Subject: 19th Avenue York Region sewer pipe

To all Mayors, Council Members, and Ministers,

I am only one person but I speak for many when I ask that the Oak Ridges Moraine Conservation Act be kept intact, along with the local ecosystem. The proposed 19th Avenue York Region sewer pipe will, in the end, do more harm than good. It is a temporary solution at best, but its effects will permanently alter the natural habitat for many species as well as the resources themselves. There are other solutions, and although they may take longer to conceptualize and implement, it is worth it. Our environment is irreplaceable.

Thank you,
