

A World without Water

What would our world without water be?
No plants or trees the eye can see.

A flower with no water can not be.
We would die of thirst, you and me.

The ground cracked up like shattered glass,
Where there is no water there will be no grass.

No trees to shade us from the sun,
No water to have lots of fun.

No fields for crops to grow,
No sound of the river flow.

What would our world without water be?
