined portions of the floodplain, subject to conservation authority regulations.
22. To prohibit new lot creation in hazardous lands and hazardous sites.
23. To require setbacks, buffers and/or access allowance from hazardous lands and hazardous sites based on a minimum buffer defined by the local municipality in consultation with the Conservation Authority, or such greater distance as may be determined through a geotechnical study or to conform to provincial regulations.
24. To require that hazardous lands and hazardous sites be dedicated to public agencies through the development approvals process.
25. To require local official plans and zoning by-laws to contain appropriate mapping and policies to:
 - a. identify floodplain, hazardous lands, hazardous sites and regulated lands;
 - b. identify permitted uses and minimum setbacks or buffers;
 - c. regulate land use within and adjacent to hazardous lands and hazardous sites; and,
 - d. identify approved Special Policy Areas and include their associated site specific policies related to development and redevelopment.
26. To work with conservation authorities and local municipalities to update floodplain, hazardous lands and hazardous sites mapping.
27. To work with local municipalities and conservation authorities to prepare for climate change impacts by ensuring public health and safety, infrastructure security, emergency services, and that evacuation routes are maintained during flood events.
28. That emergency management plans be updated regularly and reflect disaster response best practices for severe weather events, including flooding.
29. To work with local municipalities, conservation authorities and other partners to ensure that climate change effects are considered in flood management and natural heritage areas.
30. To work with the Lake Simcoe Region Conservation Authority, local municipalities, and the agricultural industry within the Holland Marsh to ensure floodplain management for *development* and *site alterations*.

Hazard Land Cross-Section

⁴² Proposed Provincial Modification 27

31. To work with the conservation authorities and local municipalities to ensure floodplain management for *development* and *site alterations*.

Watershed Planning

Watershed plans emphasize the importance of managing both ground and surface water systems in a comprehensive way that support more sustainable land use planning decisions. This is particularly important in new and intensifying areas of growth. The Region works closely with the Toronto and Region Conservation Authority and the Lake Simcoe Region Conservation Authority in the preparation of watershed plans for York Region.

Objective

To protect and enhance water resources through the implementation of watershed plans.

It is the policy of Council:

32. That the goals and objectives of watershed plans shall be supported through the implementation of this Plan and local official plans.
33. To work in partnership with local municipalities, conservation authorities, adjacent municipalities and other agencies to co-ordinate watershed planning initiatives and implement watershed plan objectives that:
 - a. protect and enhance river system function, linkages and sensitivities;
 - b. achieve water quality and quantity objectives for the watershed in the Urban Area ~~and new community areas~~⁴³;
 - c. address the long term cumulative impact of *development* on the watershed through regular monitoring, reporting and adaptive management as necessary;
 - d. protect and enhance existing geology, hydrology, hydrogeology, limnology, aquatic and terrestrial habitats and the quality, quantity and function of groundwater recharge areas;
 - e. provide guidelines for sustainable development, design and construction; and,
 - f. provide retrofits of existing neighbourhoods to ensure better hydrologic function.
34. To increase public awareness, foster stewardship and the understanding of watershed health and protection in partnership with local municipalities, conservation authorities and other stakeholders.
35. That *major development* on the Oak Ridges Moraine shall conform with the applicable watershed plan.

Stormwater Management

Stormwater is the runoff that occurs in urbanized areas, increasing downstream watercourse erosion, pollution and increased water temperatures. Stormwater can intensify flooding during storm events. Stormwater should be managed as a resource. The use of sustainable stormwater planning and practices will help ensure the continued health of the streams, rivers, lakes, fisheries and terrestrial habitats in our watersheds.

⁴³ [Proposed Provincial Modification 28](#)

Objective

To ensure the careful management of stormwater through the use of innovative techniques.

It is the policy of Council:

36. To work in partnership with local municipalities, the Province, conservation authorities and other agencies in the implementation of stormwater management initiatives.
37. To require the preparation of comprehensive master environmental servicing plans as a component of secondary plans and major development or re-development to minimize stormwater volume and contaminant loads, and maximize infiltration through an integrated treatment approach, which may include techniques such as rainwater harvesting, runoff reduction of solids and materials at source, phosphorus reduction, constructed wetlands, bioretention swales, green roofs, permeable surfaces, clean water collection systems, and the preservation and enhancement of native vegetation cover.
38. That owners and operators of stormwater management works inspect, maintain and monitor effluent quality on a periodic basis.
39. To work with local municipalities and the Lake Simcoe Region Conservation Authority in the preparation and implementation of comprehensive stormwater management master plans for each settlement area within the *Lake Simcoe Watershed*⁴⁴ by June 2014.

⁴⁴ [Proposed Provincial Modification 64](#)

The Stormwater Management Treatment Approach

3. To require high-quality urban design and pedestrian-friendly communities that provide safety, comfort and mobility so that residents can walk to meet their daily needs.
4. To encourage citizen engagement and shared responsibility in decisions affecting individual and community health and well-being.
5. That public health and other human services be incorporated into the design and evaluation of *new community areas* and Regional Centres and Corridors.
6. To work with local municipalities to understand the impacts of climate change on the health and well-being of residents.
7. To design communities to be more resilient to the effects of climate change.
8. To support locally grown and produced agricultural products.
9. To encourage a strong sense of community and belonging through volunteerism.
10. To support local municipal dark sky or light pollution abatement initiatives and investigate the creation of Regional light pollution abatement standards.

3.2 Air Quality and Climate Change

The release of air pollutants and greenhouse gases into the atmosphere contributes to poor air quality, with far-reaching impacts on health and the environment. Human activities and the use of fossil fuels for transportation, manufacturing, electricity generation, heating, and cooling contribute to climate change.

Climate change has significant implications for services that York Region provides. As our climate continues to change and the Region continues to grow, more people, property and infrastructure will be at risk, including air quality, water, wastewater, transportation, energy, and healthcare systems, and emergency response capabilities.

Almost half of York Region’s air pollution comes from sources beyond our borders, however, we can reduce local sources of air pollution. York Region is committed to addressing air quality and climate change by pursuing initiatives that reduce emissions and greenhouse gasses. This will be accomplished through compact urban form, a mix of land uses, active transportation, public transit, energy conservation and renewable energy sources, and by protecting natural areas and agricultural lands.

The York Region Sustainability Strategy: Towards a Sustainable Region contains over 117 action items of which half are underway, including the implementation of the Corporate Clean Air Strategy.

Objective

To improve air quality, and mitigate and adapt to the impacts of climate change.

It is the policy of Council:

1. To implement the York Region Sustainability Strategy: Towards a Sustainable Region.
2. To prepare a climate change adaptation action plan in keeping with the York Region Sustainability Strategy: Towards a Sustainable Region.

3. To reduce vehicle emissions by ensuring that communities are designed to prioritize pedestrians and cyclists, reduce single occupancy automobile use, and support public transit and ~~t~~Transportation ~~d~~Demand ~~m~~Management initiatives.
4. To establish greenhouse gas reduction targets for York Region in partnership with community stakeholders and local municipalities.
5. To require health, environmental and cumulative air quality impact studies that assess the impact on human health for development with significant known or potential air emission levels near *sensitive uses*⁴⁵ such as schools, daycares and seniors' facilities.
6. That *sensitive uses*⁴⁶ such as schools, daycares and seniors' facilities not be located near significant known air emissions sources such as controlled access provincial 400-series highways.
7. To work with partners such as the GTA Clean Air Council to conduct research, develop toolkits and share information on air quality and climate change impacts.
8. To work with local municipalities, agencies and stakeholders on the development and implementation of clean air initiatives.
- ~~9. To work with other levels of government, agencies, and stakeholders to identify the links between climate change, community planning and public health.~~
- ~~10. 9.~~ To work with other levels of government, agencies, and stakeholders to identify the links between climate change, community planning and public health.
- ~~11. 10.~~ To work with other levels of government, agencies and stakeholders to develop climate change adaptation measures that address such issues as urban heat island effect, infrastructure resiliency, emergency preparedness, vector-borne diseases, and extreme-weather event responses.
- ~~12. 11.~~ To work with the Province to increase air quality monitoring stations in York Region and to improve air quality monitoring.
- ~~13. 12.~~ To investigate emissions trading and carbon offsets to finance and showcase clean air initiatives in consultation with the Province and Federal government.
- ~~14. 13.~~ To investigate strategies related to reducing the industrial use of toxic materials in consultation with provincial, municipal and business partners.
- ~~15. 14.~~ To work with local municipalities and the building industry to develop best practices in construction to reduce airborne pollutants.

The greenhouse effect

⁴⁵ Proposed Provincial Modification 69

⁴⁶ Proposed Provincial Modification 69

First Nations with Cultural or Historical Interests in York Region

- Anishinabek
- Huron
- Iroquois

Areas of archaeological potential means areas with the likelihood to contain archaeological resources.

Provincial Policy Statement, 2005

- To encourage local municipalities to use community improvement plans and programs to conserve *cultural heritage resources*.
- To encourage local municipalities to consider urban design standards in core historic areas that reflect the areas' heritage, character and streetscape.
- To encourage access to core historic areas by walking, cycling and transit, and to ensure that the design of vehicular access and parking complements the historic built form.
- To prepare, in partnership with First Nations, the Métis Nation, and other stakeholders a York Region Archaeological Resources Management Plan which considers:
 - the locations of significant or potentially significant archaeological resources, cultural heritage sites, ceremonial sites and sacred sites; and,
 - protocols for the protection and management of significant or potentially significant archaeological resources, cultural heritage sites, ceremonial sites and sacred sites.
- That prior to approval of *development or site alteration* on lands containing significant or potentially significant archaeological resources, a plan for the protection and/or management of these resources will be developed, in co-operation with the local municipality and the Region, in accordance with provincial legislation and guidelines. If the archaeological resources pertain to First Nations and/or Métis Nation heritage, the protection and/or management plan will be developed in consultation with appropriate First Nations and Métis Nation communities. In situations where archaeological resources are to be preserved on-site, the Region in consultation with local municipalities shall consider regulatory tools such as zoning restrictions and heritage easements.
- To investigate the potential for a secure re-interment site and interpretation centre for First Nations and the Métis Nation artifacts and remains, where preservation in their current location is not possible.
- To recognize and celebrate the rich cultural heritage of the Region's ethnic and cultural groups.
- To require local municipalities to adopt official plan policies to conserve significant *cultural heritage resources* and ensure that *development and site alteration on adjacent properties will conserve the heritage attributes of that property*.⁴⁷

3.5 Housing Our Residents

Acceptable housing is a key component to quality of life. It contributes to an individual's sense of belonging, worth and security, and supports sustainable and complete communities.

The housing market is faced with demand for a broader variety of housing types and sizes to meet the diverse range of needs of the Region's residents and workers. Meeting these needs allows people to live and work in their communities as they progress through the stages of life.

⁴⁷ Proposed Provincial Modification 29

"Low Density Housing" refers to single family dwelling structures.
 "Medium and High Density Housing" refers to all other structure types, including semi-detached, townhouses, apartments and duplexes.

Examples of accessibility features include:

- An accessible washroom on the entry level
- Zero-step entrance
- Wide interior doorways

- b. policies to achieve a mix and range of housing types within each level of affordability;
 - c. policies to ensure larger sized, family units within each housing type and level of affordability; and,
 - d. consideration of locations for social housing developments.
6. That a minimum 25% of new housing units across the Region be *affordable*, and distributed within each local municipality. A portion of these units should be accessible for people with disabilities. *Affordable* housing units should include a mix and range of types, lots sizes, unit sizes, functions and tenures to provide opportunity for all household types, including larger families, seniors, and residents with special needs.
7. That in addition to policy 3.5.6, a minimum 35% of new housing units in Regional Centres and *key development areas* be *affordable*, offering a range of affordability for low and moderate income households.
8. To encourage the development of intrinsically *affordable* housing, which includes modest amenities, standard materials, minimal details and flexibility within units.
9. To develop an *affordable* housing implementation framework in partnership with local municipalities and the development industry to achieve the targets in this Plan.
10. To work with local municipalities, the private sector and other stakeholders to consider innovative financial arrangements to encourage and support the development and maintenance of non-profit and *affordable* housing, such as:
 - a. height and density incentives;
 - b. Community Improvement Plans;
 - c. grants in lieu of development charges; and,
 - d. reduced municipal fees and charges.
11. That *affordable* housing initiatives be given priority on ~~suitable~~ publicly owned lands with a focus on locations on or near transit corridors⁴⁸.
12. That Housing York Inc. continue to pursue the objective of providing affordable housing units by:
 - a. managing and expanding the housing portfolio over time;
 - b. making maximum use of provincial and federal funding opportunities; and,
 - c. fostering community linkages and partnerships.
13. To encourage the construction of new non-profit housing.
14. To encourage that *special needs housing*, and emergency, *affordable*, and seniors' housing be located in proximity to rapid transit and other human services.
15. To encourage local municipalities to adopt policies for an equitable distribution of social housing types, including:
 - a. municipal and private non-profit and co-operative developments;
 - b. *special needs housing*; and,

⁴⁸ [Proposed Provincial Modification 30](#)

13. To work with local municipalities to establish and promote destinations for recreation and tourism and implement York Region's Long Term Tourism Destination Development Strategy.
14. To work with local municipalities to leverage Community Energy Plans as a tool to promote economic development.
15. To demonstrate leadership in corporate sustainability to York Region's businesses through the implementation and annual monitoring of the York Region Sustainability Strategy: Towards a Sustainable Region and associated programs.
16. To review and implement the York Region Economic Strategy at least every 5 years, concurrent with the 5-year review of this Plan.

4.2 City Building

Regional Centres and Corridors are a focal point of commerce, business and cultural activities in the Region. The Region and local municipalities will continue to support the development of Regional Centres and Corridors by encouraging attractive, compact community design and the clustering of economic activities. This will promote creativity, the exchange of ideas, ease of business transactions and an increased opportunity for economic spin-offs. Regional Centres and Corridors are planned to become the economic hubs of the Region and the preferred locations for *major office*⁴⁹, mixed-use commercial and high-density residential development.

Objective

To support Regional Centres and Corridors as a focus of economic activity and culture in York Region.

It is the policy of Council:

1. To recognize Regional Centres and Corridors as hubs of commerce, business and entertainment activities.
2. To recognize Regional Centres and Corridors as the preferred location for *major office*⁵⁰ uses and to develop incentives to attract *major office*⁵¹ uses to these locations.
3. To encourage the Province and Federal government to provide incentives to attract *major office*⁵², institutional, educational, cultural and entertainment facilities to Regional Centres and Corridors.
4. To require a mixed-use pedestrian environment in Regional Centres and Corridors that promotes transit use and enhances these areas as destinations for business, entertainment and recreation.
5. That government, educational, institutional, *major office*⁵³, cultural and entertainment uses be located and designed to support the Regional Centres and Corridors structure of this Plan.

Regional Centres and Corridors System

⁴⁹ Proposed Provincial Modification 65

⁵⁰ Proposed Provincial Modification 65

⁵¹ Proposed Provincial Modification 65

⁵² Proposed Provincial Modification 65

⁵³ Proposed Provincial Modification 65

6. To work with local municipalities to ensure that Regional Centres and Corridors include a significant amount of mixed-use, pedestrian-oriented, and street-related retail.
7. To ensure the efficient movement of goods and services in Regional Centres and Corridors through effective planning, urban design and infrastructure planning.

4.3 Protecting Employment Lands

York Region is committed to maintaining and enhancing the long term viability of employment lands. Employment lands are major drivers of economic activity, and contain over 50% of the Region's employment. These lands are forecasted to continue to play a significant role in the Region's economy, primarily accommodating industrial and business uses. The ongoing viability of these lands is contingent upon long term protection, effective planning and design, and a shift towards increasingly sustainable and innovative industrial processes.

Objective

To ensure the long term supply and effective planning and design of employment lands ~~to 2031 and beyond~~⁵⁴.

It is the policy of Council:

1. That the employment forecasts in Table 1 of this Plan and the Region's land budget, which form part of the *Regional municipal comprehensive review*⁵⁵, be used as the basis for planning for employment lands.
2. To recognize that employment lands are strategic and vital to the Regional economy and are major drivers of economic activity in the Region.
3. To protect, maintain and enhance the long term viability of all employment lands for employment land uses.
4. To require local municipalities to designate and protect employment lands in local municipal official plans.

5. ~~2-~~To protect all employment lands identified designated in local municipal official plans. ~~These lands are strategic and vital to the Regional economy and are to be protected~~ for employment land uses.

3. ~~To require local municipalities to designate and protect employment lands in local municipal official plans.~~

6. ~~4-~~To protect strategic employment lands, including lands as identified in Figure 2, ~~including lands beyond the planning horizon of this Plan.~~ Strategic employment⁵⁶ These lands are identified based on their proximity to existing or planned 400-series highways. Strategic

York Region Employment by Industry, 2008

York Region Employment Survey, 2008

⁵⁴ Proposed Provincial Modification 31

⁵⁵ Proposed Provincial Modification 67

⁵⁶ Proposed Provincial Modification 32

~~employment lands and shall be designated for employment land uses should be identified and protected~~⁵⁷ in local municipal official plans.

- ~~7.~~ ~~5-~~To require local municipalities to give priority to ~~the~~ strategic employment lands ~~identified in Figure 2~~ when considering additional employment land designations.
- ~~8.~~ ~~6-~~That the conversion of employment lands to non-employment land uses is not permitted. For the purposes of this policy:
 - a. employment lands are lands that are designated for employment uses including land designated as industrial and business park in local official plans; and,
 - b. uses not permitted on employment lands include residential, *major retail* and *non ancillary uses*.
- ~~9.~~ ~~7-~~That notwithstanding policy 4.3.~~86~~, the conversion of employment lands to non-employment land uses may be considered, together with local municipalities, provided that a *Regional municipal comprehensive review*⁵⁸ has been completed in accordance with the applicable policies, forecasts and land budget of the Region.

