Subject: Big Pipe Sewer Connection

Good morning

I am writing to you to express my deep concern over the proposed Big Pipe sewer connection project across 19th Avenue. I understand that the proposed sewer will go through vulnerable aquifers and sensitive headwaters in the Oak Ridges Moraine. The Oak Ridges Moraine Act was designed to protect the area from projects such as this, as long as no other viable alternatives exist. There must be a viable alternative. Once this sewer goes through the area, I am sure it will be just a matter of time before the area is opened up once again to development. We only have so many places like the Moraine left in Canada and I beg you to help protect it.

I understand the need for the sewer (it has to be built somewhere) but I beg you to re-evaluate this proposal and work towards finding a better solution, one that will not harm these headwaters and one that will have a less negative environmental impact overall. On behalf of myself, my family, neighbours and future generations, please re-consider this proposal. The alternative will impact our region for years and years to come. Thank you for your time.

Sincerely,

Jaycee Jovic
Maple, Ontario
