

Towards Great Regional Streets A Path to Improvement

Prepared for:

Regional Municipality of York

**January, 2006
16-03102**

TABLE OF CONTENTS

1.0	INTRODUCTION
1.1	Background
1.2	Study Process
2.0	EXISTING CROSS-SECTIONS.....
2.1	Typical Cross-Sections for a Four Lane Urban Arterial
2.2	Need for Change
3.0	POLICY.....
3.1	Official Plans
3.1.1	York Region Official Plan, Office Consolidation (As of September 2004).....
3.1.2	Town of Markham Official Plan, Office Consolidation, January 1999
3.1.3	Town of Richmond Hill Official Plan Consolidation, December 31, 1998.....
3.1.4	City of Vaughan Office Plan Amendment 600 (Amending OPA 400), Office Consolidation, January 2003
3.2	Secondary Plans
3.2.1	Central Area Planning District (Markham Centre), July 1997.....
3.2.2	Official Plan Amendment No. 155, Bayview Glen Secondary Plan, Town of Richmond Hill.....
3.2.3	Amendment Number 500 to the Official Plan of the Vaughan Planning Area - Secondary Plan for the Vaughan Corporate Centre.....
3.3	Vision Documents
3.3.1	A Vision for Highway 7.....
3.3.2	Yonge Street Vision - Richmond Hill Graphic Image.....
3.4	Urban Design Guidelines
3.4.1	North Yonge Street - Richmond Hill Urban Design Study.....
3.5	Synopsis
4.0	NEEDS ASSESSMENT
4.1	Existing Conditions.....
4.2	Projected Increases in Travel Demands
4.3	Alternatives to Six-Lane Cross-Sections.....
4.4	Testing of Different Mobility Scenarios.....
4.5	Summary
4.6	Synopsis
5.0	BEST PRACTICES RESEARCH
5.1	Lane Width
5.2	Public Transit.....
5.3	Need for Access versus Control.....
5.4	Medians
5.5	'U'-Turns
5.6	Pedestrians
5.7	Frontage Streets.....
5.8	Cyclists
5.9	Parking
5.10	Urban Design
5.11	Landscape Design Planting Principles.....
5.12	Barrier Aesthetic Treatments
5.13	Design Speeds
5.14	Examples of Six Lane Cross-Sections in Other Municipalities in the GTA

6.0	CROSS-SECTIONAL SPATIAL NEEDS
6.1	Typical Cross-Sectional Elements
6.2	Basic Right-of-Way Functions Versus Desirable Functions.....
6.3	Need for Wider Right-of-Way
6.4	Protection of Wider Right-of-Way.....
7.0	DEVELOPMENT OF CROSS-SECTIONS
7.1	Development of Alternatives
7.2	Evaluation Criteria
7.2.1	Transportation Functionality/Mobility/Safety.....
7.2.2	Costs.....
7.2.3	Community Needs and Values
7.3	Assessment of Alternatives.....
7.4	Recommended Cross-Section
8.0	GENERALIZED LAND USE TYPOLOGIES
8.1	Residential.....
8.2	Commercial
8.3	Urban Mixed Use.....
8.4	Employment Campus.....
8.5	Industrial.....
9.0	REGIONAL STREET CASE STUDIES
9.1	Case Study Corridors
9.1.1	Case A - McCowan Road, near Denison Road (Residential Typology).....
9.1.2	Case B - McCowan Road, near Highway 7 (Commercial Typology)
9.1.3	Case C - Leslie Street, near Highway 7 (Urban Mixed Use Typology)
9.1.4	Case D - 16 th Avenue, near Highway 404 (Employment Campus Typology).....
9.1.5	Case E - Weston Road, near Steeles Avenue (Industrial Typology)
9.2	Storage and Taper Lengths
9.3	Basic Cross-Sections and Variations
9.4	Landscape Streetscape Treatment.....
9.4.1	Residential Typology Example
9.4.2	Commercial Typology Example.....
9.4.3	Urban Mixed Use Typology Example
9.4.4	Employment Campus Typology Example
9.4.5	Industrial Typology Example
9.5	Safety Considerations
9.6	Potential Landscaping Features.....
9.7	Costs
9.8	Phasing of Landscaping Features.....
9.9	Transitional Zones between 4/5 Lanes and 6/7 Lanes
10.0	SUMMARY AND CONCLUSIONS.....
REFERENCE	