~~8-That the conversion of employment lands within Regional Centres and key development areas along Regional Corridors do not require a municipal comprehensive review for mixed use development that supports the policies contained in Section 5.4 of this Plan.~~

- ~~10.~~ ~~9-~~To require local municipalities to include employment land non-conversion policies within local official plans and secondary plans that are consistent with policies of the Province and the Region.
- ~~11.~~ ~~10-~~To allow a limited amount of *ancillary uses* on employment lands, provided that the proposed use is designed to primarily service businesses in the employment lands and that *ancillary uses* collectively do not exceed 20% of total employment in the employment land area.
- ~~12.~~ ~~11-~~To require local municipalities, through official plan policies, to determine the location, amount and size of *ancillary uses* on employment lands that is commensurate with the planned function, size and scale of the overall employment land area.
- ~~13.~~ ~~12-~~That local municipalities include official plan and secondary plan policies and zoning provisions to exclude land uses other than employment and *ancillary uses* on Local Corridors and other major streets within ~~and/or adjacent to~~ employment lands ~~and to the centreline of streets adjacent to employment lands~~.

~~14. That local municipalities, in consultation with York Region, prepare comprehensive secondary plans for new employment lands that are consistent with the applicable policies in Sections 5.2 and 5.6 of this Plan~~⁵⁹

- ~~14-15. 13-~~That employment land development be designed to be both walkable and transit accessible where possible.

Formatted: Bullets and Numbering

⁵⁷ Additional Proposed Regional Modification 74

⁵⁸ Proposed Provincial Modification 67

⁵⁹ Additional Proposed Regional Modification 75

York Region's historical mainstreets include:

- Aurora Mainstreet
- King City Mainstreet
- Jackson's Point Mainstreet
- Kleinburg Mainstreet
- Langstaff Mainstreet
- Markham Mainstreet
- Markham Unionville Mainstreet
- Mount Albert Mainstreet
- Newmarket Mainstreet
- Old Richmond Hill Mainstreet
- Pefferlaw Mainstreet
- Sharon Mainstreet
- Stouffville Mainstreet
- Sutton Mainstreet
- Thornhill Mainstreet
- Woodbridge Mainstreet

~~15.16.14.~~ That development on fully serviced employment lands be compact and achieve an average minimum density of 40 jobs per hectare in the *developable area*. This target is expected to be higher for lands ~~within or~~ adjacent to centres and corridors.

~~16.17.15.~~ To work with local municipalities to provide a diverse mix of lot sizes on employment lands.

~~17.18.16.~~ To require flexible and adaptable employment lands that include street patterns and building design and siting that allow for redevelopment and *intensification*.

~~18.19.17.~~ To work with local municipalities to review and monitor opportunities for employment land *intensification*.

~~19.20.18.~~ To require local municipalities to conduct 5-year reviews of employment lands to accommodate employment *intensification*.

~~20.21.19.~~ To encourage employment *intensification* and higher density employment uses in Regional Centres and Corridors, in support of the policies in Section 5.4 of this Plan.

~~21.22.20.~~ That industries on private services be limited to existing approved sites.

~~21. That the Strategic Employment Land symbol associated with the North Leslie Secondary Plan Area, shown on Figure 2 is subject to an Ontario Municipal Board hearing which will determine the detailed land use designations at the local municipal level. When the Ontario Municipal Board decision and order are issued, Figure 2 will be revised accordingly.~~

22. That the employment land designation policies in ROPA 52 continue to apply.

4.4 Planning for Retail

Retail trade is an essential component of a healthy economy. York Region is home to significant retail uses that are continually evolving. The Region, in partnership with local municipalities, is committed to providing an appropriate amount of retail activities in suitable locations. Local retail areas are key components of mixed-use communities and should incorporate effective urban design to ensure the integration of retail uses within the community. Well-designed and strategically located retail allow residents and workers to purchase goods and services locally by walking, cycling or taking public transit. Shopping locally reduces travel times and congestion, and supports the Region's economy.

Major retail facilities should be designed and located to serve the needs of residents, but not detract from existing and proposed urban centres, mainstreets, employment lands and the urban structure of this Plan.

Objective

To ensure retail is well-designed and appropriately integrated into communities so that residents can meet their daily needs through walking, cycling, and transit.

It is the policy of Council:

1. To require that new retail be designed to be walkable, transit-supportive, and integrated into communities and pedestrian and cycling networks, with high-quality urban design.

CHAPTER 5:

An Urbanizing Region: Building Cities and Complete Communities

In the next 25 years, York Region ~~will face~~⁶⁰ significant growth. It is anticipated that the Region will reach a population of 1.5 million people, 780,000 jobs, and 510,000 households by 2031. The Region is committed to plan for this growth in a sustainable way while providing a high-quality of life for its residents.

The Region's urban structure has evolved and is composed of a series of centres and corridors surrounded by the Urban Area, and a number of rural towns, villages, and hamlets. All of these areas will play a part in accommodating the forecasted growth while still maintaining their character. This chapter focuses on the enhancement of the Regional structure to achieve a more sustainable urban form.

York Region will be a role model for sustainability and enter into a new era of city building, while protecting natural heritage and agricultural lands. Intensification within the Urban Area will accommodate a significant portion of the planned growth in the Region. Regional Centres and Corridors will be prominent locations for the highest levels of intensification. Growth will also occur in new community areas, Towns and Villages throughout the Region.

While the form and character of growth will vary across the Region, all development will be held to high standards. Each community will have a unique sense of place and an integrated and linked natural heritage system, and each will promote active lifestyles through pedestrian-oriented environments.

This chapter lays the foundation for creating the next generation of communities within York Region. The policies set new standards to ensure that growth is based on innovation, place making, and decision making that integrates the environment, community and economy.⁶¹

An Urbanizing Region Goal

To enhance the Region's urban structure through city building, *intensification*, and compact and complete communities.

IN THIS CHAPTER:

- 5.1 Forecasting and Phasing Growth
- 5.2 Sustainable Cities, Sustainable Communities
- 5.3 Intensification
- 5.4 Regional Centres and Corridors
- 5.5 Local Centres and Corridors
- 5.6 Building Complete, Vibrant Communities

Provincial Plan	Area in sq Kms in York Region	% of Regional Area
Oak Ridges Moraine Conservation Plan	558 (in York Region)	31%
Greenbelt Plan	677 (in York Region excluding ORMCP)	38%
Lake Simcoe Protection Plan	1256 (overlaps ORMCP and GB)	70%
Parkway Belt West Plan	26	2%
York Region	1776	100%

⁶⁰ Proposed Provincial Modification 33

⁶¹ Proposed Provincial Modification 34 (New Sidebar)

Growth Management Minimum Targets

(Further explanation in policy 8.2.3)

- [Minimum 40% residential intensification within the built up area by 2015 and beyond.](#)
- [50 residents and jobs per hectare within the designated greenfield area.](#)
- [Minimum 25% new affordable housing units.](#)
- [2.5 floor space index in the Regional Centres.](#)
- [3.5 floor space index in and around major Subway Stations.](#)
- [25% Woodland cover.](#)
- [Sustainable Building Targets in Section 5.2.](#)

Service Delivery in New Communities

Prior to Home Occupation	At an Early Stage
• Streets • Transit • Water • Wastewater • Energy utilities • Cable/ Communications • Natural gas	• Schools • Police, fire and ambulance Services • Public open space • Healthcare facilities • Libraries • Community centres • Preventive health programs • Social service support programs

Co-ordinating land use approvals with master plans ensures key infrastructure is provided to service forecast population and employment thresholds. Key infrastructure includes:

Major water & wastewater infrastructure includes:

- Southeast Collector Sewer
- Duffin Creek Outfall
- Primary Trunk Sewer
- Duffin Creek Wastewater Treatment Plant Expansion
- Upper York Servicing Solution

Major Transit & Transportation Infrastructure includes:

- Active Transportation facilities
- Subways & Viva Next Rapidways
- GO Transit expansion
- 400-Series Highway Improvements & Extensions
- Arterial road improvements including High Occupancy Vehicle lanes
- Mid-block Crossing of 400-series Highways

5.1 Forecasting and Phasing Growth⁶²

York Region continues to experience rapid population and employment growth. Since its creation in 1971, the Region's population has increased from 169,000 to over one million in 2008. Employment growth has increased tenfold, from 49,000 in 1971 to 490,000 in 2008. This dramatic growth makes York Region one of the fastest-growing municipalities in Canada.

The population and employment forecasts contained in this Plan are intended to be used as a guideline for growth in the Region. These forecasts aid in designating settlement and land use boundaries, planning for future transportation requirements, calculating water and wastewater capacity needs, determining housing needs and associated land requirements, estimating the need for social programs and new schools, and providing a basis for other services and program planning in the Region. These forecasts are also used by industry and business in making investment decisions.

Table 1 identifies the population and employment forecasts for York Region and its nine local municipalities to the year 2031. These forecasts were developed using an integrated and comprehensive approach. This approach included an analysis of human services, water and wastewater, transportation, environmental and fiscal impacts.

The forecast is based on several assumptions. Unexpected changes to these assumptions, such as shifts in federal immigration levels or the strength of the economy, could alter the outlook. York Region will continue to carefully monitor and update its forecasts and phasing to ensure a pace of growth that creates complete communities.

To achieve the forecast, new communities will be required in the Region. Complete communities require a variety of services to provide structure and create healthy, liveable places. These include human services and capital infrastructure, such as streets and wastewater systems. While the timing of delivery for these services can vary, the phasing policies of this Plan and co-ordination with agencies will ensure the effective delivery of services and encourage orderly, sustainable growth.

Objective

To ensure that growth in York Region occurs in an orderly and sustainable manner.

It is the policy of Council:

1. That the land use planning horizon for York Region is the year 2031.
2. That the population and employment forecasts in Table 1 be used as the basis for planning of new *development*.
3. That a minimum Region-wide 10-year supply of lands for housing be designated in this Plan and that the York Region 10-Year Capital Plan ensures timely servicing.
4. That local official plans shall not designate more than a 20-year supply of land for *development*.

⁶² Proposed Provincial Modification 35 (new Sidebar "Growth Management Minimum Targets")

⁶³

5. To maintain a housing supply of 3 to 7 years in registered and draft approved plans of subdivision, condominium plans and/or site plans.
6. To require local municipalities to develop a phasing plan for *new community areas* that is co-ordinated with the following Regional plans and policies:
 - a. the *new community areas* criteria in Section 5.6 of this Plan;
 - b. the fiscal policies in Section 4.5 of this Plan;
 - c. the York Region 10-Year Capital Plan;
 - d. the York Region Water and Wastewater Master Plan; and,
 - e. the York Region Transportation Master Plan.

⁶³ Proposed Provincial Modification 36

Phasing:

Block A must be generally 75% complete before development of Block B occurs

**Sequencing:**

Within a block, each plan must be developed in an orderly and co-ordinated manner

7. To require that local official plans, master plans, capital plans and secondary plans be consistent with phasing plans prepared in accordance with policy 5.1.6.b through 5.1.6.e.
8. To require, within each local municipality, that a phase of *new community area* development is substantially complete (i.e., generally 75% of residential land area built) before a subsequent phase may be registered, to ensure the orderly development of land.
9. To require local municipalities to prepare detailed sequencing plans within each secondary plan that are supported by water, wastewater, and transportation infrastructure, and the provision of human services.
10. To require the Town of East Gwillimbury to develop a phasing plan for employment land growth based policies 5.1.6.b through 5.1.6.e.
11. That the forecasts in Table 1 be monitored annually and reviewed at least every 5 years, taking the following into account:
 - a. the latest population and employment forecasts for the Region;
 - b. the fiscal policies in Section 4.5 of this Plan;
 - c. the York Region Water and Wastewater Master Plan;
 - d. the York Region Transportation Master Plan;
 - e. the York Region 10-Year Capital Plan; and,
 - f. the pace of growth and shifts in the marketplace.
12. That expansions of the Urban Area, ~~identified on Map 1~~ subsequent to ROPA 1, 2 and 3, shall only be initiated by the Region, in consultation with local municipalities, as part of a municipal comprehensive review that is consistent with the policies of the Places to Grow: Growth Plan for the Greater Golden Horseshoe and the following:
 - a. population and employment forecasts for the Region;
 - b. the role of the lands proposed for expansion in the context of local municipal growth management;
 - c. the protection of and integration with the Regional Greenlands System;
 - d. the amendment is large enough (e.g. a concession block) with clear and identifiable boundaries, such as concession streets, major natural features, rail or major utility corridors;
 - e. the role of the lands proposed for expansion that is supportive of the Region's urban structure of centres and corridors;
 - f. the completion of local municipal strategies and policies to phase in and achieve the intensification targets in this Plan; and,
 - g. other policies of this Plan.
13. That the land area requirements for ~~an~~ the urban expansion ~~are have been~~ identified as part of York Region's land budget exercise and do not require an additional comprehensive review. The Region will work with the Town of East Gwillimbury, the Town of Markham and the City of Vaughan to finalize the land budget and to identify the preferred amount, location and phasing of Urban Area boundary expansions prior

~~to the adoption of local official plans. The general locations where urban expansions may be considered are identified with asterisks on Map 1.~~⁶⁴

5.2 Sustainable Cities, Sustainable Communities

By 2031 there will be an additional 577,000 residents, 234,000 households, 318,000 jobs, and over 180 million square feet of employment floor space across the Region. This growth will be accommodated in Regional Centres and Corridors, the Urban Area, Towns and Villages, and new community areas. While each of these areas is unique, they will be knitted together by common principles and policies that set a high standard for development. These complete communities will be designed to be sustainable by incorporating green building technologies, and renewable and alternative energy options, and over time will evolve into zero carbon and zero waste communities. Standards will help to create well-designed communities that have integrated greenspace, pedestrian and transit networks, and that offer a variety of housing, transportation, human services, and employment options.

Objective

To create high-quality, sustainable communities.

It is policy of Council:

1. That the policies in this section apply throughout York Region.
2. That local municipalities, in co-operation with the Region, are required to develop and monitor growth management strategies that implement the policies of this Plan.
3. That communities be designed to ensure walkability through interconnected and accessible mobility systems. These systems will give priority to pedestrian movement and transit use, provide pedestrian and cycling facilities, and implement the York Region Pedestrian and Cycling Master Plan.
4. That *development* requiring Regional approval shall be supported by a transportation study that assesses impacts on the Region's transportation system and surrounding land uses. Significant *development* shall prioritize walking, cycling and transit.
5. That a balance of residential and employment uses shall be provided throughout the Region to improve the possibilities for working and living in close proximity.
6. To encourage *development* to incorporate live-work opportunities through a combination of flexible zoning permissions and accommodations for combined residential and business or personal services, office uses, and home occupations.
7. That communities be designed to ensure accessibility to people of all ages, cultures and abilities.
8. To employ the highest standard of urban design, which:
 - a. provides pedestrian scale, safety, comfort, accessibility and connectivity;

⁶⁴ [Proposed Provincial Modification 37](#)

Community Energy Plans set out a strategy to help the community reach goals of energy conservation, energy efficiency, and the reduction of greenhouse gas emissions that include:

- Passive solar gains through design
- On-site generation and district energy options such as solar, wind, water, biomass, and geothermal energy
- Use of green and white roofs, greening to provide shade and light-coloured surface materials

- b. complements the character of existing areas and fosters each community's unique sense of place;
 - c. promotes sustainable and attractive buildings that minimize energy use;
 - d. promotes landscaping, public spaces and streetscapes;
 - e. ensures compatibility with and transition to surrounding land uses;
 - f. emphasizes walkability and accessibility through strategic building placement and orientation;
 - g. follows the York Region Transit-Oriented Development Guidelines; and,
 - h. creates well-defined, centrally-located urban public spaces.
9. That retail, commercial, office, and institutional structures be carefully designed in a compact form and be pedestrian-oriented, transit-supportive, and multi-storey where appropriate.
10. That secondary plans and zoning by-laws shall, in consultation with the Region and related agencies, incorporate parking management policies and standards that include:
 - a. reduced minimum and maximum parking requirements that reflect the walking distance to transit and complementary uses;
 - b. shared parking requirements, where possible, reflecting variances in parking demand between complementary uses on a time-of-day, weekday/weekend, and monthly basis;
 - c. on-street parking;
 - d. site design that orients the main building entrance(s) towards the street(s), that does not permit the placement of surface parking spaces between the main building entrance and the major street;
 - e. the design of surface parking to support redevelopment and retrofitting; and,
 - f. preferential locations for carpooling and car-sharing spaces and bicycle storage requirements.
11. That *development* have an integrated and innovative approach to water management, be water efficient, and minimize stormwater volumes and contaminant loads and maximize infiltration through an integrated treatment approach, which may include techniques such as rainwater harvesting, runoff reduction of solids and materials at source, constructed wetlands, bioretention swales, green roofs, permeable surfaces, clean water collection systems, and the preservation and enhancement of native vegetation cover.
12. That *renewable energy projects*~~systems~~ and *alternative energy systems* shall be permitted throughout the Region in accordance with provincial and federal requirements, and that these permissions be incorporated into local official plans and zoning by-laws. Local municipalities shall specify in more detail where renewable projects that are not exempt from the Planning Act and alternative technologies will be permitted. Those renewable energy undertakings that are exempted from Planning

Act approvals are subject to the Green Energy Act and the Green Economy Act, 2009.⁶⁵

13. To encourage local municipalities to undertake municipal-wide Community Energy Plans. These plans will detail the municipality's energy use requirements and establish a plan to reduce energy demand and consider the use of alternative and renewable energy generation options and district energy systems, and will ensure that communities are designed to optimize passive solar gains.
14. To require that the *designated greenfield area* achieve an average minimum density that is not less than 50 residents and jobs per hectare combined in the *developable area*.
15. To encourage the re-examination of ~~That~~ approved secondary plans within the *designated greenfield area* that are not completely built ~~should be re-examined~~ to determine if 50 residents and jobs per hectare in the *developable area* can be achieved.
16. To encourage that secondary and subdivision plans within the *designated greenfield area* that are not approved, be developed in accordance with policies 5.6.4 through 5.6.16.
17. That local municipalities shall develop official plan policies and associated procedures for *development* on contaminated or potentially contaminated sites, including the use of community improvement plans where appropriate to promote *brownfield site* redevelopment.
18. To establish, in co-operation with the Province and local municipalities, common density and *intensification* measurements, definitions and monitoring tools.
19. That the policies of this Plan are supported by the Guidelines for Community Development in York Region. New development shall meet all required items, and be encouraged to achieve all optional items. ~~The guideline document shall be amended from time to time without amendment to this Plan.~~

Sustainable Buildings

Building sustainable communities includes integrating land use and the built form. The policies of this Plan ensure that sustainable buildings are a key component of York Region's communities. The built form plays a major role in supporting the sustainability vision for the Region, by being more energy and water efficient, supporting local industry by buying materials locally, and providing healthier indoor environments.

