

2007 York Region Drinking Water System Schedule 22 Summary Report

Addendum 1

Published: February 6, 2009

This addendum applies to the total annual water withdrawal from the Newmarket/East Gwillimbury/Holland Landing production wells Section 2.9.3 and Table 27 of the 2007 York region Drinking Water System Schedule 22 Summary Report. Results in this section were reported incorrectly by a factor of 10 reporting less water withdrawn than was actually taken for the 2007 reporting period. All other volumes within this section and this report are correct. The following sections did not exceed the permitted withdrawal limits and no non-compliances were determined. Addendum changes are as follows;

Section 2.9.3 Water Withdrawal (Page 40)

The total volume of water taken from the production wells on the Newmarket/East Gwillimbury Water Supply system for January – December 31, 2007 was **10,157,657,830*** litres or 27,829,199 litres per day.

Reported value of **1,015,765,783** litres amended to **10,157,657,830*** litres

Table 27: Permitted and Actual Maximum Withdrawal from the Newmarket/East Gwillimbury/Holland Landing Production Wells for January 1 – December 31, 2007 (Page 41)

Annual Permitted Withdrawal (Litres)	Actual Annual Withdrawal (Litres)	Percentage of Permitted Withdrawal
20,453,408,640*	10,157,657,830*	49.7%

Reported value of **2,045,340,864** amended to **20,453,408,640***

Reported value of **1,015,765,783** amended to **10,157,657,830***
