Subject: 19th ave Sewage Pipe

To all,

Please do not allow the giant sewage pipe through 19th avenue in richmond hill to be installed!

This development will go through a sensitive natural linkage corridor of the moraine. As well, the project will pass along an area of high aquifer vulnerability. The infrastructure will also open up more moraine lands to residential development, exacerbating the problems associated with urban sprawl in the region.

We love to mountain bike in the area and are worried that Jefferson forest and surrounding area will become a bedtime story for our grandchildren if we continue to allow urban sprawl and massive development.

Thanks,

Peter Brosz, Dipl. E.Tech, B.Eng, C.F.E.I., P.Eng.