Objective

To ensure sustainable buildings throughout York Region as a key component of sustainable communities.

It is the policy of Council:

20. To require the following energy efficiency standards for all new buildings:

⁶⁵ Proposed Provincial Modification 38

EnerGuide and ENERGY STAR®

The EnerGuide rating is a standard measure of a home's energy performance. The energy efficiency level is rated on a scale of 0 to 100. A rating of 0 represents a home with major air leakage, no insulation and extremely high energy consumption. A rating of 100 represents a house that is airtight, well insulated and sufficiently ventilated and requires no purchased energy.

ENERGY STAR is the best-in-class on the EnerGuide scale. Currently, an ENERGY STAR home is rated at EnerGuide 80.

The Model National Energy Code for Buildings (MNECB) establishes minimum requirements for energy efficiency in new buildings. The MNECB applies to all buildings, other than houses of three storeys or less, and to additions of more than 10 m² to such buildings. The document includes detailed information on building envelope, lighting, electrical power, and heating, ventilating and air conditioning systems, which can offer major energy savings.

Water Efficiency can be achieved through the installation of the following features:

10%	20%
4.85 LPF single flush toilets installed in all bathrooms;	4.1 LPF single flush toilets installed in all bathrooms;
Low flow lavatory faucets (max flow of 5.87 litres per minute);	Low flow lavatory faucets (max flow of 5.60 litres per minute);
Low flow shower faucets (max flow of 7.5 litres per minute);	Low flow shower faucets (max flow of 6.6 litres per minute);
Water efficient Dishwasher (≤ 20.0 litres per cycle); and	Water efficient Dishwasher (≤ 20.0 litres per cycle); and
Water efficient Clothes washer (Water Factor of ≤ 7.5).	Water efficient Clothes washer (Water Factor of < 5.5).

- a. plan to meet and/or exceed *intensification* targets identified in Table 2.

Table 2: York Region Residential Intensification Targets by Local Municipality 2006-2031

	Units
Aurora	3,140
East Gwillimbury	1,030
Georgina	2,690
King	920
Markham	31,590
Newmarket	5,250
Richmond Hill	15,300
Vaughan	29,300
Whitchurch-Stouffville	1,500
York Region	90,720

- b. identify the role for each of the following:
 - i. Regional Centres and Corridors;
 - ii. GO Transit train stations and bus terminals, and subway stations;
 - iii. Local Centres and Corridors;
 - iv. Other major streets;
 - v. Local infill; and,
 - vi. Secondary suites.
 - c. identify and map *intensification areas* and provide targets for each area;
 - d. identify appropriate density ranges for *intensification areas* that support the Intensification Matrix Framework;
 - e. incorporate employment opportunities into *intensification areas*;
 - f. plan for a range and mix of housing, taking into account *affordable* housing needs; and,
 - g. identify implementation policies and strategies to prioritize, phase in and achieve local municipal intensification targets.
4. That the distance to a transit stop in the Urban Area is within ~~be generally no more than~~ 500 metres (a 5-to-10-minute walk) for 90% of the residents and no more than 200 metres for 50% of residents.
 5. That *intensification areas* are planned and designed to meet:
 - a. the York Region Transit-Oriented Development Guidelines; and,
 - b. the Region's implementation guidelines for Regional Centres and Corridors.
 6. That *intensification areas* be planned and designed to achieve an appropriate transition of built form to adjacent areas.
 7. That open spaces shall be provided that include:
 - a. active recreational facilities;
 - b. passive parks and open spaces;

The Intensification Matrix Framework

- c. meeting places and urban squares that incorporate art, culture and heritage; and,
 - d. opportunities for community gardening.
8. That the Regional Greenlands System shall be protected and enhanced and include pedestrian-accessible green spaces and passive parks, where appropriate.
 9. That parking shall be managed in a manner consistent with policies 5.2.10, 5.4.8, 5.4.9 and 5.4.26.c of this Plan.
 10. That retail, commercial, office, and institutional structures shall be well designed, street-oriented and include mixed-use and pedestrian-scaled development, multi-storey buildings, and public meeting spaces.
 11. That human services facilities be located in close proximity to public transit.
 12. To work with local municipalities to raise awareness on the benefits of *intensification* with the public and stakeholders.
 13. To encourage the redevelopment of *brownfield sites* to revitalize lands that may be contaminated, underutilized, derelict or vacant.
 - ~~14. That *intensification areas* be planned to avoid *special policy areas* unless there exists no other alternatives outside of the floodplain.~~
 14. That floodplain *special policy areas* should not be planned for intensification beyond the level of development that is currently provided for in the local municipal official plan, unless it has been demonstrated that no other alternatives exist outside the floodplain. Any change in the level of development within the *special policy area* must be and modifications to the *special policy area* have been comprehensively assessed by the municipality in accordance with policy 2.3.19 of this Plan Provincial criteria and procedures and approved by the Province. Any new *special policy area* or modifications to the policies or boundaries of an existing *special policy area* requires approval by the Province.⁶⁶

5.4 Regional Centres and Corridors

York Region's evolution into a diverse and robust urban system within the Greater Toronto and Hamilton Area is rooted in the planning and implementation of the Regional Centres and Corridors which form the foundation of the Region's city building model of development.

A forward-looking and co-ordinated planning approach for the Regional Centres and Corridors is necessary to realize the vision of a vibrant and liveable city. This approach combines the Region's significant investments in rapid transit with a land use planning system that creates compact, sustainable, and people-oriented places, integrates community needs with effective services, bolsters the Region's economic competitiveness, and

⁶⁶ Proposed Provincial Modification 39

- a. a system of municipal parking authorities to develop and/or operate shared public parking facilities;
 - b. cash-in-lieu-of-parking policies; and,
 - c. the planning for parking in structured or underground facilities ~~in~~**by** the final phasing of all site *development*.
27. To co-ordinate and work with the Towns of Markham and Richmond Hill, and the neighbouring City of Vaughan, in the planning and implementation of the secondary plans for the Richmond Hill/Langstaff Gateway Centre, to achieve a complete and integrated Regional Centre.

Regional Corridors

The Regional Corridors are more than just the main arteries for moving people and goods between neighbourhoods and the Regional Centres. They are diverse places that support a range and mix of activities that enrich the character and meet the needs of the communities located along the Regional Corridors. The character and pace of development on Regional Corridors may be dramatically different along various stretches, including segments that are historical mainstreets, protected natural areas, or higher-density nodes.

Lands adjacent to these Corridors are at different stages in the land development lifecycle and will be subject to specialized policies and supportive programs that recognize this fact. These policies encourage redevelopment in appropriate areas, while maintaining the character and integrity of areas where little change is expected, thereby supporting and strengthening local community character.

Objective

To achieve attractive and vibrant urban Regional Corridors that link Regional Centres.

It is the policy of Council:

28. That Regional Corridors are planned to function as urban mainstreets that have a compact, mixed-use, well-designed, pedestrian-friendly and transit-oriented built form.
29. That the Regional Corridors shown on Map 1 shall be designated in local official plans and planned for in a comprehensive manner that identifies the role and function of each Corridor segment, consistent with the policies of this Plan.
30. That the boundaries of the Regional Corridors be designated by the local municipality, based on:
 - a. reasonable and direct walking distances between the Regional Corridor street frontage and adjacent lands;
 - b. contiguous parcels that are desirable and appropriate locations for *intensification* and mixed-use *development*; and,
 - c. compatibility with and transition to adjacent and/or adjoining lands.
31. That the most intensive and widest range of uses within the Regional Corridors be directed to specific *intensification areas*, identified by local municipalities as *key development areas*. These areas shall include the following segments of the Regional Corridor:

Key Development Areas

- Are *intensification areas* on Regional Corridors
- Are focused on existing and planned rapid transit
- Have the highest densities and mix of uses in the Regional Corridor
- Are identified and planned by local municipalities

spaces is a key component of new community areas. Each complete community will have a unique sense of place and identity, and offer a variety of housing, employment and mobility choices. They will be mixed-use communities with high-quality urban design, attracting residents and workers alike.

Objective

To ensure the Region's *new community areas* prioritize people, sustainability, and liveability.

It is the policy of Council where a new community area is justified⁶⁷:

1. That local municipalities, in consultation with York Region, prepare a comprehensive secondary plan for *new community areas* that meets or exceeds the policies of this section of this Plan. The secondary plan preparation should include an innovative approach that involves a multidisciplinary team assembled by the local municipality in order to ensure an integrated and sustainable approach to the planning, design and approval of the secondary plan.
2. That each *new community areas* ~~within each local municipality~~ shall be planned in a comprehensive and co-ordinated manner.
3. That *new community areas* shall be designed to meet or exceed a minimum density of 20 residential units per hectare and a minimum density of 70 residents and jobs per hectare in the *developable area*.
4. That *new community areas* shall contain a wide range and mix of housing types, sizes and affordability.
5. That *new community areas* shall be designed to contain community core areas, which will be the focus of local retail, personal services, human services, community services and provide connections to rapid transit. The community cores shall be within a reasonable walking distance from the majority of the population.
6. That within *new community areas*, live-work opportunities be provided through a combination of flexible zoning permissions and accommodations for combined residential and business or personal services, office uses, and home occupations.
7. That *new community areas* shall be designed to have high-quality urban design, attractive buildings, landscaping and public streetscapes, consistent with policy 5.2.8 of this Plan.
8. That *new community areas* shall be planned to consider human services needs, including educational, social, health, arts, culture, and recreational facilities.
9. To design communities to maximize passive solar gains, and to ensure that all buildings are constructed in a manner that facilitates future solar installations.
10. That the local municipality shall develop a Community Energy Plan for each *new community area* to reduce community energy demands, optimize passive solar gains through design, and make use of renewable, on-site generation and district energy options including but not limited to solar, wind, water, biomass, and geothermal energy.

Places to Grow: Growth Plan for the Greater Golden Horseshoe requires a minimum density target of 50 residents and jobs combined per hectare for designated greenfield areas. Some built and approved greenfield areas in York Region have densities lower than the provincial requirement, and others are achieving densities close to the required density.

The new community areas will be built to a minimum density of 20 units per hectare in the developable area which equates to approximately 70 residents and jobs per hectare. While this requirement is higher than what is in Places to Grow: Growth Plan for the Greater Golden Horseshoe, it is necessary in order to achieve 50 people and jobs per hectare across the entire designated greenfield area in York Region.

⁶⁷ Proposed Provincial Modification 40

11. That comprehensive master environmental servicing plans shall be prepared and implemented. These plans will examine all water systems in a comprehensive and integrated manner to:
 - a. understand the integration of all water systems to increase efficiencies;
 - b. maximize water conservation in buildings and municipal infrastructure, including water-efficient landscaping and rainwater collection for reuse; and,
 - c. minimize stormwater volume and contaminant loads, and maximize infiltration through an integrated treatment approach, which may include techniques such as rainwater harvesting, runoff reduction of solids and materials at source, phosphorus reduction, constructed wetlands, bioretention swales, green roofs, permeable surfaces, clean water collection systems, and the preservation and enhancement of native vegetation cover.
12. That mobility plans shall be completed to ensure that:
 - a. communities are designed to have interconnected and accessible mobility systems, with a priority on pedestrian movement, and on transit use and access;
 - b. communities are designed to include a system of pedestrian and bicycle paths linking the community internally and externally to other areas, and providing access to the transit system;
 - c. a transit plan is completed in consultation with York Region Transit, which identifies transit routes and corridors, co-ordinates transit with land use patterns and ensures the early integration of transit into the community;
 - d. the distance ~~from to~~ a transit stop ~~in the Urban Area~~ is ~~generally no more than~~ within 500 metres ~~for of~~ 90% of ~~the population residents~~, and ~~no more than~~ within 200 metres ~~for of~~ 50% of ~~the population residents~~;
 - e. all schools and community centres shall be integrated into the community mobility system and provide the ability to walk, cycle, transit and carpool to these locations;
 - f. the street network includes continuous collector streets that run both north-south and east-west and/or a grid system of streets linked to the Regional Street network;
 - g. *new community areas* are designed to meet the York Region Transit-Oriented Development Guidelines;
 - h. a rapid transit corridor and/or transit terminal that connects to a rapid transit corridor is included in the community;
 - i. parking standards, consistent with policy 5.2.10, encourage and support transit use and include reduced minimum and maximum parking standards; and,
 - j. trip-reduction strategies consistent with the policies of Section 7.1 are promoted.
13. That *new community areas* shall be designed to implement the York Region Pedestrian and Cycling Master Plan.

Towns and Villages are identified on Map 1 of this Plan and include the communities of Stouffville, Kleinburg-Nashville, Nobleton, King City, Schomberg, Ballantrae/ Musselman Lake, Mount Albert, Sutton, Pefferlaw, and Maple Lake Estates.

14. That a ~~Regional~~ Greenlands System Plan shall be prepared that:
 - a. evaluates the potential impact of *development* and ensures the protection, enhancement, and securement of all *key natural heritage features* and *key hydrologic features* of the System;
 - b. identifies strategic areas for enhancement and restoration to maximize the quality of the entire System;
 - c. identifies how infrastructure projects within the System, including permitted stream crossings for streets, water and wastewater systems, contribute to an overall ecological gain by increasing natural cover, enhancing ecological function, providing recreational access or contributing to off-site enhancements;
 - d. identifies securement opportunities and management requirements;
 - e. includes a trail system, which is integrated into the mobility systems of the community;
 - f. examines the feasibility of providing local community gardening plots where appropriate, outside of the lands dedicated for parkland; and,
 - g. identifies hazard lands and hazardous sites, incorporates them into the Greenlands System, directs *development* away from these areas and includes an appropriate buffer or access allowance.
15. That *new community areas* be designed to include an integrated open space network that includes both active recreational facilities and meeting places, urban squares, parks, outdoor seating and informal gathering spaces generally within 500 metres of all residents.
16. That *new community areas* be designed to reduce urban heat island effects and consider integrating green and white roofs, greening to provide shade, and light-coloured surface materials consistent with policy 5.2.35 of this Plan.

Towns and Villages

York Region has a tradition of tightly knit villages that each have their own unique sense of place and identity, with mainstreets and places to work, live and play. Each Town and Village in York Region will have a role to play in accommodating growth.

Some Towns and Villages act as Local Centres that serve the needs of the surrounding rural settlements, the Agricultural Area and the Rural Area. Historic streetscapes and mainstreet areas within Towns and Villages should be retained and enhanced.

Objective

To ensure the continued vitality of Towns and Villages throughout York Region.

It is the policy of Council:

17. That the boundaries of Towns and Villages identified on Map 1 of this Plan shall be defined within local official plans.
18. That the local community plans for Towns and Villages may also include rural and agricultural designations within their boundaries. Any

Policies on Hamlets in the Oak Ridges Moraine and Greenbelt are included in Chapter 6 Agricultural and Rural Areas.

Hamlets in York Region include:

- Pottageville
- Lloydtown
- Snowball
- Laskay
- Kettleby
- Ansnorveldt
- Victoria Square
- Dickson Hill
- Cedar Grove
- Locust Hill
- Almira
- Teston
- Purpleville
- Holt
- Brown Hill
- Udora
- Ravenshoe
- Baldwin
- Bellhaven
- Virginia
- Musselman's Lake
- Vandorf
- Bloomington
- Gormley
- Gormley-Richmond Hill

- c. recognize the potential for commercial and tourist activity;
- d. recognize the servicing capacity of the community; and,
- e. provide human services for surrounding rural and agricultural areas.

Hamlets

A Hamlet is a small settlement of existing residential and limited commercial, industrial or institutional uses. The majority of York Region's Hamlets exist within the Protected Countryside Area designation of the Greenbelt Plan and within the Countryside Area designation of the Oak Ridges Moraine Conservation Plan.

These communities are usually serviced by individual private on-site wastewater systems and drilled wells. Hamlets were often the first settlements in the Region and are valued for their part in retaining the rural character and cultural heritage resources of the past.

Objective

To retain the rural character and cultural heritage of Hamlets while permitting limited growth through infilling.

It is the policy of Council:

22. That local official plans and zoning by-laws shall designate the boundaries of Hamlets and provide policies that limit future growth to minor infilling, subject to the ability to service growth by individual private on-site water and wastewater systems.
23. That limited small-scale industrial, commercial and institutional uses may be permitted in local official plans, subject to the ability to service the ~~growth~~ use⁶⁸ by individual private on-site water and wastewater systems.
24. That *major development* shall not be permitted in Hamlets.
25. That consents may be permitted in Hamlets, subject to local official plan consents policies and the ability to service the *development* by individual private on-site water and wastewater systems.
26. That residential infilling shall be encouraged to occur in depth rather than along strips and should complement the historic character of the settlement. Any increase in the number of residents through infilling must not change the rural nature of the Hamlet.
27. That the expansion of a Hamlet into a *Specialty Crop Area* is prohibited.
28. That local municipalities may undertake minor rounding out of Hamlet boundaries in accordance with the Greenbelt Plan only at the time of the local municipality's Greenbelt Plan conformity exercise ~~and the Lake Simcoe Protection Plan~~⁶⁹.
29. That where Hamlets occur in *new community areas*, growth in the Hamlet shall be co-ordinated with new community *development* on the surrounding lands to permit the orderly extension of municipal services to the Hamlet.
30. That local municipalities are required to update Hamlet policies in accordance with policies of this Plan and applicable provincial policies.

