DEVELOPMENT CHARGE CREDIT REQUEST WOODBINE CACHET WEST INC. MAJOR MACKENZIE DRIVE AND NICHOLS BOULEVARD TOWN OF MARKHAM

The Finance and Administration Committee recommends the adoption of the recommendations contained in the following report, July 14, 2004, from the Commissioner of Finance:

1. RECOMMENDATIONS

It is recommended that:

1. Council authorize a development charge (“DC”) credit in the amount of \$99,462 (82%) for the growth-related component (development charges) and a recovery of \$21,871 (18%) for the non-growth component (tax levy) of proposed road works to be undertaken by Woodbine Cachet West Inc. in the Town of Markham, subject to completion of the works to the satisfaction of the Commissioner of Transportation and Works; and,
2. Staff be authorized to fund the growth component of the development charge credit regarding Major Mackenzie Drive and Nichols Boulevard totalling \$99,462 from the Regional roads DC previously collected through the buildout of the residential subdivision in the Woodbine Cachet subdivision.

2. PURPOSE

The purpose of this report is to authorize a development charge credit for intersection works to be performed by Woodbine Cachet West Inc. on Major Mackenzie Drive and Nichols Boulevard in the Town of Markham in advance of the construction timing projected in the Regional Roads Capital Program.

3. BACKGROUND

3.1 DC Credit Policy

At its May 9th and May 23, 1996 meetings, Regional Council approved a detailed development charge credit policy for capital works undertaken by the developer in advance of the planned reconstruction program (subsequently amended June 23, 2003 as part of the passing of Regional Development Charge By-law No. DC-0005-2003-050).

The developer, Woodbine Cachet West Inc., has forwarded a request for the consideration of DC credits for intersection improvements on Major Mackenzie Drive and Nichols Boulevard in the Town of Markham (Attachment 1).

4. ANALYSIS AND OPTIONS

4.1 Development Charge Credit Request

Woodbine Cachet West Inc. is currently developing a residential subdivision in the Town of Markham. In order to proceed with the development of the lands, the developer is required to undertake intersection improvements on Major Mackenzie Drive and Nichols Boulevard in the Town of Markham in advance of the planned reconstruction program at an estimated cost of \$171,989.40.

5. FINANCIAL IMPLICATIONS

The subject subdivision (19T-97002) is comprised of approximately 1,215 residential units. The development has generated Regional development charges of approximately \$10.4 million of which \$3.9 million pertained to the roads component of the charge.

The Regional Transportation and Works Department has reviewed the request submitted by Woodbine Cachet West Inc. in accordance with the approved DC credit policy, and has determined that \$130,016.24 of the total value of the road works is eligible for DC credit (Attachment 2).

In accordance with the DC credit policy, in order to advance the road works from its planned construction timing in year 2012 of the Region's 10 year capital program, the developer will be responsible for a share of the non-growth component of the works. It is proposed that a development charge credit of \$121,333 be permitted. This provides for a discounting of the non-growth component of the works due to the construction of the works in advance of the timing proposed in the Region's 10 year capital program. Attachment 3 outlines the non-growth discounting methodology associated with this request.

It is proposed that a DC credit be permitted for the growth-related component of the works in the amount of \$99,462 (82%), and \$21,871 (18%) for the non-growth component. The growth-related component (development charges) of the DC credit is to be funded from the Regional road DC previously collected subject to completion of the works to the satisfaction of the Commissioner of Transportation and Works. The non-growth component (tax levy) of the works is provided for in the 2004 Roads Capital Budget. The developer has been contacted and is in agreement with the credit amount.

6. LOCAL MUNICIPAL IMPACT

The proposed intersection improvements will benefit the Town of Markham in terms of improving traffic flow along Major Mackenzie Drive. These improvements also facilitate the buildout of the subdivision in the Town of Markham.

7. CONCLUSION

The DC credit request submitted by Woodbine Cachet West Inc. has been reviewed in accordance with the approved DC credit policy. It is proposed that, subject to satisfactory completion of the Major Mackenzie Drive and Nichols Boulevard works, the developer be eligible for a roads DC credit of \$121,333 (82%) funded from the Regional roads DC previously collected and a non-growth cost recovery of \$21,871 (18%) from tax levy.

The Senior Management Group has reviewed this report.