LIST OF FIGURES

2-1	Existing Conditions
2-2	Potential Streets to be Widened to 6/7 Lanes, 2005 – 10 Year Road Construction Program
2-3	Standard Six Lane Cross-Section within 36 metre ROW
3-1	Transportation Schedule for Markham Centre
3-2	Transportation and Services Schedule for Bayview Glen
3-3	Transportation Plan for OPA 500
3-4	Cross-section view of "Avenue Seven"
3-5	Vision for Highway 7, Vaughan Corporate Centre looking west
3-6	Vision for Highway 7, west from McCowan in Markham
3-7	Vision for Yonge Street, North of Highway 7 in Richmond Hill
3-8	An Illustrated Guide to Built Form, Siting and Streetscape Approaches for Yonge Street in Oak Ridges
4-1	Existing Areas of Major Traffic Congestion
4-2	1998 AM Peak Period Screenline Comparison of Volume-to-Capacity
4-3	1998 PM Peak Period Screenline Comparison of Volume-to-Capacity
4-4	2031 Horizon - AM Peak Hour Screenline Comparison of Volume to Capacity
4-5	Travel Time Comparison
5-1	Yonge Street, near Sheppard Avenue
5-2	Don Mills Road
5-3	Markham Road, south of Finch Avenue
5-4	University Avenue
5-5	Ellesmere Road, near McCowan Road
5-6	Dixie Road
5-7	Hurontario Street, near Highway 403
5-8	Hurontario Street, near Highway 407
6-1	Typical Cross-sectional Elements
6-2	Wider ROW required
7-1	Standard 7 Lanes
7-2	Alternative 1.1 Curb Lane Bus/HOV (6.0 m Median)
7-3	Alternative 1.2 Curb Lane Bus/HOV (4.0 m Median)
7-4	Alternative 1.3 Curb Lane Bus/HOV (2.0 m Median)
7-5	Alternative 1.4 Curb Lane Bus/HOV (No Median)
7-6	Alternative 2.1 Bike Lane/Curb Lane Bus/HOV (6.0 m Median)
7-7	Alternative 2.2 Bike Lane/Curb Lane Bus/HOV (4.0 m Median)
7-8	Alternative 2.3 Bike Lane/Curb Lane Bus/HOV (2.0 m Median)
7-9	Alternative 2.4 Bike Lane/Curb Lane Bus/HOV (No Median)
7-10	Alternative 3.1 Off-Street Bike Lane with Curb Lane Bus/HOV (6.0 m Median)
7-11	Alternative 3.2 Off-Street Bike Lane with Curb Lane Bus/HOV (4.0 m Median)
7-12	Alternative 3.3 Off-Street Bike Lane with Curb Lane Bus/HOV (2.0 m Median)
7-13	Alternative 3.4 Off-Street Bike Lane with Curb Lane Bus/HOV (No Median)
9-1	Case A Study Corridor (McCowan Road Near Denison Street)
9-2	Case B Study Corridor (McCowan Road Near Highway 7)
9-3	Case C Study Corridor (Leslie Street Near Highway 7)
9-4	Case D Study Corridor (16 th Avenue Near Highway 404)
9-5	Case E Study Corridor (Weston Road Near Steeles Avenue)

9-6	Proposed Streetscape Plan Case A Residential Typology (McCowan Road near Denison Street)
9-7	Existing and Future Condition Case A Residential Typology (McCowan Road near Denison Street)
9-8	Proposed Streetscape Plan Case B Commercial Typology (McCowan Road near Highway 7)
9-9	Existing and Future Condition Case B Commercial Typology (McCowan Road near Highway 7)
9-10	Proposed Streetscape Plan Case C Urban Mixed Use Typology (Leslie Street near Highway 7)
9-11	Existing and Future Condition Case C Urban Mixed Use Typology (Leslie Street near Highway 7)
9-12	Proposed Streetscape Plan Case D Employment Campus Typology (16th Avenue near Highway 404)
9-13	Existing and Future Condition Case D Employment Campus Typology (16th Avenue near Highway 404)
9-14	Proposed Streetscape Plan Case E Industrial Typology (Weston Road near Steeles Avenue West).....
9-15	Existing and Future Condition Case E Industrial Typology (Weston Road near Steeles Avenue West).....
9-16	Potential Landscaping Features Residential Medians (5.2 m)
9-17	Potential Landscaping Features Other Medians (6.0 m)
9-18	Potential Landscaping Features Residential Medians (2.2 m)
9-19	Potential Landscaping Features Other Medians (3.0 m)
9-20	Potential Landscaping Features Residential Boulevards.....
9-21	Potential Landscaping Features Other Boulevards
9-22	Potential Landscaping Features Intersections
9-23	Potential Phasing of Landscaping Features at McCowan Road (Case B - Commercial) Study Corridor

LIST OF TABLES

4-1	Scenarios
4-2	Resulting Average Travel Speed
6-1	Typical Cross-sectional Elements
7-1	Alternatives.....
7-2	Evaluation Matrix.....
9-1	Typical Cost Comparison

LIST OF APPENDICES

Appendix A	Analysis of Urban Streets
Appendix B	Best Practices Research Background Papers