⁶⁸ [Proposed Provincial Modification 41](#)

⁶⁹ [Proposed Provincial Modification 42](#)

CHAPTER 6

Agricultural and Rural Areas

Agricultural and Rural Areas form an important part of the fabric of York Region, supporting a vibrant agricultural community and contributing to the economy, quality of life and natural heritage legacy. The diverse landscape is one of the things that makes the Region attractive to citizens and business. Approximately 38% of York Region's land use is devoted to farming activities.

The Region has some of the most productive agricultural lands in Canada. The black organic soils in the Holland Marsh in King Township and East Gwillimbury areas, other market gardening areas and the equine industry distinguish the Region. Agricultural production is an important part of the Region's economy, providing jobs and agricultural products.

Approximately 69% of the Region is within the Greenbelt Plan Area, including the Oak Ridges Moraine Conservation Plan Area. The Protected Countryside designation of the Greenbelt Plan contains the land base for agricultural production and protects prime agricultural lands as Agricultural Area, Holland Marsh Specialty Crop Area and the Rural Area. York Region agriculture is evolving due to the influence of the large urban areas within the Region and in the balance of the Greater Toronto Area. This near-urban influence is expected to provide new opportunities and markets for farm operators.

In an effort to assist in identifying the Agricultural Area and Rural Area, a Land Evaluation Area Review, was undertaken. This study analyzed Canada Land Inventory soil capability as well as fragmentation by non-farm uses, conflicting uses and current production. The results of the review were augmented with local and municipal input, to arrive at the identification of Agricultural and Rural Areas shown on Map 8. The Specialty Crop Area is based on the provincial identification of the Holland Marsh Specialty Crop Area in the Greenbelt Plan. Provincial policy requires that the Agricultural Area and the Holland Marsh Specialty Crop Area receive the highest level of protection from incompatible land uses in municipal planning documents.

Agricultural and Rural Areas Goal

To protect the Agricultural, Rural, and Holland Marsh Specialty Crop Areas and support the agricultural industry as essential components of the Regional fabric.

6.1 The Greenbelt Plan

The Greenbelt Plan, including lands within the Oak Ridges Moraine, provides limits to urban expansion in the Region and complements Places to Grow: The Growth Plan for the Greater Golden Horseshoe.

The majority of lands outside of the Urban Area of the Region are within the Greenbelt Plan and Oak Ridges Moraine Conservation Plan. These two Provincial Plans provide protection to agricultural and rural lands and their ecological features and functions.

Objective

To protect Agricultural, Rural, and Holland Marsh Specialty Crop Areas within the Greenbelt from incompatible uses.

It is the policy of Council:

IN THIS CHAPTER:

- 6.1 The Greenbelt Plan
- 6.2 The Oak Ridges Moraine Conservation Plan
- 6.3 Agricultural and Holland Marsh Specialty Crop Areas
- 6.4 Rural Area
- 6.5 Mineral Aggregate Resource Areas

Policies relating to land uses and permitted uses within the Greenbelt Plan are dispersed throughout this Plan, specifically within the following sections:

- 2.1 Regional Greenlands System: A Sustainable Natural Environment Legacy
- 2.2 Natural Features: Components of the Greenlands System
 - Oak Ridges Moraine, Greenbelt and Lake Simcoe Watershed Features
- 3.4 Cultural Heritage
- 5.6 Building Complete, Vibrant Communities
- 6.3 Agricultural and Holland Marsh Specialty Crop Areas
- 6.4 Rural Area
- 6.5 Mineral Aggregate Resource Areas
- 7.3 Water and Wastewater Servicing
- 8.3 The Planning Process

1. That lands within the Greenbelt Plan are identified as Protected Countryside on Map 1 of this Plan. While the Greenbelt Plan includes the Oak Ridges Moraine Conservation Plan Area, the policies of the Oak Ridges Moraine Conservation Plan prevail in the area of its coverage.
2. That prime agricultural lands and specialty crop lands within the Greenbelt Plan in York Region are designated as Agricultural Area and Holland Marsh Specialty Crop Area, respectively on Map 8.
3. That local municipalities shall identify the Greenbelt Protected Countryside and the Natural Heritage System in local official plans and determine specific permitted uses to meet the requirements of the Greenbelt Plan and this Plan.

~~4. That refinements to either the Agricultural Area or Rural Area designations found in the Greenbelt and shown on Map 8, are not permitted unless undertaken through a Regional municipal comprehensive review or the provincial review of the Greenbelt Plan in 2015.~~⁷⁰

4. That lands designated as Agricultural Area, Rural Area or Urban Area in this Plan that are also part of the Natural Heritage System in the Greenbelt Plan are subject to the Regional Greenlands System policies of Section 2.1 of this Plan, and are intended to function as part of the Regional Greenlands System in the long term.
5. That new multiple units or multiple lots, as defined in the Greenbelt Plan, for residential dwellings, such as estate residential developments, adult lifestyle, and retirement communities are prohibited, except in the Serviced Lakeshore Residential Area in the Town of Georgina existing at the date of approval of this Plan.
6. That transportation, infrastructure and utilities are permitted in the Greenbelt Plan Area, in all land use designations shown on Map 8, and *key natural heritage features* and *key hydrologic features*, where the provisions of the Greenbelt Plan have been met. Demonstrated need for a project and conformity with the Greenbelt Plan will be assessed and included as part of an Environmental Assessment Act process. If an Environmental Assessment Act process does not apply, the requirements of the Greenbelt Plan will be met through Planning Act, Condominium Act, Local Improvement Act processes, or other applicable approval processes.
7. That where there is a conflict between policies of this Plan, local official plans and the Greenbelt Plan, the more restrictive policy shall apply. with the exception of lot creation policies as set out in the Greenbelt Plan. Local official plans and zoning bylaws shall not be more restrictive as they apply to agricultural uses and mineral aggregate resources. ~~except, mineral aggregate and wayside pits, where this Plan and local official plans cannot be more restrictive than the Greenbelt Plan.~~
8. That the Rouge Park connecting Lake Ontario to the Oak Ridges Moraine in eastern Markham, Whitchurch-Stouffville, and Richmond Hill is contained within the Greenbelt Plan and the Regional Greenlands System. Within the Rouge Park, land uses shall be permitted in accordance with the Greenbelt Plan and the Rouge North Management Plan.

⁷⁰ Proposed Provincial Modification 43

9. That within the Town of Richmond Hill, the Greenbelt Plan policies apply only to those lands within major river valleys and as defined by provincial regulations. Local municipal land use designations and special provisions within these portions of the Greenbelt Plan have been identified through the approval of the North Leslie Secondary Plan by the Ontario Municipal Board in 2006 and ~~2009~~/2010.
10. That the Keswick Business Park Study Area is subject to Section 3.4.4 of the Greenbelt Plan and special provisions in the Official Plan of the Town of Georgina. Any development of these lands will require an amendment to this Plan and the local official plan.

~~12.11. That the Vandorf Preston Lake Community Plan is subject to Section 3.4.4 of the Greenbelt Plan and policy 5.6.31 of this Plan.~~

Formatted: Bullets and Numbering

6.2 The Oak Ridges Moraine Conservation Plan

The Oak Ridges Moraine is one of Ontario's most significant landforms. Located north of Lake Ontario, the Moraine in York Region divides the watersheds draining south into Lake Ontario from those draining north into Lake Simcoe. The Moraine shapes the present and future form and structure of the Greater Toronto Area. Its ecological and hydrological features and functions are critical to the area's continuing health.

Through the Oak Ridges Moraine Conservation Act, 2001 and the accompanying Oak Ridges Moraine Conservation Plan, the Province has directed the protection, restoration, and enhancement of the Oak Ridges Moraine's ecological and hydrological features and functions.

The major provisions of the Oak Ridges Moraine Conservation Plan that are relevant at the Regional level have been incorporated into this Plan, however, these policies must be read in conjunction with the detailed provisions of the Oak Ridges Moraine Conservation Plan and applicable local official plans and zoning by-laws.

Objective

To protect and where possible improve or restore the ecological and hydrological integrity of the Oak Ridges Moraine.

It is the policy of Council:

1. To recognize the boundary and land use designations of the Oak Ridges Moraine Conservation Plan Area as shown on Map 1. Along the southern boundary of the Moraine, east of Bathurst Street, the Oak Ridges Moraine Conservation Plan applies to lands within that Plan boundary and above the 245 metre above sea level Canadian Geodetic Datum contour line. In the event of a question regarding plan applicability in this area, the Region will require a topographic survey certified by an Ontario Land Surveyor, and based on field surveys tied to Ontario Geodetic Datum before planning decisions are made on specific applications.

Where lands are within the Oak Ridges Moraine Conservation Plan boundary, but below the elevation of 245 metre above sea level Canadian Geodetic Datum, the lands are deemed to be within the Protected Countryside of the Greenbelt Plan and all of the policies of the Greenbelt Plan apply.

Policies relating to specific land uses within the Oak Ridges Moraine Conservation Plan are dispersed throughout this Plan, specifically within the following sections:

- 2.1 Regional Greenlands System: A Sustainable Natural Environment Legacy
- 2.2 Natural Features: Components of the Greenlands System
 - Oak Ridges Moraine, Greenbelt and Lake Simcoe Watershed Features
- 3.4 Cultural Heritage
- 5.6 Building Complete, Vibrant Communities
- 6.3 Agricultural and Holland Marsh Specialty Crop Areas
- 6.4 Rural Area
- 6.5 Mineral Aggregate Resource Areas
- 7.3 Water and Wastewater Servicing
- 8.4 Interpretation

2. That the Oak Ridges Moraine Conservation Plan, identifies land use designations and permitted uses, including the following:
 - a. Natural Core Areas have a high concentration of key natural heritage features, key hydrologic features, and/or landform conservation areas and are critical to maintaining the integrity of the Moraine as a whole. New permitted uses are very limited and may include conservation and resource management, low intensity-recreation, or *agricultural uses*, as detailed in the Oak Ridges Moraine Conservation Plan.
 - b. Natural Linkage Areas form part of a central corridor system that supports or has the potential to support movement of plants and animals between the Natural Core Areas, Natural Linkage Areas, river valleys and stream corridors. Limited new uses may include those permitted in the Natural Core Area designation, as well as mineral aggregate operations and wayside pits, as detailed in the Oak Ridges Moraine Conservation Plan.
 - c. Countryside Areas contain rural land uses, which may include agriculture, land extensive *major recreational uses*, ~~open space~~, major institutional, Hamlets, mineral aggregate operations, recreational and open space. Small-scale industrial, commercial, institutional and recreational uses shall be directed to Hamlets, Towns and Villages and the Urban Area.

Hamlets, designated within local official plans and located within the Countryside Area are generally depicted on Map 1 and are intended to provide opportunities for minor residential infill and small-scale industrial, commercial and institutional and recreational uses in accordance with the policies of this Plan and local official plans.

Land extensive *major recreational uses*, and small scale industrial, commercial and institutional uses are not permitted to locate in the Agricultural Area shown on Map 8.⁷¹
 - d. The Urban Area and Towns and Villages are intended to be the focus of growth. These areas permit a full range of residential, commercial, industrial, and institutional uses.
3. That the Oak Ridges Moraine Conservation Plan designation of Settlement Areas includes portions of the Urban Area (Aurora, Newmarket, Richmond Hill, and Vaughan) and Towns and Villages (Ballantrae, King City, Mount Albert, Nobleton, and Stouffville). In these areas, policies contained in Chapter 5 of this Plan and local official plans shall guide permitted development. Where the local official plan is more restrictive than this Plan, the more restrictive policies shall apply.
4. To work with local municipalities, adjacent Regions, the Province and stakeholders in implementing the Oak Ridges Moraine Conservation Plan.
5. To require local official plans and zoning by-laws to include appropriate policies to implement the requirements of the Oak Ridges Moraine Conservation Plan.

⁷¹ Proposed Provincial Modification 44

6. To support local municipalities in adopting innovative approaches to implementing the Oak Ridges Moraine Conservation Plan, including but not limited to the use of development permits or zoning.
7. That local municipalities shall adopt site alteration and tree-cutting by-laws in conformity with the Municipal Act in accordance with provisions of the Oak Ridges Moraine Conservation Act, 2001.
8. That applications for *development* or *site alteration* within the Oak Ridges Moraine Conservation Plan Area will only be considered where they comply with the provisions of the Oak Ridges Moraine Conservation Plan.
9. That existing institutional uses and expansions are permitted subject to the Existing Use provisions of the Oak Ridges Moraine Conservation Plan and local official plans and zoning by-laws. When expansion of such uses is applied for, the applicant shall demonstrate that the expansion will not adversely affect the ecological integrity of the Oak Ridges Moraine Conservation Plan Area. Additional studies as identified in Parts III and IV of the Oak Ridges Moraine Conservation Plan may be required.
10. That all applications, matters or proceedings as defined under the Oak Ridges Moraine Conservation Act, 2001, commenced on or after November 17, 2001 are required to conform with the Oak Ridges Moraine Conservation Plan.
11. That applications in Natural Core, Natural Linkage and/or Countryside Areas that were commenced but were not decided prior to November 17, 2001, as defined in the Oak Ridges Moraine Conservation Act, 2001, are required to conform with the prescribed provisions of the Oak Ridges Moraine Conservation Plan.
12. That applications in the Natural Core and/or Natural Linkage Areas that were commenced and decided before November 17, 2001 as defined in the Oak Ridges Moraine Conservation Act, 2001 are not subject to the provisions of the Oak Ridges Moraine Conservation Plan provided that the use, building or structure for which the application was intended ~~was~~ is legally existing ~~at that time~~ as of March 27, 2003.
- ~~13. That notwithstanding policies 6.2.9, 6.2.10 and 6.2.11, where a planning application is submitted after November 17, 2001 as a direct result of a condition attached to a provisional consent, a draft plan of subdivision or a draft plan of condominium, the application shall be completed under the same system in effect as the original approval in accordance with the Further Approvals provisions of the Oak Ridges Moraine Conservation Act, 2001, as amended. In addition, any development permission established by such a further approval may be recognized in the local municipal official plan and zoning by law.~~
- ~~13.~~ ~~14.~~ That estate residential developments, adult lifestyle and retirement communities created by plans of subdivision or condominium are prohibited in the Natural Core, Natural Linkage and Countryside designations of the Oak Ridges Moraine unless all required applications meet the transitional provisions of the Oak Ridges Moraine Conservation Act, 2001, ~~as amended~~.
- ~~14.~~ ~~15.~~ That applications for *major development* are required to meet the provisions of the Oak Ridges Moraine Conservation Plan.

York Region's Land Evaluation Area Review

A numerical rating system for each lot and concession, designed to determine the long-term agricultural potential of land and assist in identifying prime agricultural areas.

York Region has utilized this review to refine Map 8 and the policies of the Agricultural and Rural sections of this Plan.

Land Evaluation	Area Review
Canada Land Inventory values	Fragmentation; Conflicting uses; Current production
65% of total score	35% of total score
Threshold of 6.0	
Score > 6.0 is potential Prime Agriculture	
Score < 6.0 is potential Rural	

15. ~~16.~~ That transportation infrastructure and utilities are permitted in all Oak Ridges Moraine land use designations, and *key natural heritage features* and *key hydrologic features*, where the Infrastructure provisions of the Oak Ridges Moraine Conservation Plan have been met. Demonstrated need for a project and conformity with the Oak Ridges Moraine Conservation Plan will be assessed and included as part of an Environmental Assessment Act process. If an Environmental Assessment Act process does not apply, the requirements of the Oak Ridges Moraine Conservation Plan will be met through Planning Act, Condominium Act, Local Improvement Act, or other applicable approval processes. The opening of a street within an unopened street allowance is prohibited unless all other requirements of the Oak Ridges Moraine Conservation Plan are met.
16. ~~17.~~ To request that the Province clarify the provisions of the Oak Ridges Moraine Conservation Plan with respect to *alternative energy systems* and *renewable energy systems*, either prior to or as part of the 2015 review of the Oak Ridges Moraine Conservation Plan.
17. ~~18.~~ That where a term is defined in the Oak Ridges Moraine Conservation Plan, those definitions shall prevail over those contained in this Plan.
18. ~~19.~~ That where there is a conflict between this Plan, local official plans and the Oak Ridges Moraine Conservation Plan, the more restrictive policies shall apply.

6.3 Agricultural and Holland Marsh Specialty Crop Areas

York Region has some of the most productive agricultural lands in Canada, including the black organic soils of the provincially significant Holland Marsh Specialty Crop Area in King Township and East Gwillimbury, as well as muck soil areas in Georgina. The Region also has several areas with world-renowned equine facilities.

The agricultural sector contributes significant value to the Regional economy yearly. The Holland Marsh alone generates between \$95 and \$169 million of economic activity yearly to the Provincial economy.

While agricultural lands are protected within the Greenbelt Plan Area, there are also prime agricultural lands outside of the Greenbelt ~~and in~~ ~~within the new community areas.~~ This Plan recognizes and encourages agricultural uses. In new community areas, this Plan encourages agricultural uses on lands until such time as development occurs. ~~on lands in the new community areas until urban expansion is necessary. Agricultural uses in the new community areas and in the Rural Area~~ Within and outside of the Greenbelt Plan, agricultural uses are important to the Region's economy and as a source of local agricultural production.⁷²

Objectives

To protect Agricultural and Holland Marsh Specialty Crop Areas for the future to ensure a sustainable agricultural industry.

To support York Region's farmers and agricultural organizations as valuable contributors to the community.

