RE: plastics 3 through 7

Dear Kelly,

Haycore Canada Inc. continues to effectively process and market plastic tubs and lids collected from various Ontario and Quebec municipal blue box programs.

Please be advised that the markets for mixed plastics (#3 through 7), still remain intolerant of blister packaging (PVC), plastic film and PET packaging within marketed materials. This policy implemented by these markets remains constant to date, and due to the resin variations used within the manufacturing processes, it is unlikely to change in the foreseeable future.

Yours truly,

Michel Jacobs  
Haycore Canada Inc.
