Subject: Lake simcoe solution

I understand that York Regional Council is being asked to vote on a "Lake Simcoe solution" in advance of the benefit of any public meeting in the most directly affected community.

This strikes me as exactly the sort of action that the "99 percent" are actively and continuously protesting, and a process which needs serious review.

I respectfully suggest the matter be deferred until such time as the people have had the opportunity to give voice to their concerns.

Many thanks