It is the policy of Council:

⁷² Proposed Provincial Modification 45

1. To recognize and protect the Agricultural Area and the Holland Marsh Specialty Crop Area, designated on Map 8, as natural resources of major importance to the economic and social viability of the Region.
2. That within the Agricultural Area and Holland Marsh Specialty Crop Area, *normal farm practices* and a full range of *agricultural uses*, *agriculture-related uses* and *secondary agricultural uses* are supported and permitted.
3. That uses not related to Agriculture are prohibited within the Agricultural Area and Holland Marsh Area. ~~That non-agricultural uses are prohibited within the Agricultural Area and Holland Marsh Specialty Crop Area.~~
4. That outside of the Greenbelt Plan and the Oak Ridges Moraine Conservation Plan, refinements to either the Agricultural Area or the Rural Area, shown on Map 8, are not permitted unless undertaken through a *Regional municipal comprehensive review*⁷³.
5. That the Agricultural Area and Holland Marsh Specialty Crop Area shall be designated and protected in local municipal official plans and zoning by-laws.
6. That temporary farm related uses such as farm-gate sales of produce or goods primarily grown or made on the farm shall be permitted subject to local municipal requirements.
7. That new permitted land uses, consents, and new or expanding livestock operations shall comply with the Province's *Minimum Distance Separation Formulae*.
8. That consents will only be permitted in the Agricultural Area and Holland Marsh Specialty Crop Area in the following instances:
 - a. acquisition of land by a public body for infrastructure projects;
 - b. conveyances to public bodies or non-profit agencies for natural heritage or conservation purposes, providing no separate residential lot is created;
 - ~~c. minor boundary adjustments to enlarge existing farm lots providing no separate residential lot is created;~~
 - c. minor lot adjustments or boundary additions, provided they do not create a separate lot for a residential dwelling in specialty crop or prime agricultural areas and there is no increased fragmentation of a key natural heritage feature or key hydrologic feature.⁷⁴
 - d. agricultural uses where both the subject and retained lands are a minimum size of 16 hectares (40 acres) in the Holland Marsh Specialty Crop Area and 40 hectares (100 acres) in the Agricultural Area;
 - e. existing or new *agriculture-related uses*, such as farm-related commercial and farm-related industrial uses that are small in scale and directly related to the farm operation and required to be located in close proximity to the farm operation. In these

Holland Marsh Specialty Crop Area

⁷³ Proposed Provincial Modification 67

⁷⁴ Proposed Provincial Modification 46

- cases, the new lot will be limited to the minimum size required for the use and appropriate individual private on-site water and wastewater systems will be required; or,
- f. severance of an existing residence that is surplus to a farming operation as a result of a farm consolidation, providing no additional residence can be constructed on the retained farmland.
9. That notwithstanding policy 6.3.8.e of this Plan, a consent for an *agriculture-related use* is not permitted on the Oak Ridges Moraine.
 10. That additional residential structures for farm help required for *agricultural uses* on the farm, may be permitted, subject to local municipal requirements and if grouped with existing farm structures. A consent to sever these structures from the main *agricultural use* is prohibited.
 11. That within the Agricultural Area in those portions of Markham, Vaughan, ~~and~~ East Gwillimbury ~~and King~~ not within the Oak Ridges Moraine or Greenbelt, *normal farm practices* and a full range of *agricultural uses, agriculture-related uses and secondary agricultural uses* shall be permitted and encouraged.
 - ~~12.~~ That Urban Area expansions justified through the Region's municipal comprehensive review and land budget shall not require an agricultural justification report.⁷⁵
 - ~~13.~~ That within the Holland Marsh Specialty Crop Area, the Region will encourage and support the Province in balancing continued agricultural production and potential expansion with natural heritage values and policies.⁷⁶
 - ~~14.~~ ~~12.~~ To work with the farm community, agricultural organizations and conservation authorities to implement best management practices for integrated pest management, phosphorus reduction, nutrient management and soil and water conservation on agricultural lands.
 - ~~15.~~ ~~13.~~ To promote agricultural practices which minimize impacts on air quality and climate change, such as no-till farming.
 - ~~16.~~ ~~14.~~ To discourage the removal of topsoil and encourage local municipalities to enact by-laws, under the Municipal Act, to regulate the removal of topsoil.
 - ~~17.~~ ~~15.~~ That *alternative energy systems and renewable energy systems* shall be permitted within the Agricultural Area, but not within the Holland Marsh Specialty Crop Area except in accordance with provincial and federal requirements. Any such systems not exempt from Planning Act approvals⁷⁷ within the Greenbelt shall be subject to the policies of the Greenbelt Plan and shall be designed to minimize disturbance on agricultural operations.
 - ~~18.~~ ~~16.~~ That in addition to uses permitted in policy 6.3.2 of this Plan, on those lands identified on Map 5 as Conservation Area/Regional Forest or Provincial Park/Nature Reserve, a full range of public open space uses, including environmental education and demonstration projects, passive and active recreation, and associated facilities are permitted.

⁷⁵ Proposed Provincial Modification 47

⁷⁶ Proposed Provincial Modification 48

⁷⁷ Proposed Provincial Modification 49

Local Agriculture

Access to a safe, secure food supply is a basic human right. York Region supports activities to ensure that food sources and agricultural production remain available locally and will work with local organizations to assist farmers in bringing locally grown and produced food and other agricultural products from farm to table.

Objective

To ensure agricultural land is available for growing and producing, among other things, local food that is accessible to York Region residents and neighbouring communities.

It is the policy of Council:

~~19-17.~~ To support local food production and procurement through means such as a Local Food Charter, buying and production co-operatives, farm-to-table programs, and farmers' markets at key locations in York Region communities.

~~20-18.~~ To support York Region's agricultural industry and assist the industry in responding to changing conditions and markets, by considering:

- a. supporting local farm organizations in promoting the availability of local food and value-added products, including the development of local farm markets and farm-gate sales, subject to public health and safety standards;
- b. promoting a variety of agricultural products originating within the Region and where possible assisting local farmers in diversifying agricultural products;
- c. encouraging continuing agriculture on lands adjacent to all communities in York Region as a source of local food;
- d. encouraging the provision of community gardens and other urban agriculture practices, but not including animal agriculture in new and existing communities;
- e. developing local food-sourcing policies for Regional facilities and encouraging other public sector agencies within the Region to adopt similar policies; and,
- f. encouraging dialogue with other levels of government, local farmers and farm organizations in York Region to ensure that the agricultural industry remains competitive, sustainable and viable in the long term.

~~21-19.~~ To support the Greater Toronto Area Agricultural Action Plan as a blueprint to strengthen the agricultural economy in the Greater Toronto Area.

~~22-20.~~ To encourage the Province to proactively assess, encourage and promote policies and programs directed to the production, distribution and use of local food by residents and business.

Farmer's Markets and Agricultural Festivals in York Region

- Aurora Farmers' Market
- Newmarket Main Street Farmers' Market
- Georgina Farmers' Market
- Markham Farmers' Market
- Downtown Stouffville's Farmers' Market
- Sutton Fair and Horse Show
- Markham Fair
- Woodbridge Fall Fair
- Kettleby Fair

Formatted: Bullets and Numbering

- Writtlebury-Stouffville's Strawberry Festival
- Stiver Mill Farmers' Market in Unionville
- Main Street Markham Farmers' Market
- York Farmers' Market

Eating Locally:

- Sustains small farms
- Supports the local economy
- Improves air quality and pollution by reduced travel time
- Keeps us in touch with the seasons
- Provides fresher and healthier food choices
- Reduces vulnerability to oil shortages and transportation problems
- Reduces chance of large-scale food contamination

Formatted: Bullets and Numbering

6.4 Rural Area

The Rural Area includes viable farms, businesses, and land uses such as equestrian facilities, farm markets, rural settlements, existing rural residential

- d. that there are no negative impacts on key natural heritage or hydrologic features and functions, biodiversity or connectivity of the Regional Greenlands System.
6. That non-resource-based industrial and commercial uses and institutional uses shall be directed to the Urban Areas, Towns and Villages and Hamlets.
7. That new land extensive *major recreational uses*, such as golf courses and outdoor playing fields, or expansion to these uses, may be permitted in the Rural Area subject to an amendment to ~~this Plan and~~⁷⁸ the local official plan and zoning by-law, where the following provisions are met to the satisfaction of the Region and local municipality:
- a. the size of the use is appropriate for the area and will not further fragment the Rural Area;
 - b. the proposed use will not introduce a conflicting use that adversely impacts ongoing agricultural activities or related uses in the immediate and surrounding areas;
 - c. there is a plan to enhance and improve connections between *key natural heritage features* and *key hydrologic features*;
 - d. there is an integrated pesticide and fertilizer management plan that minimizes or excludes applications,;
 - e. water conservation, wastewater and stormwater management plans that ensure adequate water quality and quantity are submitted; and,
 - f. the provisions of the Oak Ridges Moraine Conservation Plan, Greenbelt Plan or the Lake Simcoe Protection Plan are met, where applicable.
8. That notwithstanding policy 6.4.5, new *cemeteries* and accessory uses such as mausolea, columbaria, small scale chapels, expansions of existing *cemeteries*, but not freestanding places of worship, may be permitted in the Rural Area of the Greenbelt Plan subject to an amendment to this Plan and the local official plan and zoning by-law, where the following provisions are met to the satisfaction of the Region and local municipality:
- a. the area and capacity of the *cemetery* and the accessory uses are appropriate for the Rural Area and intended to serve the Region's population, as demonstrated by a demand analysis based on the 2031 planning horizon;
 - b. the proposal demonstrates opportunities for alternative interment or burial practices meeting the needs of a diverse cultures and efficient use of the land area;
 - c. lands are not available for *cemetery* uses in the existing Urban Area, Towns and Villages or Hamlets in the Regional market area;
 - d. the *cemetery* and accessory uses will not create the need to develop other uses, such as a freestanding place of worship on the site in the future;

⁷⁸ Additional Proposed Regional Modifications 76

- e. appropriate hydrological and hydrogeological studies have been completed, which indicate that the use will not have adverse impacts on the quality and quantity of ground and surface water on or nearby the site or a *Wellhead Protection Area*;
 - f. the proposal has no adverse traffic, parking or visual impacts on the surrounding land uses or residents and maintains the rural character of the area;
 - g. there is an enhancement plan that demonstrates the use of existing site characteristics, such as topography and vegetation, identifies natural native vegetation enhancement and sequential plantings, including opportunities for memorial groves and the establishment of arboreta, improvements to connectivity between key natural heritage features and key hydrologic features, provides for the development of a forest canopy; and,
 - h. the use conforms with the policies in Chapter 2 of this Plan.
9. That consents may be permitted in the Rural Area subject to the criteria contained in policy 6.3.8, and local official plans and zoning by-laws.
- ~~10. That notwithstanding policy 6.4.9, fragmentation of the Rural Area in existing agricultural use through consents shall generally be discouraged.~~⁷⁹
- ~~11. 10.~~ To work with the Town of Georgina and others in formulating additional local official plan policies to recognize the unique aspects of the municipally serviced lakeshore areas between the urban area of Keswick and Sutton/Jackson's Point. Such policies will conform with the Greenbelt Plan and the Lake Simcoe Protection Plan and the policy direction of this Plan.
- ~~12. 11.~~ That lands within the Rural Area generally to the west of the community of Sutton along the Lake Simcoe shoreline are subject to the Lakeshore Residential Policies of the Georgina Official Plan.
- ~~13. 12.~~ That *alternative energy systems* and *renewable energy systems* shall be permitted within the Rural Area in accordance with provincial and federal requirements. Any such systems within the Greenbelt Plan Area shall be subject to the policies of the Greenbelt Plan.
- ~~14. 13.~~ That within the Oak Ridges Moraine Conservation Plan Countryside Designation in the Town of Aurora, on lands described as Part 2 of Plan 65R-11866 and Plan 65R-15508, a cluster residential development in condominium ownership is permitted subject to the following:
- a. servicing shall be by a privately owned and operated communal wastewater treatment system and a privately owned and operated communal water system, approved through a Class Environmental Assessment or equivalent process which includes the following:
 - i. an inventory of the existing environment and possible impacts;
 - ii. an evaluation of alternatives in consultation with affected agencies;

⁷⁹ Proposed Provincial Modification 50

2.1.23 of this Plan. A zoning by-law amendment shall be required to permit such facilities in areas of existing development.

10. To minimize the adverse effects of wayside pits and quarries in accordance with all government legislation, standards and policies.
11. To encourage the use of alternative materials to sand and gravel and the reuse of construction materials where possible to ensure conservation of existing aggregate supply.
12. To require the rehabilitation of abandoned pits and quarries and the progressive rehabilitation of operating pits and quarries in a manner that is in conformity with other policies of this Plan.

~~13.~~ That following surrender of an aggregate licence, where the rehabilitation of a pit or quarry uses fill materials, the owner/operator may be required to provide financial guarantees to ensure groundwater or adjacent Regional or private well supplies will not be contaminated. Further, the owner/operator of the pit or quarry shall be required to retain an on-site environmental inspector to ensure that all fill materials are inert.⁸⁰

Formatted: Bullets and Numbering

~~14.~~ ~~13.~~ That mineral aggregate extraction may occur in the Agricultural Area on an interim basis provided rehabilitation of the site will be carried out so that substantially the same areas and same average soils quality for agriculture is restored. In the following cases, complete agricultural rehabilitation is not required:

- a. where there is a substantial quantity of aggregate below the water table such that the depth of the extraction makes restoration to pre-extraction levels unfeasible; or,
- b. where other alternatives have been considered by the applicant and found unfeasible in accordance with the Provincial Policy Statement.

~~15.~~ ~~14.~~ That within the Greenbelt Plan Area, and the Oak Ridges Moraine Conservation Plan Area, existing and new mineral aggregate operations and wayside pits shall comply with the provisions of the applicable Provincial Plan.

Formatted: Bullets and Numbering

~~16.~~ ~~15.~~ That outside of the Oak Ridges Moraine and Greenbelt, but within the *Lake Simcoe watershed*⁸¹, applications for new mineral aggregate operations and wayside pits and quarries shall comply with the Lake Simcoe Protection Plan.

~~17.~~ ~~16.~~ To protect petroleum resources for long term use. Exploration and production of petroleum resources is a permitted activity in all land use designations except the Urban Area, Towns and Villages, the Natural Core Area of the Oak Ridges Moraine Conservation Plan, *evaluated wetlands*, and *significant habitat of endangered and threatened species*.

~~18.~~ ~~17.~~ That development on, abutting, or adjacent to lands affected by oil, gas and salt hazards or petroleum resource operations, may be permitted only if rehabilitation measures to address and mitigate known or suspected hazards are underway or have been completed. Buildings

⁸⁰ Proposed Provincial Modification 51

⁸¹ Proposed Provincial Modification 64

may not be constructed within 75 metres of an active or unplugged petroleum well.

~~19.~~18. That rehabilitation of petroleum wells must be conducted according to the applicable legislation and its regulations and standards and all activities adjacent to a petroleum well shall be conducted in accordance with a well licence from the Province. Mapping of these resources may be obtained from the Province.

CHAPTER 7

Servicing Our Population

York Region is committed to providing state-of-the-art services for both residents and businesses, which are vital to maintaining and improving quality of life and economic competitiveness. Services include transit, streets, water, wastewater, waste management, energy, rail, airports, utilities, and communications operated by a variety of public and private sector agencies. The effective provision of services involves reducing demand while expanding and updating existing infrastructure. This approach requires a strong policy framework, dynamic partnerships and sustainable infrastructure investment from all levels of government.

The policies of this section co-ordinate the provision of services with the city and community building policies of this Plan, in keeping with the goals of the York Region Sustainability Strategy: Towards a Sustainable Region. The policies support the long term vision of the York Region Pedestrian and Cycling, Transportation, and Water and Wastewater Master Plans.

Servicing Our Population Goal

To provide the services required to support the Region's residents and businesses to 2031 and beyond, in a sustainable manner.

7.1 Reducing the Demand for Services

York Region has adopted a conservation-first approach to servicing the needs of residents. This approach aims to maximize the use of existing infrastructure while strategically leveraging future infrastructure investments. The intent is to improve the quality of life of residents by promoting healthy lifestyles while also managing the financial impacts of growth and enhancing the natural environment.

A reduction in the relative demand for services across the Region is predicated on a greater awareness and behavioural change by residents, employers and policy makers. The policies of this Plan create an environment that supports conservation as a comfortable, cost-effective and convenient alternative to traditional consumptive lifestyles.

Trip Reduction

York Region's approach to transportation planning is focused on making efficient use of existing and future transportation infrastructure. At the forefront of this approach is a comprehensive **T**ransportation **d**emand **M**anagement program that promotes walking, cycling, transit use and a per capita reduction in trips taken. To reduce automobile dependence, alternative transportation options need to be safe, convenient, and reliable. Diverting automobile trips towards more sustainable modes of transportation will reduce the need to expand infrastructure, enhance air quality and protect the Region's natural heritage. This goal requires a combination of infrastructure investment, supportive policies and partnerships.

A more compact, mixed-use urban form is required to encourage alternative modes of transportation and to make people, rather than vehicles, the focus of street activity. Changes to the transportation system, land use planning, and

IN THIS CHAPTER:

- 7.1 Reducing the Demand for Services
- 7.2 Moving People and Goods
- 7.3 Water and Wastewater Servicing
- 7.4 Waste Management
- 7.5 Energy and Utilities

Alternative work arrangements and incentive programs include:

- Telework - Allowing staff to occasionally work from home using internet technology
- Compressed Work Week - Working longer days to earn regular time off and reduce trips to work
- Flex time - Shifting the start and end of the work day to avoid peak period travel.
- Employer-discounted transit passes
- Preferential parking spaces for carpoolers

~~t~~Transportation ~~d~~Demand ~~m~~Management policies and programs will help create an environment where walking, cycling and transit are comfortable and convenient ways to reach employment, recreation and cultural destinations in York Region and across the Greater Toronto and Hamilton Area.

Objective

To reduce automobile dependence by enhancing opportunities for residents and workers to walk, cycle, take transit, and carpool.

