LONG TERM CARE FUNDING CONVALESCENT CARE PROGRAM

The Health and Emergency Medical Services Committee recommends the adoption of the recommendations contained in the following report, April 24, 2006, from the Commissioner of Community Services, Housing and Health Services:

1. RECOMMENDATIONS

It is recommended that:

1. Council approve the receipt and expenditure of \$119,894 in additional base funding for the period of May to December, 2006 (\$179,842 annualized) from the Ministry of Health and Long-Term Care (MOHLTC) to designate and convert eight additional beds for the new Convalescent Care Program at the Newmarket Health Centre (*see Attachment 1*).
2. Council authorize a 1.71 FTE increase in the approved Long Term Care and Seniors Branch (LTCSB) 2006 permanent staffing complement to accommodate implementation and delivery of the program.

2. PURPOSE

The purpose of this report is to secure approval from Council for the receipt and expenditure of additional subsidy from the MOHLTC for program costs related to the Convalescent Care Program.

3. BACKGROUND

In early 2005, the MOHLTC announced a program to further expand the utilization of short stay beds in designated long term care (LTC) facilities. The program is a form of sub-acute care that allows for the earlier discharge from hospital of individuals that require ongoing convalescent and rehabilitative care before being suitable for discharge to community or LTC facilities. In February 2005, Council approved the submission of a proposal to the MOHLTC for the designation and funding of up to 40 convalescent care beds at the Newmarket and Maple Health Centres. In August 2005, the Region received confirmation from the MOHLTC that the LTCSB had been awarded 11 beds for the new Convalescent Care Program at the Newmarket Health Centre.

On April 7, 2006, the Region received correspondence from the Province advising that the Newmarket Health Centre had been awarded eight additional beds for the Convalescent Care Program.

4. ANALYSIS AND OPTIONS

The funding provided under this initiative will permit the continued focus of the LTCSB's long term care facilities on difficult to serve or hard to place clients with higher care requirements, enhance the level of service provided and increase the subsidy from the MOHLTC for the delivery of these services.

4.1 Overview of Program

The additional convalescent care beds will help to free up acute care beds in hospitals and deliver services to these clients in a more cost effective manner. Clients in this program require intensive rehabilitation and therapy for a period of up to 90 days to maximize their functional abilities and level of independence.

4.2 Program Implementation

New convalescent care beds are existing beds that have been re-designated, as opposed to additional new beds. Accordingly, there is a need to phase in the implementation of the program as vacancies occur at the Centre. The program expansion will be implemented over the spring/early summer and should be fully operational by August 2006. This program will require additional permanent and contract personnel in the areas of medical, nursing and personal care as well as program therapy and support.

4.3 New Base Funding

The additional provincial subsidy of \$61.59 per bed/per day will begin to flow following the first admission in May 2006. The total annualized program costs of \$550,974 for the eight convalescent care beds is comprised of the \$179,842 in new funding plus the existing base funding of \$371,132. Although the Newmarket Health Centre will not be at full occupancy until later in the year, the MOHLTC will provide full funding throughout the ramp-up period as the LTCSB will continue to accrue fixed program costs regardless of occupancy and service levels.

4.4 Relationship to Vision 2026

The conversion of these beds for convalescent care will contribute to the attainment of the Vision 2026 goals of developing Quality Communities for a Diverse Population and Responding to the Needs of our Residents. The LTCSB offers a continuum of community-based, outreach, day and institutional services that support clients with a diverse range of care and support needs.

5. FINANCIAL IMPLICATIONS

The following table provides a summary of the allocation of the additional base funding provided by the MOHLTC for 2006 together with the annualized impact. It also identifies the need for 1.71 additional permanent staff. This funding will cover the increased cost of providing convalescent care services.

The base equity portion of the new funding will not have an impact on the net tax levy component of the approved 2006 LTCSB budget. Although the municipal contribution for these beds will not change in 2006 due to initial start-up costs, the Region's share as a percentage of total cost will decrease due to the additional provincial funding.

Table 1
Overview of Additional Base Funding

Program Envelope	2006 Budget Increase	Annualized Budget	FTE Increase	Contract Hours Increase
Medical, Nursing and Personal Care	\$ 61,410	\$ 92,115	0.79 RPN 0.79 HCA	104 – MD
Program, Therapy and Support	31,220	46,831	0.13 SW	416 – PT 780 – PTA 52 – DT
Health Care Supplies	4,412	6,618		
Administration and Facility	22,852	34,278	n/a	
Total Additional Base Funding	\$ 119,894	\$179,842	1.71	1352*

RPN = Registered Practical Nurse

HCA = Health Care Aide

MD = Medical Doctor

PT = Physiotherapist

PTA = Physiotherapy Assistant

DT = Dietician

* Total Hours equivalent to 0.70 FTE.

6. LOCAL MUNICIPAL IMPACT

The implementation of the new Convalescent Care Program at Newmarket Health Centre will improve specialized supportive care health services for citizens across York Region.

7. CONCLUSION

Participation in this program will facilitate the early discharge from hospital of individuals that require ongoing rehabilitation and therapeutic support before discharge to a community setting and will help to free up beds in the acute care sector.

Delivery of this service is consistent with the LTCSB Business Plan objective of meeting the demand for the provision of programs and services for clients with heavy, complex physical, cognitive and/or behavioural care requirements.

The Senior Management Group has reviewed this report.