It is the policy of Council:

1. To require that appropriate ~~t~~Transportation ~~d~~Demand ~~m~~Management measures to reduce single occupancy automobile trips are identified in transportation studies and in *development* applications.
2. To work with local municipalities, Metrolinx and other stakeholders to support local Smart Commute associations.
3. To manage the supply of parking in Regional Centres and Corridors, consistent with the policies in Section 5.4 of this Plan.
4. To investigate establishing a Regional Parking Authority or municipal parking authority framework in conjunction with local municipalities.
5. To work with local municipalities to develop a co-ordinated approach to parking and parking management, consistent with the parking policies in Chapter 5 of this Plan.
6. To work with local municipalities to update the York Region Transit-Oriented Development Guidelines to provide greater emphasis on trip reduction and to identify key benchmarks and targets.
7. To require new *development* applications to demonstrate that the *development* meets or exceeds the York Region Transit-Oriented Development Guidelines.
8. To work with developers to provide all new-home buyers with information on available pedestrian, cycling and transit facilities and carpooling options within the community, including local transit routes and schedules.
9. To require that new institutional, commercial and industrial *development* applications include a ~~transit-demand~~ Transportation Demand Management strategy that considers ~~s~~ preferential carpool parking, bicycle facilities, employee transit passes, and alternative work arrangements.
10. To work with institutional, commercial and industrial employers to undertake ~~transit-demand~~ Transportation Demand Management strategies to encourage preferential carpool parking, bicycle facilities, employee transit passes, and alternative work arrangements.
11. To require local municipalities to adopt land use and site design policies that promote ~~alternative-sustainable~~ modes of transportation, including walking, cycling, transit, and carpooling.
12. To implement transit pass bulk-buying programs for employers and to encourage employers to provide transit passes in lieu of parking.
13. To partner with the Province and Metrolinx to provide transit service to carpool lots along 400-series highways.
14. To promote, in partnership with Smart Commute, employer-based initiatives and policies that reduce the need for peak-period trips,

including alternative work arrangements, transit incentives, and carpooling.

15. To encourage retailers and community facilities to provide discounts and incentives to those using transit and active forms of transportation.
16. To develop a discounted university and college transit pass program [in partnership](#) with educational institutions.
17. To partner with Metrolinx, the private sector and non-governmental agencies to deliver real-time information on commuting options.
18. To explore and leverage opportunities for funding from the Province and Federal government, as well as from other funding sources, for [I](#)ntermodal [D](#)emand [M](#)anagement measures and programs.

Water Conservation and Efficiency

Water conservation and efficiency measures are essential components of York Region's long term water supply strategy. These measures help to meet new demand in a cost-effective manner. The savings resulting from water conservation and efficiency measures assist in deferring other more costly capital projects.

York Region's Water for Tomorrow Program is a comprehensive water conservation and efficiency program that aims to lower demand for water, increase the efficiency of water infrastructure through leakage reduction, provide water audits for large water users, retrofit residential and commercial buildings, and provide education and outreach. This program demonstrates York Region's commitment to water conservation and efficiency.

Objective

To ensure adequate water resources for today's residents and future generations, through conservation and efficiency.

It is the policy of Council:

19. To develop a long term, innovative strategy for water conservation and efficiency.
20. To update and implement the York Region 10-Year Water Efficiency Master Plan to ensure long term water efficiency, conservation, cost savings, and public education.
21. To investigate full cost pricing of water, in co-operation with local municipalities, to encourage water conservation and facilitate system improvements.
22. To pursue with local municipalities and conservation authorities the implementation of water efficiency innovations such as water reuse systems, rainwater harvesting and innovative stormwater management.
23. To investigate innovative wastewater treatment technologies and approaches including grey water reuse, naturalized wastewater treatment and water recycling in residential, commercial, institutional and industrial uses.
24. To reduce the amount of water used in the Region's construction projects.

Water for Tomorrow Successes

Since 1998:

- Over 20-million litres of water savings per day (enough to supply a town of 70,000 people)
- Reduction of 14,375 tonnes per year of carbon dioxide emissions
- Over 350,000 water-efficient fixtures installed
- Over 1,800 kilometres of municipal watermain tested for leakage
- Over 8,000 water-efficient landscape audits completed
- Over 37,000 students have attended the annual York Children's Water Festival
- Recipient of numerous national and international awards

12. To encourage property owners to provide facilities such as benches, shelters and secure bicycle storage at major destinations, including employment, educational, institutional and shopping locations.
13. To co-ordinate Regional and local pedestrian and cycling networks with trail connections to the Regional Greenlands System trails network, where appropriate.
14. To develop and promote a continuous pedestrian and cycling path from Lake Simcoe to Lake Ontario in partnership with local municipalities and the City of Toronto.
15. To encourage the development and implementation of local municipal pedestrian and cycling master plans.
16. To partner with the York Region District and Catholic School Boards to implement the Active and Safe Routes to School program, and to design and locate school campuses to promote walking, cycling and transit as a primary means of transportation.
17. To work with the Province, Metrolinx and other partners to develop innovative programs that support active transportation, such as cycling safety training, education and information, bicycle sharing programs and bicycle libraries.
18. To encourage the Province and Federal government to provide funding and tools to support the development and promotion of active transportation as part of a healthy, active lifestyle.

Transit

An expanded, **well-integrated comprehensive and inter-connected** public transit system is required, both to reduce vehicular traffic and to provide access to jobs and services. A well-integrated public transit system in York Region is essential to enhancing the quality of life for residents and workers. A more compact, mixed-use urban form will encourage and support a higher level of transit service, while helping to reduce the overall average trip length required for work, shopping, school, recreation and other purposes. The York Region Transportation Master Plan sets immediate and long term public transit goals that form the basis for the transit network.

The establishment of two subway routes and a series of rapid transit and transit priority corridors are the cornerstones of York Region's transit network. This system complements a comprehensive pedestrian and cycling network, expanded Metrolinx rail and bus service, an aggressive **I**ransportation **D**emand **M**anagement program and the development of transit-supportive complete communities. All major communities within the Region should be linked by public transit. An integrated and co-ordinated public transit system will serve most of the travel needs of potential riders at a reasonable cost.

York Region's continued commitment to improving transit services in partnership with local municipalities, Metrolinx, the Toronto Transit Commission, the Province, Federal government and other stakeholders is consistent with the Places to Grow: Growth Plan for the Greater Golden Horseshoe and with the Metrolinx Regional Transportation Plan: The Big Move.

Objective

To provide transit service that is convenient and accessible to all residents and workers of York Region.

A bicycle-friendly facility or business may include:

- covered and locked spaces or bicycle racks for bicycle storage
- bicycle wash stations
- showers and lockers
- laundry facilities
- emergency or pay phones

and provide information on:

- safe cycling
- benefits of cycling
- bicycle routes
- repair shops
- bicycle-friendly local businesses

The Metrolinx Regional Transportation Plan: The Big Move defines the Regional Centres of Markham, Newmarket, Richmond Hill and Vaughan as Anchor Hubs.

Gateway Hubs are identified at the following locations:

- Leslie and Highway 7
- Newmarket GO Train Station
- Don Mills and Steeles
- Jane and Steeles
- Yonge and Steeles

Transit Modal Split

The percentage of person-trips made using public transit and school buses relative to the total number of person-trips made by ~~other~~^{all} modes of transportation including private vehicles, walking or cycling.

It is the policy of Council:

19. To recognize transit as a strategic investment priority and a key element of York Region's urban structure.
20. To develop effective transit services to connect rural communities.
21. To develop transit corridors and related infrastructure necessary to establish the York Region Transit and Viva network as illustrated on Map 11.
22. To work with partners to complete the transit network, as illustrated on Map 11, including subway line extensions, Metrolinx enhancements, the 407 Transitway and other rapid transit corridors.
23. To ensure communities are planned with the early integration of transit.
24. To provide preferential treatment for transit vehicles on Regional streets designated as Regional Transit Priority Network on Map 11, including the construction of *high-occupancy vehicle lanes*, dedicated transit lanes, transit signal priority and other transit priority measures.
25. To achieve higher transit usage by supporting improvements in service, convenient access and good urban design, including the following:
 - a. minimizing walking distance to planned and existing transit stops through measures such as the provision of walkways, sidewalks and more direct street patterns. The Region will plan to provide transit service so that the distance to a transit stop in the Urban Area is within 500 metres of 90% of residents, and within 200 metres of 50% of residents ~~in the Urban Area~~;
 - b. connecting transit stops directly to sidewalks and adjacent buildings in the Urban Area;
 - c. providing bus bays, transit shelters and bus loops with sufficient lighting and accessibility features;
 - d. directing medium- and high-density urban development to rapid transit corridors;
 - e. creating a system of parking and drop-off facilities for commuters;
 - f. providing intermodal terminals or hubs;
 - g. providing transit service on mid-block collectors;
 - h. giving priority to pedestrian and cycling access to transit through the planning and development approval process;
 - i. utilizing the York Region Transit-Oriented Development Guidelines and related tools in the review and evaluation of development applications and related studies; and,
 - j. requiring all new *development* applications to prepare a mobility plan and demonstrate the proposal's approach to transit.
26. To achieve an overall transit modal split of 30% during peak periods in the Urban Area and 50% in the Regional Centres and Corridors by 2031.
27. To work with local municipalities to provide multi-use paths, sidewalks and street lighting along Regional streets serviced by transit.

45. That street widenings and proposed Regional streets shall protect and enhance the Regional Greenlands System.
46. That within the Oak Ridges Moraine, all improvements to the Regional Transit and Street Networks shall conform with the policies of the Oak Ridges Moraine Conservation Plan.
47. That priority be given to protecting existing heritage streetscapes using techniques such as variable rights-of-way widths, as identified on Map 12, and innovative street cross-section standards.
48. That the street widths shown in Map 12 be considered as basic right-of-way widths, and additional widths may be required for elements such as sight triangles, cuts, fills, streetscaping and extra turn lanes at intersections, and shall be conveyed at no expense to the Region.
49. That, in general, street widenings shall be taken equally from the centre line of the street. Landowners will be required to provide land at no expense to the Region for street widenings based on the following principles:

- a. that land will be conveyed to the Region for street widenings as a result of new development, changes in use that generate significant traffic volumes, or additions that substantially increase the size or usability of buildings or structures;
- b. that unequal or reduced widenings may be required where topographic features, public lands, historic buildings or other cultural heritage resources such as archaeological features, significant environmental concerns or other unique conditions necessitate taking a greater widening or the total widening on one side of the existing street right-of-way; and,
- c. that additional land may also be required to construct future grade separations where there is an existing at-grade crossing of a Regional street and a railway line.

50. That land required for new or realigned Regional streets to accommodate land development be conveyed, at no expense to the Region, up to and including the first 36 metres of the required right-of-way.
51. To restrict vehicle access from developments adjacent to Regional streets to maximize the efficiency of the Regional street system through techniques such as suitable local street access, shared driveways and interconnected properties. Exceptions may be made to this policy in Regional Centres and Corridors, and mainstreets.

52. To plan for and protect corridors and rights-of-way for transportation and transit facilities to meet current and projected needs and not permit development in such corridors that could preclude or negatively affect the use of the corridor for the purpose(s) for which it was identified or actively being planned.⁸²

52-53. To request that the Province work with York Region and the local municipalities to expedite the planning, corridor protection and early

Typical Regional Street Cross-Section

Formatted: Bullets and Numbering

Formatted: Bullets and Numbering

⁸² Proposed Provincial Modification 55

construction of the following facilities To work with the Province and local municipalities to plan for and protect for the following corridors and facilities:

- a. Highway 427 north to the GTA West Corridor beyond Highway 7;
- b. Highway 404 north beyond Ravenshoe Road Green Lane⁸³ to the Highway 48/Highway 12 junction;
- c. the Bradford Bypass;
- d. the GTA West Corridor; and,
- e. interchanges on 400-series highways at Regional and other arterial street crossings as identified in the York Region Transportation Master Plan. Local municipalities, in consultation with and to the satisfaction of the Province, shall develop official plan policies that provide corridor protection to ensure that development applications will not predetermine or preclude the planning and/or implementation of the above noted transportation facilities.

Some of the above facilities (items b. and c.) are not recognized as priorities for the Province within the Growth Plan horizon to 2031.⁸⁴

- ~~53-54.~~ To require local municipalities to design street systems to accommodate pedestrian, cycling and transit facilities.
- ~~54-55.~~ To work with local municipalities to complete missing sidewalk links on Regional streets in the Urban Area.
- ~~55-56.~~ That arterial streets identified on Map 12 that are currently not part of the Regional street network may be considered for a transfer in jurisdiction to York Region, and such a transfer shall not require an amendment to this Plan.
- ~~56-57.~~ To require local municipalities to protect arterial streets under local jurisdiction, as illustrated on Map 12, as major transportation corridors.
- ~~57-58.~~ To require local municipalities to plan and implement, including land takings necessary for, continuous collector streets in both east-west and north-south directions in each concession block, in all new urban developments, including *new community areas*.
- ~~58-59.~~ To require local municipalities to plan and implement, including land takings necessary for, mid-block crossings of 400-series highways, as shown on Map 12.
- ~~59-60.~~ To encourage all appropriate agencies to expedite the construction of street/railway grade separations where warranted.
- ~~60-61.~~ To plan and co-ordinate cross-boundary transportation needs with adjacent municipalities and appropriate agencies.
- ~~61-62.~~ To update the York Region Transportation Master Plan at least every 5 years concurrent with the 5-year review of this Plan.
- ~~62-63.~~ To update and implement York Region's Towards Great Regional Streets study.

⁸³ Proposed Additional Regional Modification 77

⁸⁴ Proposed Provincial Modification 52

~~63-64.~~ That an Individual Environmental Assessment will be undertaken for the unopened road allowance of Teston Road between Dufferin Street and Keele Street which will include a comprehensive network analysis and environmental impact assessment to determine a preferred transportation strategy in the corridor.

Formatted: Bullets and Numbering

Goods Movement

The movement of goods by truck and rail is integral to York Region's economic vitality. The Region's manufacturing and logistics sectors serve both American and Canadian markets and require a transportation network that links all modes of goods movement. York Region's transportation system should allow for efficient goods movement that has regard for the sensitivities of residents and different land uses. As the Region continues to grow, it is increasingly important that lands surrounding major goods movement corridors be reserved for employment activities that require heavy truck and rail traffic.

Objective

To promote a linked and efficient network for goods movement that supports economic vitality and minimizes conflicts with *sensitive land uses*⁸⁵.

It is the policy of Council:

~~64-65-63-~~ To promote an interconnected goods movement network that links local municipalities and surrounding areas, utilizing Provincial highways, Regional streets and rail corridors.

~~65-66-64-~~ To work with Metrolinx, the Province, local municipalities, and surrounding jurisdictions to plan for an effective and integrated goods movement system throughout the Greater Toronto and Hamilton Area.

~~66-67-65-~~ To support the optimization of the existing transportation network for goods movement, through methods such as access management and intelligent transportation systems.

~~67-68-66-~~ To support the protection of existing rail lines and promote rail as an efficient goods movement method.

~~68-69-67-~~ To encourage the protection of abandoned railway rights-of-way for public uses such as trails, cycling paths, and transit.

~~69-70-68-~~ To discourage the location of land uses sensitive to noise and vibration and safety issues. ~~To ensure that noise, vibration and safety~~

Importance of Goods Movement to the Regional Economy

With a total value of approximately \$10 billion in 2006, York Region's total exports exceed that of several Canadian provinces.

Statistics Canada, 2006

Formatted: Bullets and Numbering

⁸⁵ Proposed Provincial Modification 69

~~issues are carefully managed for land uses~~ in proximity to rail facilities, rail corridors and intermodal yards, to avoid issues of compatibility.⁸⁶

~~70-71.69-~~To encourage freight and logistics uses to locate in clusters that create synergies within the goods movement industry.

~~71-72.70-~~To encourage employment uses and activities that require heavy truck traffic to locate in areas near and adjacent to Provincial highways.

~~72-73.71-~~To support an interconnected and efficient system for goods movement through:

- a. the completion of the 400-series highway network, including the GTA West Corridor, the Highway 427 Extension, and the Highway 404 Extension, and the Bradford Bypass⁸⁷, and,
- b. the addition of 400-series highway interchanges and overpasses.

~~73-74.72-~~To recognize that Provincial highways and Regional streets are generally corridors for goods movement, subject to existing truck and load restrictions.

~~74-75.73-~~To promote an urban structure and street network in Regional Centres and Corridors that allows for the efficient movement of goods.

~~75-76.74-~~To work with other levels of government, agencies and the private sector to minimize risks and ensure the safe and efficient movement of goods by either rail or streets in the Region.

~~76-77.75-~~To direct the movement of hazardous goods to rail and roadways outside of the Urban Area, where possible.

~~77-78.76-~~To consider restrictions on the haulage of chemicals and volatile materials in *Wellhead Protection Areas*, shown on Map 6, and Areas of High Aquifer Vulnerability, shown on Map 7.

~~78-79.77-~~To encourage grade separation of railways and major streets, where warranted.

~~79-80.78-~~To encourage businesses to move towards more energy efficient and effective freight modes and technologies.

~~80-81.79-~~To encourage rail and truck operators to investigate new technologies and increase the efficiency of the design and operations of their facilities.

Airports

Convenient access to modern air travel facilities provides an important economic advantage to businesses and can contribute to the quality of life of residents. The policies of this section reflect York Region's role in supporting airport infrastructure within the Greater Toronto and Hamilton Area and in maintaining efficient transportation connections, including transit, to nearby airport facilities. Uncertainty about the long term future of the Toronto Buttonville Municipal Airport is also considered within the policies of this section. It is important to ensure that new development does not conflict with the operations of the proposed Pickering Airport.

⁸⁶ Proposed Provincial Modification 53

⁸⁷ Proposed Provincial Modification 54

Objective

To support strong airport infrastructure within the Greater Toronto and Hamilton Area, while minimizing conflicts between airport operations and surrounding lands.

It is the policy of Council:

- ~~84.82.80.~~ To encourage and support the Province and Federal government, local municipalities, the Greater Toronto Airports Authority, airline companies and airport operators to provide airline and airport services to the Greater Toronto and Hamilton Area that meet the needs of York Region's residents and businesses.
- ~~82.83.84.~~ To encourage the continued operation of the Toronto Buttonville Municipal Airport, until such time that services can be met by another nearby facility, such as the proposed Pickering Airport.
- ~~83.84.82.~~ To support efficient transportation connections, including transit, streets and rail, from York Region to both Toronto Pearson International Airport and the proposed Pickering Airport.
- ~~84.85.83.~~ To comply with the Federal Aeronautics Act and Regulations, which provide that buildings and structures in the vicinity of airports shall not interfere with airport operations and the movement of air traffic.
- ~~85.86.84.~~ To encourage the Province to revise the Minister's Provincial Zoning Order for the Pickering Airport site, in light of the current planning context and the Greater Toronto Airport Authority's Pickering Airport Draft Plan Report, 2004.
- ~~86.87.85.~~ To prohibit new official plan approvals for residential development ~~the development of residential~~ and other *sensitive land uses*⁸⁸ within the Interim Airport Protection Area, as defined by the Greater Toronto Airport Authority's Pickering Airport Draft Plan Report, 2004, until such time that an Airport Operating Area is clearly defined.
- ~~87.88.86.~~ The Toronto Buttonville Municipal Airport lands are designated for business park use in the Town of Markham Official Plan, including permission to operate an airport. When airport operations at the Buttonville Airport cease, the significant majority of the subject lands shall be retained for business park use, as contemplated in the Town of Markham Official Plan. The Town of Markham will determine the details of the future use of these lands through an implementing secondary plan process ~~That upon finalization of the Pickering Airport Operating Area, development of residential and other sensitive land uses shall be prohibited within the appropriate updated Noise Exposure Forecast contour, consistent with Transport Canada guidelines.~~

7.3 Water and Wastewater Servicing

York Region is committed to providing long term water and wastewater services to its communities that are safe, well-managed, sustainable and delivered in a fiscally responsible manner, in addition to ensuring that the Region's environment is protected and enhanced. It is York Region's goal that the

⁸⁸ Proposed Provincial Modification 69

5. To work with partners in the provision of water and wastewater services for the Region.
6. To provide full municipal water and wastewater servicing to accommodate growth in the Urban Area.
7. To consider alternatives to servicing northern York Region in keeping with the requirements of the Environmental Assessment Act, the York Region Water and Wastewater Master Plan and the Upper York Servicing Solution Individual Environmental Assessment.
8. To require local official plans to identify Regional wastewater treatment plants, and appropriate buffer areas according to Provincial guidelines.
9. To require local official plans to identify all Regional wells and intake protection zones to protect drinking water quality.
10. That where local official plans permit minor infill in Towns and Villages and Hamlets on private individual wastewater systems, these systems will be permitted only if it can be demonstrated to the local municipality that there are no adverse impacts on soil, surface or groundwater quality and quantity.
11. That where the protection of public health is an issue, in areas of existing groundwater contamination as determined by a Medical Officer of Health, and where full municipal water and wastewater services cannot be provided, communal water supply and wastewater treatment systems may be considered. Consideration of communal systems shall be reviewed in the context of suitable administrative and financial arrangements to the satisfaction of the Region and the Province.
12. To supply the Urban Area and Towns and Villages with water from the Great Lakes or from Lake Simcoe, subject to the restrictions of the Greenbelt Plan, Lake Simcoe Protection Plan, or other Provincial plans and statutes. A limited amount of groundwater resources will be used and managed in a way that sustains healthy flow into creeks, streams and rivers.
13. To support the Great Lakes water balance by continuing to invest in Lake Ontario based infrastructure, and ensuring that water removed from Lake Ontario is returned at an equivalent or better quality.
14. To provide water and wastewater treatment capacity from Lake Simcoe to service the Keswick, Sutton and Georgina Lakeshore communities.
15. That *development* within and expansions to the urban uses within Towns and Villages identified on Map 1 will occur on the basis of full municipal water and wastewater treatment services where such facilities currently exist. For existing or previously approved *development* in Towns and Villages, water and wastewater treatment services will be continued where feasible and in keeping with the provisions of local official plans and this Plan.
16. That within the Oak Ridges Moraine, Greenbelt, and *Lake Simcoe watershed*⁸⁹, all improvements or new water and wastewater infrastructure systems shall conform with the Oak Ridges Moraine Conservation Plan, the Greenbelt Plan or the Lake Simcoe Protection Plan.

⁸⁹ [Proposed Provincial Modification 64](#)

17. That the construction or expansion of partial services is prohibited in the Oak Ridges Moraine unless it has been deemed necessary to address a serious health or environmental concern identified by the Medical Officer of Health or other designated authority.
18. To provide reliable water and wastewater services to residents and businesses to ensure continuing community well-being and the economic vitality of the Region.
19. To provide high-quality, safe, and clean drinking water while protecting surface and groundwater resources by:
 - a. meeting and exceeding water quality standards defined by the Safe Drinking Water Act;
 - b. protecting the drinking water supply through source water protection strategies;
 - c. protecting and enhancing the Region's system of lakes, rivers and streams;
 - d. ensuring groundwater use sustains the long term health of aquifers;
 - e. maintaining and updating the groundwater monitoring program; and,
 - f. identifying source water protection areas.
20. To ensure that the Region continues to provide state-of-the-art wastewater treatment while investigating innovative new technologies.
21. To protect surface water quality by addressing both point and non-point sources of pollution in partnership with local municipalities and conservation authorities.
22. To encourage local municipalities to promote safe and effective maintenance of individual private wastewater systems in order to protect and improve groundwater and surface water quality.
23. That no new on-site wastewater system will be permitted within 100 metres of the Lake Simcoe Shoreline, other lakes, or any permanent streams within the *Lake Simcoe watershed*⁹⁰ except as provided for under the provisions of the Lake Simcoe Protection Plan.
24. To work with local municipalities to reduce the amount of inflow and infiltration in both local and Regional wastewater systems.
25. To ensure that wastewater effluent is managed to minimize impacts on the quality of the receiving water.
26. To ensure that biosolids resulting from wastewater treatment are managed sustainably.
27. To incorporate energy-recovery systems into water and wastewater facilities where possible in order to reduce the health and environmental impacts of greenhouse gas and other emissions on air quality.
28. That water and wastewater facilities will be designed and operated to reduce energy use and, where possible, energy recovery.

⁹⁰ [Proposed Provincial Modification 64](#)

Infrastructure in Shared Right-of-Way

In 2006, York Region Council established a minimum standard of LEED® Silver for all new Regional buildings. Since then, a number of facilities have been constructed including:

- Vaughan Fire/EMS Station – LEED® Gold awarded
- Tom Taylor Place – LEED® Silver targeted
- Vaughan Community Environmental Centre – LEED® Gold Awarded Silver targeted

2. To promote shared rights-of-way to minimize land requirements and increase the efficiency of utility construction and maintenance.

3. To work with municipalities to identify and protect infrastructure corridors to support expected growth within the Region and its neighbouring municipalities.⁹¹

4. To require local official plans to identify and protect infrastructure corridors for long term servicing needs, including and in compliance with corridors identified in Provincial Plans.⁹²

3-5. To work with corporations, commissions, and government agencies responsible for the regulation, transmission and delivery of utilities to co-ordinate the provision of services, encourage the integration of utilities, and minimize exposure to electromagnetic fields.

4-6. To require underground installation of utilities, where feasible, in *new community areas* and Regional Centres and Corridors, and to encourage buried utilities in the balance of the Region.

5-7. To require local municipalities to engage cellular service providers early in the development process, to facilitate the integration of cellular transmission facilities with new buildings.

6-8. To encourage the use of steel poles instead of lattice towers when it is not feasible to install major utilities underground or integrate cellular transmission facilities with buildings.

7-9. To encourage complementary uses on utility corridors, such as trails, transit, commuter parking, community gardens, and appropriate vegetation.

8-10. To engage local municipalities, local utilities and other stakeholders in the advancement of energy conservation, demand management, renewable energy systems and local generation.

9-11. To investigate the development of an Energy for Tomorrow program that raises awareness of the benefits of energy efficiency and conservation, and renewable energy systems in partnership with local utilities and other stakeholders.

10-12. To encourage the land development, building and construction industries to obtain the expertise and training required to implement green building standards such as LEED® and ENERGY STAR®, and other emerging technologies.

11-13. To advocate the Province for the elimination of coal generation and the promotion of demand management and *alternative energy systems* and *renewable energy systems* such as solar, wind, water, biomass, geothermal energy, energy-from-waste, local generation and district energy facilities.

12-14. To work with local municipalities, the Province and other stakeholders to investigate suitable criteria for the construction and use of renewable energy systems within York Region.

13-15. To advocate for flexibility in the Ontario Building Code to allow municipalities to set higher standards for energy and water efficiency, and the use of *renewable energy systems*.

⁹¹ Proposed Provincial Modification 56

⁹² Proposed Provincial Modification 57

~~14-16.~~ To demonstrate leadership in energy efficiency and the use of *renewable energy systems* and *alternative energy systems* in York Region operations, by:

- a. implementing progressively higher LEED® standards for all new Regional buildings, and re-examining these standards periodically;
- b. retrofitting existing Regional buildings to improve energy conservation and incorporate renewable energy sources;
- c. preparing an energy conservation and demand management plan;
- d. purchasing a portion of electricity used in Regional buildings from clean and emissions-free sources;
- e. investigating methods to reduce electricity use during normal- and high-demand periods;
- f. incorporating energy efficient technologies and alternative fuels into the Regional fleet, including transit, police and public works vehicles;
- g. developing and operating an energy-from-waste system for York Region; and,
- h. developing a tracking system to monitor and set a target to reduce greenhouse gas emissions from Regional operations.

~~15-17.~~ To encourage local municipalities, schools boards and conservation authorities to adopt sustainable building policies for all buildings and facilities.

~~16-18.~~ To permit on-site *alternative energy systems* and *renewable energy systems* for residential, commercial, institutional and industrial buildings and to work with local municipalities on design requirements.

~~17-19.~~ To develop incentive programs complementary to the sustainable building policies in this Plan together with local municipalities. These programs may include water and wastewater servicing allocation credits, density bonusing, expedited processing of development approvals or the use of local municipal community improvement plans and associated financial tools.

~~18-20.~~ To review the sustainable building policies in this Plan as building standards evolve.

Formatted: Bullets and Numbering

- c. a draft of the proposed amendment, including the proposed text and all proposed schedules;
 - d. at least one pre-application meeting to determine the required information and materials; and,
 - e. other requisite information and materials as determined through the pre-application meeting(s).
13. That Table 3 below contains a list of studies that may be required to properly evaluate the proposed amendment. The required studies will be determined in consultation with the applicant during the pre-application meeting.
 14. That for an amendment application that has been deemed complete, additional reports and studies may be identified and required. These additional requirements do not affect the original complete application date.
 15. That all Regional studies required in this Plan be included in local municipal official plan complete applications listings.

Table 3: Possible Regional Planning Studies Required to Evaluate a Proposed Amendment to this Plan

Planning Studies	Circumstance
Planning Justification	All Regional Official Plan Amendment applications
Environmental Impact Statement	<i>Development</i> within 120 metres of the Regional Greenlands System but outside of the Oak Ridges Moraine and the Greenbelt
Natural Heritage Evaluation	<i>Development</i> <u>on or</u> within 120 metres of a key <i>natural heritage feature</i> on the Oak Ridges Moraine, or the Natural Heritage System of the Greenbelt, or the <i>Lake Simcoe watershed</i> ⁹³ <u>outside of the Greenbelt or Oak Ridges Moraine planning areas and existing settlement areas</u> ⁹⁴
Hydrological Evaluation	<i>Development</i> within 120 metres of a key <i>hydrologic feature</i> on the Oak Ridges Moraine or Greenbelt
Agricultural Impact Study	Non-agricultural <i>development</i> within the Greenbelt
Landform Conservation Area Plan	<i>Development</i> on landform conservation areas within the Oak Ridges Moraine
Earth Science Heritage Evaluation	<i>Development</i> within the minimum area of influence of an earth science area of natural or scientific interest
Lake Simcoe Protection Plan Conformity	<i>Development</i> within the <i>Lake Simcoe watershed</i> ⁹⁵
Archaeological Assessment	<i>Development</i> on lands containing significant or potentially significant archaeological resources
Regional Impact Analysis	Applications for retail spaces greater than 30,000 square metres of gross leasable area
Transportation Study	All Regional Official Plan Amendment applications

⁹⁴ [Proposed Provincial Modification 59](#)

⁹⁵ [Proposed Provincial Modification 64](#)

Greenbelt Plan Conformity	<i>Development within the Greenbelt</i>
Oak Ridges Moraine Conservation Plan Conformity	<i>Development within the Oak Ridges Moraine</i>
Mineral Aggregate Study	<i>Development within and/or adjacent to mineral aggregate resources</i>
Water and Wastewater Servicing Plan	All Regional Official Plan Amendment applications

16. That if approval of a draft plan of subdivision lapses, opportunities for achieving the growth management targets established in this Plan in policy 8.2.3 shall be considered as part of the development review process.
17. That if a plan of subdivision or part thereof has been registered for eight years or more, and does not meet the growth management targets established in this Plan in policy 8.2.3 and does not conform to the policies of this Plan, Regional Council or the Council of the respective local municipality shall use its authority under Section 50(4) of the Planning Act to deem it not to be a registered plan of subdivision.
18. That Regional Council or the Council of the respective local municipality shall require that approvals of draft plans of subdivisions include a lapsing date in accordance with Section 51(32) of the Planning Act.⁹⁶

Formatted: Bullets and Numbering

8.4 Interpreting This Plan

The following provides a guide for the interpretation of individual policies of this Plan.

Objective

To provide clarity in the interpretation of this Plan.

It is the policy of Council:

1. That the goals, objectives, policies, Tables 1, 2 and 3, Definitions and Maps contained herein constitute the York Region Official Plan. Chapter 1, other tables, graphics, text contained in the sidebars and introductory text of each section in this Plan, and Figures 1 and 2 are intended to be illustrative and are provided for information only. Unless otherwise specified in this Plan, any deviation from these provisions is prohibited or will require an amendment to this Plan.
2. That all policies of this Plan must be considered together to determine conformity. Individual policies should not be read or interpreted in isolation.
3. That the boundaries and facilities identified on Maps 1 to 12 are intended to indicate the general location. Exact boundaries shall be defined in local official plans and zoning by-laws, except in the following cases:
 - a. the boundary of the Oak Ridges Moraine Conservation Plan and the Greenbelt Plan. In this case, the boundary may only be

⁹⁶ Proposed Provincial Modification 58

clarified through reference to the applicable Provincial Regulations; and,

- b. the boundaries of the Urban Area identified on Map 1, are fixed where they are identified by a municipal street, rail line, parcel fabric as it exists on the day of adoption of this Plan, lot and/or concession blocks, or, other clearly identifiable physical features.
4. That amendments to land use designations will ~~only~~^{not} be considered within the Oak Ridges Moraine Conservation Plan Area:
 - a. ~~unless as~~ part of the provincial review of that Plan;
 - b. ~~or except~~ as provided for in the Oak Ridges Moraine Conservation Plan and the Oak Ridges Moraine Conservation Act, 2001, ~~as amended~~; or,
 - c. ~~within the~~ Urban Area~~s~~ or Towns and ~~Villages on the Oak Ridges Moraine~~.

Amendments that have the effect of removing lands from the Natural Core Area and the Natural Linkage Area designations of the Oak Ridges Moraine Conservation Plan will not be considered.

5. That notwithstanding policy 8.4.4 of this Plan, technical amendments to correct mapping errors within the Oak Ridges Moraine Conservation Plan Area are permitted in accordance with policy 8.4. ~~12~~¹³.
6. That amendments to the Protected Countryside of the Greenbelt Plan will not be considered unless part of the provincial review of that Plan in 2015, except as provided for in the Greenbelt Plan or the Greenbelt Act, 2005.
7. That as ~~part of input to~~⁹⁷ the 2015 review of the Oak Ridges Moraine Conservation Plan and the Greenbelt Plan, the Region, in consultation with the local municipalities, will monitor and review:
 - a. the availability of strategically located employment lands and determine whether there is a need to consider re-designation of lands for employment. Factors that will be considered in this review include the balance of employment and residential opportunities, access to services, and access to 400-series highways;
 - b. the supply of lands for development in the Urban Area and Towns and Villages. Where the lands are not required for development to 2031, such lands may be considered for re-designation to an appropriate Oak Ridges Moraine Conservation Plan or Greenbelt Plan designation; and,
 - c. the designation of the Agricultural Area and the Rural Area in this Plan and in local municipal official plans.
8. That should Provincial Plans be amended as a result of the review in policy 8.4.7 of this Plan, this Plan and local municipal official plans shall be amended accordingly.
9. That nothing in this Plan prevents local municipal official plans and zoning by-laws from being more restrictive.

Notwithstanding the above, neither this Plan nor local municipal official plans or zoning by-laws may be more restrictive than the Greenbelt Plan

⁹⁷ Proposed Provincial Modification 6o

or the Oak Ridges Moraine Conservation Plan Areas insofar as agricultural uses, mineral aggregate operations and wayside pits are concerned.

10. That the boundaries and policies of the Parkway Belt West Plan as amended, take precedence over the designation shown on Map 1 of this Plan. Where the Parkway Belt West Plan is amended to remove lands, the Regional land use designation of the abutting lands outside of the Parkway Belt West Plan will apply without amendment to this Plan.
11. That in the case of a discrepancy between the text and the related map, the policies will take precedence.
12. No amendment to this Plan is required to construct new or expanded infrastructure subject to and approved under the Environmental Assessment Act which considers the sustainability and growth management objectives of this Plan and is in conformity with Provincial Plans.
13. ~~12.~~ That an amendment to this Plan is not required and changes may be made during office consolidations for:
 - a. additions or deletions to the Region's area and application of the land use designation of the abutting lands, when the addition is a result of realignments to provincial highways or Regional boundary streets;
 - b. altering the numbering and arrangement of provisions in this Plan;
 - c. updating the base mapping used in this Plan or adding base information to maps to show existing and approved infrastructure;
 - d. correcting clerical, grammatical, spelling and technical mapping errors;
 - e. changing format or presentation; or,
 - f. altering punctuation to obtain a uniform mode of expression.

Transition

14. ~~13.~~ To recognize legally existing and approved land uses as they exist at the time this Plan is approved.
15. ~~14.~~ That applications received on/or after the date of this Plan's approval be subject to the policies of this Plan.
16. ~~15.~~ That proponents with pending applications at the time of this Plan's approval be encouraged to work with the Region to re-examine the proposed applications based on the policies in this Plan.

Greenbelt Plan

17. ~~16.~~ That existing uses and residential dwellings on existing lots of record in the Greenbelt are subject to Section 4.5 of the Greenbelt Plan.
18. ~~17.~~ That in the Greenbelt Plan Area, where a local municipal official plan was amended prior to December 16, 2004 to specifically designate land uses, the approval may continue to be recognized through the municipal Greenbelt conformity exercise and further applications required under

the Planning Act or Condominium Act to implement the official plan approval are not required to conform to the Greenbelt Plan and are permitted in this Plan~~That in accordance with Policy 5.2.1 of the Greenbelt Plan, where a local municipal official plan or zoning bylaw was amended to specifically designate land uses prior to the Greenbelt Plan coming into force and effect, the approval may continue and further applications required under the Planning Act or Condominium Act to implement the official plan approval are not required to conform to the Greenbelt Plan and are permitted in this Plan.~~

19. ~~18.~~ Where a local municipal zoning bylaw was amended prior to December 16, 2004 to specifically permit land use(s), the approval may continue to be recognized through the municipal Greenbelt conformity exercise and any further applications required under the Planning Act or Condominium Act, 1998 to implement the land use permitted by the zoning bylaw are not required to conform to the Greenbelt Plan.

Applications to further amend the site-specific official plan or zoning by-law permissions referred to above for uses similar to or more in conformity with the provisions of the Greenbelt Plan are also permitted. All such applications should, where possible, seek to achieve or improve conformity with the Greenbelt Plan~~That within the Greenbelt Plan area, transition provisions for applications are determined by the Greenbelt Act, 2005, and the Greenbelt Plan.~~⁹⁸

Oak Ridges Moraine Conservation Plan

20. ~~19.~~ That within the Oak Ridges Moraine Conservation Plan, uses, buildings and structures legally existing on November 15, 2001 are permitted in every land use designation, subject to the provisions of the Oak Ridges Moraine Conservation Moraine Plan.
21. ~~20.~~ That within the Oak Ridges Moraine Conservation Plan, transition provisions for applications are established within the Oak Ridges Moraine Conservation Act, 2001, as amended and the Oak Ridges Moraine Conservation Plan, 2002.
22. That notwithstanding policies 6.2.9, 6.2.10 and 6.2.11, where a planning application is submitted after November 17, 2001 as a direct result of a condition attached to a provisional consent, a draft plan of subdivision or a draft plan of condominium, the application shall be completed under the same system in effect as the original approval in accordance with the Further Approvals provisions of the Oak Ridges Moraine Conservation Act, 2001, as amended. In addition, any development permission established by such a further approval may be recognized in the local municipal official plan and zoning by-law.

⁹⁸ Proposed Provincial Modification 61

Definitions

ADJACENT LANDS

Those lands contiguous to a *key natural heritage feature* or *key hydrologic feature* where it is likely that *development* or *site alteration* can reasonably be expected to have an negative impact on the feature. The extent of the adjacent lands may be recommended by the Province or based on municipal approaches which achieve the same objectives.⁹⁹ Generally, adjacent lands are considered to be within 120m from any part of the feature.

AFFORDABLE

In the case of ownership housing, the least expensive of:

- a. housing for which the purchase price results in annual accommodation costs not exceeding 30% of gross annual household income for low- and moderate-income households; or,
- b. housing for which the purchase price is at least 10% below the average purchase price of a resale unit in the regional market area;

In the case of rental housing, the least expensive of:

- a. a unit for which the rent does not exceed 30% of gross annual household income for low- and moderate-income households; or,
- b. a unit for which the rent is at or below the average market rent of a unit in the regional market area.

For the purposes of this definition, “low- and moderate-income households” means, in the case of ownership housing, households with incomes in the lowest 60% of the income distribution for the regional market area or, in the case of rental housing, households with incomes in the lowest 60% of the income distribution for renter households for the regional market area.

AGRICULTURAL USES

The growing of crops, including nursery and horticultural crops; raising of livestock; raising of other animals for food, fur or fibre, including poultry and fish; aquaculture; apiaries; agro-forestry; maple syrup production; and associated on-farm buildings and structures, including accommodation for full-time farm labour where the size and nature of the operation requires additional employment.

AGRICULTURE-RELATED USES

Those farm-related commercial and farm-related industrial uses that are small in scale, directly related to the farm operation and required to be in close proximity to the farm operation.

⁹⁹ Proposed Provincial Modification 62

DESIGNATED GREENFIELD AREA

The *designated area* that was outside of the built-up area as of June 2006 as defined by the Province's Built Boundary in Places to Grow: Growth Plan for the Greater Golden Horseshoe.

DEVELOPABLE AREA

The *developable area* includes all lands available for *development* for both private and public uses, including residential and employment uses, open space and infrastructure (e.g. local and Regional streets and stormwater management ponds).

The *developable area* excludes:

- a. environmental features identified in Places to Grow: Growth Plan for the Greater Golden Horseshoe;
- b. the Regional Greenlands System;
- c. *key natural heritage features* and *key hydrologic features*;
- d. major infrastructure rights-of-ways (i.e. existing 400-series highways and finalized route alignments for extensions or future 400-series highways, utility lines, and rail lines); and,
- e. existing uses (e.g. cemeteries, estate subdivisions).

DEVELOPMENT

The creation of a new lot, a change in land use, or the construction of buildings and structures, requiring approval under the Planning Act, but does not include:

- a. activities that create or maintain infrastructure authorized under an environmental assessment, Planning Act, or Condominium Act process; or,
- b. works subject to the Drainage Act.

EARTH SCIENCE AREAS OF NATURAL AND SCIENTIFIC INTEREST

Areas of land containing natural landscapes or features that have been identified by the Province as having earth science values related to protection, scientific study or education. Provincially and Regionally significant Earth Science Areas of Natural and Scientific Interest are included in this Plan.

ENVIRONMENTALLY SIGNIFICANT AREAS

Land or water areas that contain distinctive or unusual features, perform a key ecological function and/or provide habitat for significant plant and/or animal species as determined by studies undertaken from time to time by conservation authorities and/or local municipalities.

FISH HABITAT

Means fish habitat as defined in the Federal Fisheries Act as spawning grounds and nursery, rearing, food supply, and migration areas on which fish depend directly or indirectly in order to carry out their life process.

FLOOR SPACE INDEX

The ratio of gross floor area of a building to its respective lot area. For example, a building with a gross floor area of 25,000 square metres situated on a lot with an area of 10,000 square metres has a floor space index of 2.5.

GLOBALLY OR PROVINCIALLY RARE PLANTS, ANIMALS OR COMMUNITIES

Plant or animal species or communities that have been assigned a provincial or global ranking by the Natural Heritage Information Centre, Ministry of Natural Resources of:

- a. S1 – Extremely rare;
- b. S2 – Very rare;
- c. S3 – Rare to uncommon;
- d. G1 – Extremely rare;
- e. G2 – Very rare; or,
- f. G3 – rare or rare to uncommon.

HABITAT OF ENDANGERED SPECIES, THREATENED SPECIES, AND SPECIAL CONCERN SPECIES

Habitat for endangered, threatened or special concern species are identified by regulation under the Endangered Species Act.

HERITAGE ATTRIBUTES

The principal features, characteristics, context and appearance that contribute to the cultural heritage significance of a protected heritage property.¹⁰⁰

HEADWATER AREA

The uppermost portion of the drainage basin of a stream.

HIGH-OCCUPANCY VEHICLE LANES

Reserved rights-of-way for public transit vehicles and other vehicles such as emergency vehicles, taxis or multiple-person vehicles.

INTAKE PROTECTION ZONE

The area within Lake Simcoe and surrounding lands that may contribute water to the municipal drinking water systems and through which contaminants are reasonably likely to reach the pumping station.

¹⁰⁰ [Proposed Provincial Modification 63](#)

KEY NATURAL HERITAGE FEATURE

Key natural heritage features are described in Section 2.2 of this Plan and include the *habitat of endangered species, threatened species and special concern species, fish habitat, wetlands, Life Science Areas of Natural and Scientific Interest, Environmentally Significant Areas, significant valleylands, significant woodlands, significant wildlife habitat, sand barrens, savannahs and tallgrass prairies.*

LAKES AND THEIR LITTORAL ZONES

Means any inland body of standing water larger than a pool or pond or a body of water filling a depression in the earth's surface. The littoral zone refers to the area of shallow water in a lake that extends from the shoreline lakeward to the limit occupancy of rooted aquatic plants.

LAKE SIMCOE WATERSHED

- a. Lake Simcoe and the part of Ontario, the water of which drains into Lake Simcoe; or,
- b. If the boundaries of the area described by clause (a) are described more specifically in regulations, the area within those boundaries (Lake Simcoe Protection Act, 2008).¹⁰¹

LIFE SCIENCE AREAS OF NATURAL AND SCIENTIFIC INTEREST

Areas of land and water containing natural landscapes or features that have been identified by the Province using approved evaluation procedures, as having life science values related to protection, scientific study or education. Provincially and Regionally significant Life Science Areas of Natural and Scientific Interest are included in this Plan.

MAJOR DEVELOPMENT

Consists of:

- a. the creation of four or more lots;
- b. the construction of a building or buildings with a ground floor area of 500 square metres or more; or,
- c. the establishment of a *major recreational use*.

MAJOR OFFICE

Freestanding office buildings of 10,000 m² or greater, or with 500 jobs or more.¹⁰²

MAJOR RETAIL

Major retail includes retail big box stores, retail warehouses and shopping centres.

¹⁰¹ Proposed Provincial Modification 64

¹⁰² Proposed Provincial Modification 65

MAJOR RECREATIONAL USE

Recreational uses that require large-scale modification of terrain, vegetation or both and usually also require large-scale buildings or structures, including but not limited to the following:

- a. golf courses;
- b. serviced playing fields;
- c. serviced campgrounds; and,
- d. ski hills.

MINIMUM DISTANCE SEPARATION FORMULAE

Formulae developed by the Province to separate uses to reduce incompatibility concerns about odour from livestock facilities.

NEW COMMUNITY AREAS

Lands added to the Urban Area through a *Regional municipal comprehensive review*¹⁰³, for community purposes including residential and population-related employment, beyond those designated as Urban Area at the date of approval of this Plan ~~which are illustrated by the asterisks on Map 1.~~¹⁰⁴

NOISE EXPOSURE FORECAST

A prediction of noise annoyance levels caused by aircraft near airports.

NORMAL FARM PRACTICES

Any practice, as defined in the Farming and Food Production Protection Act, 1998, that is conducted in a manner consistent with proper and acceptable customs and standards as established and followed by similar agricultural operations under similar circumstances, or that makes use of innovative technology in a manner consistent with proper advanced farm management practices. *Normal farm practices* shall be consistent with the Nutrient Management Act, 2002 and regulations made under that Act.

OAK RIDGES MORaine CONSERVATION PLAN DEFINITIONS

Definitions for terminology specific to the Oak Ridges Moraine Conservation Plan that are included in the Oak Ridges Moraine Conservation Plan, Ontario Regulation 140/02.

¹⁰³ [Proposed Provincial Modification 67](#)

¹⁰⁴ [Proposed Provincial Modification 66](#)

PATHOGEN THREATS

Threats to drinking water quality that are related to conditions or activities having the potential to introduce living microorganisms that cause disease into the groundwater. Sources of pathogens include, but are not limited to, septic systems, animal manure, sewage systems and stormwater management ponds.

PERMANENT STREAMS

A stream which continually flows in an average year.

PLANNED CORRIDORS

Corridors identified through Provincial Plans or preferred alignment(s) determined through the Environmental Assessment Act process which are required to meet projected needs.¹⁰⁵

REGIONAL MUNICIPAL COMPREHENSIVE REVIEW

An official plan review which is undertaken by the Region, or an official plan amendment which is undertaken by the Region, in consultation with the respective local municipalities, which comprehensively applies the schedules and policies of the Growth Plan for the Greater Golden Horseshoe.¹⁰⁶

RENEWABLE ENERGY SYSTEMS

The production of electrical power from an energy source that is renewed by natural processes including, but not limited to, wind, water, a biomass resource or product, or solar and geothermal energy.

RISK ASSESSMENT

Study completed by a qualified person that examines the relevant hydrologic pathways and qualitatively evaluates the level of risk associated with a land use or land use activity that may pose a threat to the quantity or quality of a municipal drinking water supply.

RISK MANAGEMENT PLAN

A document completed by a qualified person that describes the results of the Risk Assessment, proposes a plan for the mitigation and management of the identified risks, and outlines an emergency response plan to be executed in the event that a risk occurs.

SECONDARY AGRICULTURAL USES

Uses secondary to the principal use of the property, including but not limited to, home occupations, home industries, and uses that produce value-added agricultural products from the farm operations on the property.

¹⁰⁵ [Proposed Provincial Modification 68](#)

¹⁰⁶ [Proposed Provincial Modification 67](#)

SECONDARY SUITE

A single accessory dwelling unit in a house that consists of one or more rooms that are designed, occupied or intended for use, including occupancy, by one or more persons as an independent and separate residence in which a facility for cooking, sleeping facilities and sanitary facilities are provided for the exclusive use of such person or persons.

SEEPAGE AREAS AND SPRINGS

Seepage areas and springs are sites of emergence of groundwater where the water table is present at the ground surface. Seepage areas are areas where groundwater emerges from the ground over a diffuse area. Springs are points of natural, concentrated discharge of groundwater.

SENSITIVE GROUNDWATER FEATURES

Water-related features in the earth's subsurface, including recharge/discharge areas, water tables, aquifers and unsaturated zones that can be defined by surface and subsurface hydrogeologic investigations, that are particularly susceptible to impacts from activities or events including, but not limited to, water withdrawals, and additions of pollutants.

SENSITIVE SURFACE WATER FEATURES

Water-related features on the earth's surface, including headwaters, rivers, stream channels, inland lakes, seepage areas, recharge/discharge areas, springs, wetlands, and associated riparian lands that can be defined by their soil moisture, soil type, vegetation or topographic characteristics, that are particularly susceptible to impacts from activities or events including, but not limited to, water withdrawals, and additions of pollutants.

SENSITIVE GROUNDWATER AND RECHARGE AREAS

Ground water and recharge features that are particularly susceptible to impacts from activities or events including, but not limited to, water withdrawals, and additions of pollutants.

SENSITIVE USE/SENSITIVE LAND USE

Buildings, amenity areas, or outdoor spaces where routine or normal activities occurring at reasonably expected times would experience one or more adverse effects from contaminant discharges generated by a nearby major facility. Sensitive land uses may be a part of the natural or built environment. Examples may include, but are not limited to: residences, day care centres, and educational and health facilities.¹⁰⁷

¹⁰⁷ Proposed Provincial Modification 69

SPECIAL NEEDS HOUSING

The integration of housing and support services for individuals who require specific services to maintain their housing and well-being. *Special needs housing* includes both transitional and permanent housing, most commonly in not-for-profit residential housing.

SPECIAL POLICY AREA

An area within a community that has historically existed in the flood plain and where site-specific policies, approved by the Province, are intended to provide for the continued viability of existing uses (which are generally on a small scale) and to address the significant social and economic hardships to the community that would result from strict adherence to provincial policies concerning development, the criteria and procedures for approval are established by the Province¹⁰⁸. A *Special Policy Area* is not intended to allow for new or intensified development and site alteration if a community has feasible opportunities for development outside the flood plain.

TIME OF TRAVEL

Refers to the estimated time required for groundwater to move from a given location in an aquifer to the intake of a water well. A *wellhead protection area* is typically divided into several *time of travel* zones.

TRANSIT OPERATION AND MAINTENANCE FACILITY

Land and/or structures used for the purpose of repairing, maintaining, storing and/or testing conventional and rapid transit vehicles, up to and including subway cars. These facilities may also include offices and other accommodations for on-site workers and transit vehicle operators.

TREE

Any species of woody perennial plant, including its root system, that has reached or can reach a height of at least 4.5 metres at physiological maturity, provided that where multiple stems grow from the same root system, the number of trees shall be the number of stems that can be counted at a point of measurement 1.37 metres from the ground.

VEGETATION PROTECTION ZONE

Buffers surrounding a *key natural heritage feature* or a *key hydrologic feature*. These areas protect the feature and its functions from the impacts of land use changes and associated activities that will occur before, during and after construction, and where possible, restore or enhance the features and its functions.

Within the Oak Ridges Moraine Conservation Plan, Greenbelt Plan, and the Lake Simcoe Protection Plan, the determination of the extent of a vegetation protection zone is defined by, and be subject to the provisions of these plans.

¹⁰⁸ [Proposed Provincial Modification 70](#)

WELLHEAD PROTECTION AREA

The surface and sub-surface area surrounding a water well or well field that supplies a municipal water system and through which contaminants are reasonably likely to move so as eventually to reach the water well or well field.

WETLAND

Lands that are seasonally or permanently covered by shallow water, as well as lands where the water table is close to or at the surface. In either case the presence of abundant water has caused the formation of hydric soils and has favoured the dominance of either hydrophytic plants or water tolerant plants. The four major types of *wetlands* are swamps, marshes, bogs and fens.

Wetlands on the Oak Ridges Moraine, Greenbelt, and within the *Lake Simcoe Watershed*¹⁰⁹, include any *wetlands* identified by the Ministry of Natural Resources or by any other person, according to evaluation procedures established by the Ministry of Natural Resources, as amended from time to time.

Elsewhere in York Region, *wetlands* include any *wetland* that has been evaluated and identified as significant¹¹⁰ under the Ontario *Wetland* Evaluation System and approved by the Ministry of Natural Resources.

WOODLAND

An area of land at least 0.2 hectare in area with at least:

- a. 1000 *trees* of any size, per hectare;
- b. 750 *trees* measuring over 5 centimetres diameter at breast height, per hectare;
- c. 500 *trees* measuring over 12 centimetres diameter at breast height, per hectare; or,
- d. 250 *trees* measuring over 20 centimetres diameter at breast height, per hectare,

but does not include a cultivated fruit or nut orchard, a plantation established for the purpose of producing Christmas trees or nursery stock. For the purposes of defining a woodland, treed areas separated by more than 20 metres will be considered a separate woodland.

¹⁰⁹ [Proposed Provincial Modification 64](#)

¹¹⁰ [Proposed Provincial Modification 71](#)
